ROBE LIGHTING

INTRODUCTION

Robe lighting is dedicated to providing the finest lighting solutions for the entertainment, leisure and architectural industries.

A balanced mix of innovation, imagination and experience has led to the development of a wide range of well-engineered products appropriate to all sectors. Robe's products have set the standard and earned their own reputation for being reliable and robust. They have also established themselves as an invaluable creative tool for designers, operators and programmers of all genres of lighting – from clubs to cathedrals.

This Product Guide illustrates Robe lighting's commitment to excellence and to the design and production of top quality products with real long-term investment value.

Here you will find detailed, useful, easy-to-read information on the entire Robe range that will guide you to the right product for your specific application.

Robe products are available through a dealer network.

Robe lighting welcomes your feedback as we aim to stay at the forefront of innovation and style.

Created specifically for follow-spot operation, this custom modified version of BMFL™ comes with specific features to provide both motorised movement and manual operation with follow-spot handles. Based on the powerful BMFL™ WashBeam it blasts beams of extra bright output and has an abundance of great features.

The BMFL™ FollowSpot takes advantage of its wide 160 mm front lens and a high CRI 1.700W lamp. With a custom light source designed for Robe it produces an astounding 251.000 lx at 5 metres and has a wide zoom range of 5° to 45° with precise focusing. Manually or remotely controllable features include smooth color mixing and CTO flags, two color wheels, multiple variable frost filters, focus, zoom and quick pulsing iris. Follow-spot operation can be extended by using LightMaster handles – an optional accessory.

The BMFL™ FollowSpot is pre-wired for installation of the digital camera on the head and is connected with the new RoboSpot base station for off-stage follow-spot operation...

BMFL™ FollowSpot LT - A compact, affordable solution for the larger arena.

Further adding to the ground breaking RoboSpot system, the FollowSpot LT is designed for the larger venue that requires a longer throw distance, tighter beam and greater output power. The LT is the same size and weight as the standard BMFL™ FollowSpot, which is substantially smaller than other products of similar power. The proprietary optical design provides a 8:1 zoom ratio (1–8 degrees) and an output exceeding 455.000 lux at 5 metres. Like the standard BMFL™ FollowSpot, the LT can be operated as a manual, stand-alone follow spot using the Robe LightMaster-Side and LightMaster-Rear control kits. Similarly, the LT can be operated remotely using the Robe RoboSpot™ MDC remote follow spot system and is pre-wired for the Digital Camera. Packed with all the features you would expect from a BMFL series product, including, imperceptible colour mixing, fixed colour filters, 6000K native colour temperature, CRI>92, Variable CTO to 2700 & CTB to 9000K, fixed & variable frost filters, focus, zoom and a fast iris.

Features

- Illuminance: 455.000 lx@5 m
- 2 x Colour Wheels
- Zoom range 1°–8°
- CRI 92+
- Fast pan/tilt with EMS™
- Three grades of variable frost

The BMFL™ – Bright Multi-Functional Luminaire – the much anticipated new lighting fixture from Robe, brings a real game changer in the world of moving lights. The BMFL™ Spot has a custom light source designed for Robe and produces a staggering powerful 250.000 lx at 5 metres – no other product currently on the market can equal this output! Despite its power and comprehensive feature set, it weighs just 36 Kgs... and has a compact body profile. The lamp produces light at a CRI of 92+, this combined with a refined optical system, 5–55 degree zoom, results in a crisp, high quality fat beam that is truly homogenised and without a hotspot. The new, high definition colour mixing technology can produce a full spectrum of colours. There are also two colour wheels which include filters that can be utilised to adjust colour temperature and improve the CRI of the white output in aging lamps. There are two rotating gobo wheels – each with six gobo positions. There are also two Rotating Prisms. The Dual Graphic Wheels both focus within the same focal plane and the rotation and movement can be individually controlled and varied... to create ultra-cool, infinitely subtle special effects. The frost and dimming functions provide further effects. Three grades of Frost are available and the dimmer is exceptionally smooth with no distortion, so the full beam width is visible right up to the point at which it disappears. The strobe effect is authentic with up to 10 flashes per second! Aimed at long-throw applications, the newly patented Robe EMS™ (Electronic Motion Stabiliser) technology, enables the BMFL™ to absorb vibrations from audio outputs, truss movement, sprung or suspended floors, etc. The BMFL™ is a very powerful, feature packed luminaire that will provide a real signature light source for any project.

