

PVPP

DESCRIPTION

Preventive and curative treatment of oxidations. Selectively fixes low molecular weight phenolic compounds (catechins-leucoanthocyanins) responsible for wine browning.

COMPOSITION

Polyvinylpolypyrrolidone.

APPLICATION

It is recommended to add in suspension in the tank or during filtration added to filter aids.

USAGE INSTRUCTIONS

1. Prepare a suspension of PVPP in approximately 10 parts of water. This operation must be performed at least 20/30 minutes before use.
2. Add to the mass to be treated.
3. Keep the mass in constant movement by pumping over in closed circuit or with the aid of electric agitators. This operation must last at least half an hour.

DOSAGE

The use of 2 - 20 g/hl in white wines is recommended.

The dose may vary in reference to the concentration of total polyphenols present, particularly tannins with astringent taste.

PACKAGING

1 and 20 kg packages.

STORAGE

Closed package: store in a cool place (temperature below 25°C), dry, ventilated and odor-free. The product maintains its characteristics intact for at least 24 months from the production date.

Opened package: close carefully and store in a cool place (temperature below 15°C), dry and ventilated. Use the product within a short time.

HAZARDS

This product must be stored, handled and used in accordance with appropriate industrial hygiene practices and in compliance with current legislation. Product for food and enological use, for professional use only.
