

## KARBON ACTIVE

### DESCRIPTION

Pure activated carbon, in powder form, with very high decolorizing power.

KARBON ACTIVE does not alter the chemical composition of the must or treated wine; its maximum decolorizing effectiveness is in fact due to its great affinity for anthocyanins.

It is also effective for reducing fungal toxins in musts and red wines during fermentation.

KARBON ACTIVE acts effectively with short contact times and settles slowly.

Black colored powder.

### COMPOSITION

Activated carbon

### APPLICATION

- Decolorization of musts
- Curative treatment of wines with oxidative defects
- Reduction of fungal toxins in red wines.

### INSTRUCTIONS FOR USE

Dissolved in water with a 1:5 ratio and keep the treated mass in agitation for one hour.

Usage limitations: Maximum limit of 100 g of dry product/hl

### DOSAGE

Maximum dose 100 g/hl (referring to legal limit)

### PACKAGING

10 kg packages

### STORAGE

Closed package: store in a cool place (temperature below 25°C), dry, ventilated and odor-free. The product maintains its characteristics intact for at least 24 months from the production date.

Open package: close carefully and store in a cool place (temperature below 15°C), dry and ventilated. Use the product within a short time.

### HAZARDS

This product must be stored, handled and used in accordance with suitable industrial hygiene practices and in compliance with current legislation. Product for food and enological use, for professional use only.