Features

- Illuminance: 250.000 lx @ 5 m

Rotating Gobo Wheel 1

Rotating Gobo Wheel 2

Four fast shutter blades with smooth and precise movement in the new BMFL™ Blade lighting fixture. Individually angled and positioned within a frame – which itself can rotate through 90 degrees, providing a sharp or soft, precisely repeatable, frame for the projected image. Producing a new series of fast-moving in-air effects through pre-programmed shape and movement sequences of the blades, gobo images can be trimmed or framed in a regular, triangular or trapezoid shape. Each pair of opposing blades can close to a complete blackout. Two gobo wheels – one rotating with six slot & lock gobo positions plus another with 8 static gobos can be combined with the Animation wheel to create numerous dynamic projected effects. Add all this to the already acclaimed BMFL™ features including: exceptionally smooth linear dimming, imperceptible high definition colour mixing, full width beam, output in excess of 250.000 lx at 5 metres – and the Robe EMS™ (Electronic Motion Stabiliser) technology, enabling the BMFL™ to both move and stop faster and more precisely than any other fixture in its class – all this housed in a compact body profile weighing just 37.9 kgs.

Features

- Illuminance: 250.000 lx@5m

BMFL™ - Wash is the ultimate fresnel based 1.700W lamp based wash light with large 200 mm diameter front fresnel lens for high quality traditional wash output ranging from punchy tight 4.5° to smooth 55°. Custom interchangeable frost filters with three grades (light, medium and heavy) for extremely gentle soft touch. CMY + CTO color mixing filters for the unprecedented BMFL™ quality of color transitions and two color wheels with 6 colors each, one with custom replaceable slot & lock positions. Advanced DMX controllable edge aberration correction for smoother hues and seamless coverage.

The Optional XF module expands the features of the BMFL™ Wash with innovative internal Scrim having a graduated filter, which can be inserted to the light path and allowing rotation of the whole assembly plus/minus 180° to achieve even wash coverage when projecting onto a non-perpendicular surface and internal motorised barndoors for creating different Unixe shapes and chases which also simulates barndoor effects. The Unite module consists of four individually controllable blades and is rotatable by +/- 90°.

Features

- Illuminance: 125.000 lx@5m
- Fast and precise Beam Shapers module
- Zoom range 4,5°–55°
- Smooth CMY/CTO colour mixing
- Fast pan/tilt with EMS™
- Scrim module

The strong-arm of the BMFL™ family – the superbly powerful BMFL™ WashBeam comes with extra bright output and an abundance of great features, e.g newly developed framing shutters, super wide front lens and animation wheel.

The BMFL™ WashBeam will enhance any show with its large beam produced through wide 180 mm front lens. With custom light source designed for Robe it produces an astounding 300.000 lx at 5 metres! Rotating gobo wheel with carefully selected gobos ensure many combinations of in air animations, but can also produce nice spot-like projections on surfaces. Four fast shutter blades with smooth and precise movement offer individually angled positions within a frame – which itself can rotate through 90 degrees, providing a sharp or soft, precisely repeatable frame for the projected image. Fast movement of the framing system also allows unique in air beam effects. Adding frost filters can enhance the projection by adding smooth touches to the beam's edge.

Features

- Illuminance: 300.000 lx @ 5m
- Zoom range 5°–45°
- Three grades of variable frost
- Fast pan/tilt with EMS™
- Fast and precise framing shutter module
- Smooth CMY/CTO colour mixing
- Animation Wheel
- Rotating Gobo wheel

Powerfully smooth, Robe's VIVA™ CMY combines brightness of exceptionally clear zero-fringing white beam together with continuous color transitions of CMY mixing.

Elegant and lightweight, packed with smart effects that are easy to use. The fixture is very powerful yet consumes little energy.

The 350W white LED light engine gives an extra punchy beam and an incredible 20.000 hours of operation – in fact, no relamping will be needed for the entire life of the fixture!

Smooth color transition and fixed vivid and radiant colours can be applied from CMY mixing system and colour wheel, and rotating or static gobos added for projections or mid-air effects. The smooth zoom can go out to 40 degrees at its widest and be softened it up with variable frost to create a gentle wash-like output or dynamic background projections.

The minimum 9° zoom produces a piercing beam that can be trimmed with ultra-fast stepless iris for really punchy output, and VIVA has extremely fast pan/tilt movement using Robe's proprietary EMS™ (Electronic Motion Stabiliser) technology.

That and much more is possible with VIVA™ – entertaining and contemporary!

TETRAgnatha's are linear bars building on the Spider and Tarrantula technology with TETRA2™ the uncompromising leader of the Tetra family.

