Summary

I am Sherif Quraish, a 21-year-old multifaceted professional from Damietta, with 3 years of experience in Web Development, Software Engineering, and Graphic Design. I specialize in merging technical logic with creative vision to deliver high-quality digital products. Leveraging VS Code for development and the Adobe Creative Suite for design, I have successfully delivered 10 Android applications, 6 websites, and over 20 graphic design projects. My focus remains on precision and excellence, ensuring every result is perfectly tailored to your requirements. Technologies & Languages: Flutter, Dart, HTML, CSS, C++, and JavaScript.

Experience

Freelance Full-Stack Developer & Graphic Designer | Self-Employed, Freelancer

- Designed, developed, and deployed 10+ Android applications using Flutter and Dart, integrating Firebase Authentication and REST APIs to ensure seamless backend performance and user management.
- Built 6+ responsive, user-friendly websites focusing on cross-platform compatibility and high-speed performance.
- Created 20+ high-quality visual assets and branding materials using Adobe Creative Suite, tailored to align with client identity and market requirements.
- Successfully delivered end-to-end solutions, including the "Shift Time" and "Money Manager" applications, by translating business needs into functional technical features.

Skills

Mobile & Web Development

Flutter, Dart, HTML, CSS, JavaScript, Responsive Design, State Management.

Backend & Databases

Firebase, Firebase Authentication, REST APIs, Database Management

Graphic & UI/UX Design

Adobe Creative Suite, Visual Design, Business Card Design, QR Code Design, UI/UX Principles.

Tools & Methodologies

VS Code, Report Generation, Object-Oriented Programming (OOP)

Education

Student, Higher Institute of Engineering - Arish

- Major: Electronics and Communications Engineering
- Status: Pursuing degree

Certifications and Licenses

Graphic Design Professional Certificate

Completed a comprehensive training program in Graphic Design from M3aarf Platform. Focused on mastering design principles, visual identity creation, and industry-standard design tools.
Credential ID: 20f2654c

Canva Application Training

Completed an applied training course on Canva from M3aarf platform. Focused on mastering design principles, creating visual content, and utilizing professional design tools to build effective layouts.
Credential ID: 86cf2e85

Scientific Conference Participation - El Arish High Institute of Engineering and Technology

- Awarded for the accepted manuscript titled: "The Evolution of Battery Technology: Powering a Cleaner, Electrified Global Future" at the 1st Scientific Conference.
- Date: December 2025.

Cross-Platform Mobile Development (Flutter & Dart)

Advanced certification in building high-performance, cross-platform mobile applications using Flutter and Dart. Gained hands-on experience in developing scalable UI, state management, and seamless integration with backend services.

Projects

Shift Time - Work Log Application, *Efficient tracking for work shifts and earnings* 02/2026

A smart productivity tool built with **Flutter** and **Firestore**. Designed to track shifts and hourly rates with precision, automatically calculating total earnings and net pay.

- **Tech Stack:** Flutter And Dart

BMI Calculator, *Health and wellness tracking tool* 03/2026

A user-friendly health application that calculates Body Mass Index (**BMI**). Designed with a clean interface to provide users with health summaries and wellness insights.

- **Tech Stack:** Flutter And Dart

Weather App, *Real-time weather forecasting* 04/2026

A weather forecasting application providing real-time updates, temperature readings, and 5-day forecasts for global locations with a sleek, modern interface.

- **Tech Stack:** Flutter, Dart And OpenWeather API

Professional Portfolio App, 05/2026

My gateway to mobile development, web solutions, and design

- Developed a dedicated portfolio application to showcase my projects in Mobile development, Web solutions, and Graphic design. Features an interactive interface to explore my work and contact me directly.

- **Tech Stack:** Flutter And Dart

Money Manager | Personal Finance App,

05/2026

A comprehensive tool for tracking daily income, expenses, and debts

- A user-friendly financial management application developed using **Flutter** and **Dart**. It allows users to log their daily income and expenses, track debts, and manage budgets effectively through an intuitive interface. It provides clear financial summaries to help users make informed decisions.
- **Tech Stack:** Flutter And Dart

Restaurant Management System,

05/2026 – 06/2026

Comprehensive shift and payroll management solution

A specialized management application designed for shop owners to streamline daily operations. Features include:

- Tracking employee attendance, hourly rates, and individual withdrawals.
- Automated calculation of total earnings and net pay.
- Generates comprehensive financial reports in PDF format for easy record-keeping.
- **Tech Stack:** Flutter And Dart

Quran App – Complete Quran Recitation & Memorization Tool,

05/2026 – 06/2026

Interactive Quran application with audio, tafsir, and bookmarking features

Quran App – A complete digital Quran application designed for easy recitation, memorization, and understanding of the Holy Quran.

Key Features:

- Complete Quran text with Uthmani script
- Audio recitations from multiple famous Qaris
- Word-by-word translation and transliteration
- Verse bookmarking and progress tracking for memorization (Hifdh)
- Search functionality for verses by keyword or Surah name
- Tafsir (interpretation) for deeper understanding
- **Tech Stack:** Flutter & Dart And API
