

PROVITAL CURE

Biological supplement for the prevention and treatment of fermentation arrests

DESCRIPTION

Provital Cure is composed of yeast hulls and inert support elements. Preparation based on inactive yeast specific for yeast nutrition. **Provital Cure** has been specifically developed to supplement various substances deficient in must towards the end of alcoholic fermentation. Preparation extremely rich in lipid substances such as unsaturated fatty acids and sterols, essential for maintaining the permeability of the yeast cell membrane. Supply of FAN in the form of easily assimilated amino acids. Excellent adsorbing power towards toxins produced by yeast during alcoholic fermentation and other inhibiting products. The product appears as a beige-colored powder.

COMPOSITION

Yeast hulls, inactivated yeasts and support elements.

APPLICATION

To be added during fermentation for adsorbing action towards exogenous toxins or those produced by yeast during fermentation.

INSTRUCTIONS FOR USE

Disperse **Provital Cure** in a volume of 5 – 10 times its weight in water. Mix well creating a homogeneous suspension and add to the fermenting must with pump-over ensuring homogenization.

DOSAGE

Recommended dose: 20 - 60 g/hL legal max dose 200g/hl

PACKAGING

1 kg and 15 kg packages

STORAGE

Closed package: store in a cool place (temperature below 25°C), dry, ventilated and free from odors. The product maintains its characteristics intact for at least 24 months from the production date.

Opened package: close carefully and store in a cool place (temperature below 15°C), dry and ventilated. Use the product promptly.

HAZARDS

This product must be stored, handled and used in accordance with suitable industrial hygiene practices and in compliance with current legislation. Product for food and oenological use, for professional use only.