Generating an ultra-tight 4° beam from each of the 18 pixels, they combine to produce a bright, defined "sheet" of light, desired by Lighting Designers. Seamless curtains of light can be constructed using several fixtures as the detailed design allows any combination of TETRA1™ and TETRA2™ to be placed end-to-end on stage or truss, whilst maintaining equal spacing between pixels. With the addition of two exclusive Robe patented MCFE™ - Multi-Coloured Flower Effects - the pixel-driven TETRA2™ sets itself apart from others by projecting charismatic in- air animations.

The homogenised beams, together with the smooth 11:1 zoom, provide a wash out to 45°, a footlight, a wall graze or dynamic in-air effects with fast-paced sweeping movements. Utilizing our latest L3™ (Low Light Linearity) dimming system for an imperceptible fade to black, the 18-bit control provides ultra-smooth colour mixing across the full colour spectrum. An embedded Ethernet switch and wide range of protocols (sACN, Art-Net or Kling-Net) allow a quick network installation and ease of control from media servers, DMX or the internal effects engine.

TETRA1™ is a linear bar built on the highly successful Spiider and Tarrantula technology. Despite its shorter length, TETRA1™ maintains the same features, quality and pixel spacing as TETRA2™.

Generating an ultra-tight 4° beam from each of the 9 pixels, they combine to produce a bright, defined “sheet” of light, desired by Lighting Designers. Seamless curtains of light can be constructed using several fixtures as the compact, detailed design allows any combination of TETRA1™ and TETRA2™ to be placed end-to-end on stage or truss, whilst maintaining equal spacing between pixels. With the addition of one exclusive Robe patented MCFE™ - Multi-Coloured Flower Effect - the pixel-driven TETRA1™ sets itself apart from others by projecting charismatic in- air animations.

The homogenised beams, together with the smooth 11:1 zoom, provide a wash out to 45°, a footlight, a wall graze or dynamic in-air effects with fast-paced sweeping movements. Utilizing our latest L3™ (Low Light Linearity) dimming system for an imperceptible fade to black, the 18-bit control provides ultra-smooth colour mixing across the full colour spectrum. An embedded Ethernet switch and wide range of protocols (sACN, Art-Net or Kling-Net) allow a quick network installation and ease of control from media servers, DMX or the internal effects engine.

Features

- Bright LED WashBeam fixture
- MCFE™ - Multi-Coloured Flower Effects
- Innovative Lens Coating Technology
- Individual Pixel Control
- RGBW Colour Mixing
- Zoom 4°–45°

Building on the success of the LEDWash 1200 and Spider's advanced technology, the all new Tarrantula is the most powerful LED beam/wash/effects fixture on the market. Now equipped with Robe's innovative lens coating technology which brings benefits such as bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning.

Designed for concerts, car shows, sporting tournaments, indeed any event in a large venue, the Tarrantula is powered by 36 x 40W and 1 x 60W high powered emitters providing a stunning 20.000 lumen output. The versatile optical system offers an adjustable beam angle, from a tight 4° spot to a super-wide 50° wash, of the highest quality light. The LEDWash 800 inspired Beam Shaper accessory creates a traditional oval beam that can be indexed to precisely cover the desired stage or performance area. Central to the effects capabilities of this fixture is Robe patented MCFE™ - Multi-Coloured Flower Effects, adding yet another spectacular visual dimension. Driven by the 60W RGBW multichip, this creates the sharpest spikes of light, rotating in either direction with controlled speed. Fully saturated and intense colours as well as subtle pastel tones are created with velvety smooth transitions thanks to the integrated internal 18bit LED dimming system. Dynamic video effects are easily achieved by mapping individual pixels controlled by a DMX desk or media servers via sACN with internal HTP merging, DMX or by Kling-Net protocol.

Unlike other spiders, our new IP65 rated iSpiider®, with its highly advanced protective design, is perfectly happy to play in the rain!

Ideally suited for festivals, concerts and outdoor events, or any scenario needing to deal with inclement or unpredictable weather, the iSpiider® is a bright, high-performance rated WashBeam luminaire, retaining all the favourite features of its phenomenally successful indoor relative, the Spiider®.

Designed, developed, and manufactured, to be sealed against water and particle ingress, thereby strictly adhering to their IP65 rating, you can be confident of both its protection and performance.

Their aluminium housing gives a dust-free environment for the optics, eliminating the need for frequent cleaning, routine maintenance, and UV damage to plastic parts.

