

WOW NICOLE

Technological adjuvant for color stabilization and flocculant for protein excesses in wines

DESCRIPTION

The tannins of the WOW line represent a true innovation in the enological field. Their main objective is to replace chips during wine processing phases in the fermentation and aging process, guaranteeing the same technical result. They are unique products of their kind, created to meet the new market needs of wine producers.

WOW NICOLE is a balanced blend of procyanidinic and ellagic tannins, specifically designed to reproduce the effects resulting from fermentation in:

- Promote color matter stabilization
- Increase antioxidant protection
- Stabilize protein excesses
- Reduce herbaceous and reduced sensations and enhance varietal fruity aromas
- Increase sensations of softness and sweetness

COMPOSITION

Blend of procyanidinic and ellagic tannins.

USAGE INSTRUCTIONS

Disperse **WOW NICOLE** in water at a 1:10 ratio when adding to the must or directly in wine at a 1:20 ratio. Subsequently add to the mass through pumping over.

DOSAGE

Rosé musts: 1-5 g/hL

Young red musts and wines: 15-25 g/hL

PACKAGING

1 kg