By including NFC (Near-Field Communication) technology, you can access setup, diagnostic and performance features, even when the fixture is not powered, directly from your mobile device using the Robe Com app.

iSpiider uses the same 18 x 40-Watt, and 1 x 60-Watt LED source as the original, with the identical 12.5 :1 zoom optical system, giving the same, tight 4° Beam to wide 50° Wash.

The unique central piece Robe patented MCFE™ - Multi-Coloured Flower Effect, driven by the 60W RGBW LED multichip, produces sharp, multicoloured spikes of light, rotating in both directions at variable speed, adding visual impact to any show.

All control protocols are present, with dynamic video effects achieved by mapping individual pixels, controlled by DMX control desks, media servers via sACN with internal HTP merging, or Kling-Net.

Designed to be used indoors or out, we make fixture swap with the original Spiider® easy, as the DMX control channels, operating speeds, and feature set of both luminaires are identical.

Like the Spikie?
You'll LOVE the SuperSpikie.
Bigger, brighter and bolder, the SuperSpikie takes the look to another level.
Four times brighter than the original Spikie and with the addition of rotating gobos – this effects machine has even more looks to blast through its 165mm lens front. The Zoom is bigger too. From a 3.5° beam to a soft wash at 42°, the CMY or RGBW colour mix looks rich. In-air effects using different combinations of the gobos, prism or Robe patented MCFE™ - Multi-Coloured Flower Effects, make this a versatile stage, set or studio piece. With the ability to mount it in any position, the fast 360° continuous pan and tilt motors add yet another dimension.

Features

- Wash, Beam, FX
- Zoom: 3.5°–35° Beam, 5°–42° Wash
- Innovative Flower Effect
- Beam Splitter
- 250W RGBW LED
- CMY of RGBW Colour Mixing
- Continuous Pan & Tilt Rotation
- Super Fast Movement

Rotating Gobo Wheel 1

Spikie, a small, super fast LED WashBeam, which utilises a single 60W RGBW light source with a specially designed 110mm wide front lens producing a solid beam. The fixture quickly zooms from a soft wide 28° wash to a tight sharp-edged 4° beam or one of two new stunning air effects.

The new innovative Robe patented MCFE™ - Multi-Coloured Flower Effect creates sharp multicoloured spikes of light, rotating in both directions at variable speed. Additionally, a unique Beam Effect Engine transforms the output into a dynamic ray of three narrow beams, creating another new visual effect to the show. Continuous rotation of pan and tilt gives new dynamic elements across the stage. Spikie is a very compact 7.3 kg fixture, which can be hung in any position. It is supplied complete with one Omega bracket and is available in cardboard, six-way, eight-way and twelve-way cases.

Features

- 60W RGBW LED engine
- 20.000 hours
- Zoom: 4°–28°
- 920 lm, 9.270 lx @ 5 m
- Low power consumption
- Flower Effect
- Colour Rainbow Effect
- 3-facet Prism

iPointe65® plays where you want it to! Indoors or out, whatever the weather, our IP65 rated iPointe65® gives you the perfect all-weather playmate!

Ideally suited for festivals, concerts and outdoor events, or any scenario needing to deal with inclement or unpredictable weather, the iPointe65® is a bright, high-performance multifunctional luminaire that works equally well as a beam, spot, effects and wash fixture.

Designed, developed, and manufactured, to be sealed against water and particle ingress, thereby strictly adhering to their IP65 rating, you can be confident of both its protection and performance. iPointe's aluminium housing gives a dust-free environment for the optical, gobo and colour systems, eliminating the need for frequent cleaning and maintenance.

By including NFC (Near-Field Communication) technology, you can access setup, diagnostic and performance features, even when the fixture is not powered, directly from your mobile device using the Robe Com app.

The iPointe's impressive light source is a 310W lamp, with a lifetime of up to 4.000 hours, specially developed for Robe by Osram. Providing 12.000 lm, measured at the front lens, the source produces a brilliant, crystal clear, razor-edged beam, adjustable from a tight, punchy 1.8-degree beam to a wide 42 degree spot. The beam can be accurately shaped and positioned by using the innovative framing shutter emulation.

Both static and rotating glass gobos produce precision in-air effects and projected images with a sharp, high-contrast, flat field. The dynamic effects engine provides

12 varying beam and 'flower' effects, taking this winning combination of creativity and weather resistance to new levels.

iPointe65® offers easy fixture swap with MegaPointe®, featuring the same DMX control channels and feature set, in a well-protected, water-resistant housing.

iSeries – Robe reliability in all weathers.

Static gobo wheel

MEGA bright with MEGA features and still compact. The MegaPointe from Robe.

OUR NEW REFERENCE POINT!

Our all-new MegaPointe elevates the original all-in-one fixture to a whole new level. Unleash your creativity using the bright sharp parallel beams, excellent gobo projection, precise movement, smooth CMY colour mixing and dimming plus a multitude of beam splitting, wash and shaping effects.

The Robe R&D team worked with Osram to provide a 470W lamp that aligns perfectly with the cutting edge optical system. This design provides a brilliant, crystal clear, razor-edged beam, adjustable from a punchy 1.8 out to a wide 42 degree zoom.

Both static and rotating (glass) gobos produce precision in-air effects or projected images with a sharp, high-contrast, flat field.

The newly designed effects engine can produce 12 varying beam and 'flower' effects. The beam can also be shaped using innovative shutter emulation, further creating a whole new blend of content & creativity.

Rotating gobo wheel

Static gobo wheel

It's very bright and super-fast with a sharp parallel beam that cuts through the air and across video with ease. It can project a static or rotating glass gobo to produce precision in-air and surface images with an even focal plane. Tight or at full 20 degree zoom, the output is crystal clear and brilliant. Add in either rotating, 6-way linear or 8-way circular, get rid of comma prisms to create wide reaching effects across any set. Drop in the frost filter and use any of the 13 rich colours to create a smooth even wash. The Pointe has an output far greater in size, quality and power than seems possible from its small, lightweight body—due to the efficient short arc 280W discharge source and the Robe optical configuration. This new technology fixture even travels efficiently in a case of 4 and will cover all your needs - Beam, Spot, Wash, FX - there is no point in using any other fixture.

Features

- Illuminance:

Beam mode: 82.400 lx @ 20 m

Spot mode: 90.000 lx @ 5 m

■ 0° parallel Beam

■ Zoom: Beam 2,5°–10° | Spot 5°–20°
- Beam, Spot, Wash & FX Fixture

■ Rotating & Static Gobos

■ Circular & Linear Prisms

Rotating gobo wheel

Static gobo wheel

miniPointe® is a tiny agile air cutter specifically designed to produce sharp beam and aerial effects especially in venues constrained by size. Striking bright 0° parallel beams with glowing colours and static gobo wheel patterns can be multiplied by innovative Dynamic Flower Effect (DFE™) producing various shapes of flower beams dynamically changing in the air. Fine-tuned short arc of the Osram Sirius HRI 140W RO lamp and optimized optical system pushes with ease through haze and fog. Smooth variable frost filter and any one of the 13 rich colours is instantly ready to create a smooth instantly ready to create smooth even wash, extending the feature set of this petite but powerful Beam, Wash and Effect fixture.

Features

- Bright parallel beams
- DFE™ – Dynamic Flower Effect
- Life time: 6.000 hours
- Smooth variable frost filter
- 13 rich colours

MOVING LIGHTS

Take your bar, club and retail promotions to the next level with the futuristic Robe ProMotion™ moving head effects and video projector. Compact, stylish yet fast moving, this projector produces 5000 ANSI Lumens of creative output with its long-lasting LED source. With RGB and CMY colour mixing capability; digital gobos and graphic effects images and videos; dynamic range of in-built effects, the only limit is your creativity.

The ability to upload custom artwork, photographs and videos is enhanced by the live streaming input facility from external high definition multimedia interfaces. With keystone, iris and motorised focus, you have total control of your visual creations.

Product is supplied with two sets of base covers. First set is suitable for stage application, while the second set is hiding control display and cables at the back of the base and therefore is aimed for retail and installation market.

ProMotion™ can be optionally equipped by ADM™ Automatic Distance Meter to keep projection absolutely sharp and focused without any user settings.

Features

- High Power LED Source
- Full HD Resolution
- Easy Content Management
- Digital Gobo & Effect Wheels
- Embedded Micro-Media Server
- Easy to Control-only 25 DMX Channels

ForTE means Excellence, Speciality, Strength. Our FORTE™ certainly lives up to its name! With a choice of premium performance engines from our revolutionary TRANSFERABLE ENGINE technology, giving you the ability to maintain light quality, combined with a fixture packed full of specialist innovation, you have the luminaire ready to lead you into the future.

You can now choose between the TE™ 1.000W HP White LED Engine (HP – High Performance), producing the highest output possible, or the TE™ 1.000W HCF White LED Engine (HCF – High Colour Fidelity) for those requiring exception colour quality. Now you can fit either engine within the same fixture, without alignment or warranty issues, within five minutes! Without the expense, and complication of needing separate luminaires with differing sources, TRANSFERABLE ENGINES give you the right engine, in the right fixture, at the right time!

The revolutionary self-referencing, data capturing engines are all designed, developed and manufactured within our own factory (Patents pending). Performance has not been compromised, with the TE™ 1.000W HP White 6.700K LED Engine producing a piercing 50.000 lm and the TE™ 1.000W HCF White 6.000K LED Engine 30.000 lm with its exceptionally high inherent CRI of 95. The L70/B50 ratings of 50.000 hours, means longevity is assured.

Harnessing the strength of the self-referencing, data capturing TRANSFERABLE ENGINES, FORTE™ has wide ranging 5 - 55 degree zoom capability to fulfil all your spot, wash and beam applications, contained within its class-leading sub 40 kg frame. Usual output loss at the narrow zoom setting is taken care of via our ingenious Robe Patent pending narrow zoom output boost, improving performance by over 15 %, giving you a dramatically increased output, perfect for sabre like beams.

Robe's new, cutting-edge, CMY colour mixing system provides beautifully smooth colour transitions. Combined with two colour wheels, CRI 80 and 90 filters (HP Engine), and a variable CTO from 3.000 – 6.700K gives FORTE™ total colour finesse.

The comprehensive, dynamic effects package includes; two fully indexable, rotatable gobo wheels each with 6 gobos using the fast

change Robe slot and lock system; two stackable 6-facet prisms, one linear, one round; animation wheel and an ultra-fast motorized iris. The two rapid insert interchangeable frosts, a soft 1° and a medium 5° for silky smooth washes cover the entire zoom range of 5-55 degrees with no restricted range cut off.

FORTE™ gives you total control via our ultra-precise patented framing shutter system, with separate blade control and the entire assembly capable of +- 60° rotation; Cpulse™ PWM control and direct Plus/Minus Green control for broadcast precision; EMS™ (Electronic Motion Stabiliser) technology, for instant stop and hysteresis elimination, making FORTE™ the ideal fixture for RoboSpot™; L3™ (Low Light Linearity) dimming producing imperceptible fades to black.

FORTE™ possesses a comprehensive protocol suite; USITT DMX 512, RDM, ArtNet, MA Net, MA Net 2, and sACN. REAP™ (Robe Ethernet Access Portal) is included for direct communication over Ethernet networks. DMX Wireless control is available on request. All this allows seamless integration into all control networks.

Features

- TE™ 1.000W HP / HCF White LED Engine
- EMS™ - Electronic Motion Stabiliser
- MagFrost™ - magnetic paddle fast change system
- L3™ - Low Light Linearity
- Cpulse™ - Flicker-free Management
- Patented Plano4™ Framing Shutters Module
- AirLOC™ - Less Optical Cleaning

ForTE means Excellence, Speciality, Strength. Our FORTE™ certainly lives up to its name! With a choice of premium performance engines from our revolutionary TRANSFERABLE ENGINE technology, giving you the ability to maintain light quality, combined with a fixture packed full of specialist innovation, you have the luminaire ready to lead you into the future.

You can now choose between the TE™ 1.000W HP White LED Engine (HP – High Performance), producing the highest output possible, or the TE™ 1.000W HCF White LED Engine (HCF – High Colour Fidelity) for those requiring exception colour quality. Now you can fit either engine within the same fixture, without alignment or warranty issues, within five minutes! Without the expense, and complication of needing separate luminaires with differing sources, TRANSFERABLE ENGINES give you the right engine, in the right fixture, at the right time!

The revolutionary self-referencing, data capturing engines are all designed, developed and manufactured within our own factory (Patents pending). Performance has not been compromised, with the TE™ 1.000W HP White 6.700K LED Engine producing a piercing 50.000 lm and the TE™ 1.000W HCF White 6.000K LED Engine 30.000 lm with its exceptionally high inherent CRI of 95. The L70/B50 ratings of 50.000 hours, means longevity is assured.

Harnessing the strength of the self-referencing, data capturing TRANSFERABLE ENGINES, FORTE™ has wide ranging 5 - 55 degree zoom capability to fulfil all your spot, wash and beam applications, contained within its class-leading sub 40 kg frame. Usual output loss at the narrow zoom setting is taken care of via our ingenious Robe Patent pending narrow zoom output boost, improving performance by over 15 %, giving you a dramatically increased output, perfect for sabre like beams.

Robe's new, cutting-edge, CMY colour mixing system provides beautifully smooth colour transitions. Combined with two colour wheels, CRI 80 and 90 filters (HP Engine), and a variable CTO from 3.000 – 6.700K gives FORTE™ total colour finesse.

The comprehensive, dynamic effects package includes; two fully indexable, rotatable gobo wheels each with 6 gobos using the fast change Robe slot and lock system; two stackable 6-facet prisms, one linear, one round; animation wheel and an ultra-fast motorized iris. The two rapid insert interchangeable frosts, a soft 1° and a medium 5° for silky smooth washes cover the entire zoom range of 5-55 degrees with no restricted range cut off.

FORTE™ gives you total control via our ultra-precise patented framing shutter system, with separate blade control and the entire assembly capable of +- 60° rotation; Cpulse™ PWM control and direct Plus/Minus Green control for broadcast precision; EMS™ (Electronic Motion Stabiliser) technology, for instant stop and hysteresis elimination, making FORTE™ the ideal fixture for RoboSpot™; L3™ (Low Light Linearity) dimming producing imperceptible fades to black.

FORTE™ possesses a comprehensive protocol suite; USITT DMX 512, RDM, ArtNet, MA Net, MA Net 2, and sACN. REAP™ (Robe Ethernet Access Portal) is included for direct communication over Ethernet networks. DMX Wireless control is available on request. All this allows seamless integration into all control networks.

The FORTE™ FS is equipped with the digital camera on the head and can be connected with the RoboSpot™ BaseStation for off-stage follow spot operation.

Features

- TE™ 1.000W HP / HCF White LED Engine

■ MagFrost™ - magnetic paddle fast change system

■ Patented Plano4™ Framing Shutters Module
- EMS™ - Electronic Motion Stabiliser

■ L3™ - Low Light Linearity

■ Cpulse™ - Flicker-free Management

■ AirLOC™ - Less Optical Cleaning

Colour Wheel 1:	5 fixed dichroic colours+ white
Colour Wheel 2:	5 fixed dichroic colours + white
Framing shutters:	Patented Plano4™ framing shutters module with 4 individually positionable blades plus rotation of the complete frame system + - 60°
Rotating gobo wheel 1:	6 rotating, indexable and replaceable breakup and aerial gobos + open, patented slot & lock system
Rotating gobo wheel 2:	6 rotating, indexable and replaceable breakup and aerial gobos + open, patented slot & lock system
Animation wheel:	Aluminium animation wheel, used alone or in combination with gobos, rotating in both directions at variable speed
Prism 1:	Independent 6-facet linear prism rotating in both directions at variable speed
Prism 2:	Independent 6-facet circular prism rotating in both directions at variable speed
Frosts:	MagFrost™ - magnetic paddle fast change system providing exchangeable frosts containing as standard a very light 1° for instant softening of the projected gobo or framing shutters, and a medium 5° for even wash, both specifically selected for theatre and TV use
Hot-Spot:	From flat field to 6:1 hot-spot (optional)
Iris:	Motorized, stepless, pulse effects up to 3 Hz
Motorized zoom and focus	
Electronic strobe effect with variable speed up to 20 Hz, pre-programmed random strobe & pulse effects	
High resolution electronic dimming:	0-100%
L3™ - (Low Light Linearity) Imperceptible 18 bit dimming for ultra smooth fade to black	
Extremely quiet operation suitable for all types of production in Theatre and TV	
Cpulse™ special flicker-free management for HD and UHD cameras, ready for 8K and 16K	
AirLOC™ (Less Optical Cleaning) technology greatly reduces the level of airborne particles drawn over the optical elements. This increases the overall performance, light quality and time between routine cleaning and maintenance.

Robe, the recognised leader in moving light technology, has made another major leap in innovation. The new ESPRITE™ Profile LED automated luminaire has a fast-change, low-cost, transferable light engine ingeniously solving the problem of performance longevity for those preferring the higher brightness of white source LEDs as an obvious replacement for their aging stock of discharge workhorses. With our unique, ground-breaking TRANSFERABLE ENGINE technology, you have a choice of engines. The TE™ 650W HP White LED Engine (HP – High Performance), producing the highest output possible, or the TE™ 650W HCF White LED Engine (HCF - High Colour Fidelity) for those requiring exceptional colour quality. Now you can fit either engine within the same fixture, without alignment or warranty issues, within five minutes! Without the expense, and complication of needing to have separate luminaires with differing sources, TRANSFERABLE ENGINES give you the right engine, in the right fixture, at the right time!

The revolutionary self-referencing, data capturing engines are all designed, developed and manufactured within our own factory (Patents pending). Performance has not been compromised, with the TE™ 650W HP White 6.700K LED Engine producing a piercing 34.000 lm and the TE™ 650W HCF White 6.000K LED Engine 22.000 lm with its exceptionally high inherent CRI of 94. The L70/B50 ratings of 50.000 hours, means longevity is assured.

This is enhanced by our legendary precision optics to produce crystal clear white light. The comprehensive feature set includes: Flat field CMY mixing; variable CTO; remotely selectable CRI 70/80/90 (HP Engine); two fast colour wheels; rotating and static gobo wheels; 6-facet rotating prism; 1° soft edge and 5° even wash frosts; an animation wheel and spectacular multi-colour effects. Quick, accurate, easy framing is provided via our patented fast framing shutter module with individual blade control and +/-60° rotation capability for extra fine control. The ESPRITE™ Profile by design removes any airflow over the optics, resulting in reduced residue deposits thus extending periods between cleaning.

Rotating gobo wheel 1

Rotating gobo wheel 2

Furthermore, the unique Hot-Spot feature allows you to move from a flat field beam to a 6:1 ratio hot-spot beam giving uniform intensity when overlaying beam edges to create smooth washes of light. The Cpulse™ flicker-free management system operates beautifully with the latest HD and UHD camera systems, and our L3™ Low Light Linearity dimming for ultra-smooth fade to black for seamless integration into traditional lighting rigs.

Features

- TE™ 650W HP White LED Engine
- Brightness up to 27.000 lm
- Variable CCT 3.000 – 6.700K
- CRI 70/80/90
- Framing shutters
- Cpulse™ - flicker-free Management

The revolutionary self-referencing, data capturing engines are all designed, developed and manufactured within our own factory (Patents pending). Performance has not been compromised, with the TE™ 650W HP White 6.700K LED Engine producing a piercing 34.000 lm and the TE™ 650W HCF White 6.000K LED Engine 22.000 lm with its exceptionally high inherent CRI of 94. The L70/B50 ratings of 50.000 hours, means longevity is assured.

This is enhanced by our legendary precision optics to produce crystal clear white light, ideal for Follow Spot applications. The comprehensive feature set is all available on the FS version and includes: Flat field CMY mixing; variable CTO; remotely selectable CRI 70/80/90 (HP Engine); two fast colour wheels; one indexable and rotatable gobo wheel; a fixed gobo wheel CTO filters; 6-facet rotating prism; 1° soft edge and 5° wash type frosts; an animation wheel and spectacular multi-colour effects. Quick, accurate, easy framing is provided, if required, via our patented fast framing shutter module with individual blade control and +/-60° rotation capability for extra fine control. ESPRITE Profile by design removes any airflow over the optics, resulting in reduced residue deposits thus extending periods between cleaning.

By including Cpulse™ flicker-free management system for the latest cameras, and our L3™ Low Light Linearity dimming for ultra-smooth fade to black for seamless integration into traditional lighting rigs, you have a feature rich, very high output, long lasting, future proof package ideal for Follow Spot applications in a compact 29.4 kg housing.

Features

- TE™ 650W HP White LED Engine

Colour Wheel 1:	5 fixed dichroic colours + white
Colour Wheel 2:	5 fixed dichroic colours + white
Patented Plano4™ framing shutters module with 4 individually positionable blades plus rotation of the complete frame system + - 60°	
Rotating gobo wheel:	7 rotating, indexable and replaceable breakup and aerial gobos + open, patented slot & lock system
Static gobo wheel:	9 static and replaceable gobos + open
Animation wheel:	Aluminium animation wheel, used alone or in combination with gobos, rotating in both directions at variable speed
Prism:	6-facet prism rotating in both directions at variable speed
Iris:	Motorized, stepless, pulse effects up to 3 Hz

Frosts: MagFrost™ - magnetic paddle fast change system providing exchangeable frosts containing as standard a very light 1° for instant softening of the projected gobo or framing shutters, and a medium 5° for even wash, both specifically selected for theatre and TV use

Hot-Spot:	from flat field to 6:1 hot-spot (optional)
Motorized zoom and focus	
Electronic strobe effect with variable speed up to 20 Hz	
High resolution electronic dimming:	0–100 %
L3™ - (Low Light Linearity) Imperceptible 18 bit dimming for ultra smoot	fade to black

Cpulse™ special flicker-free management for HD and UHD cameras, ready for 8K and 16K

AirLOC™ (Less Optical Cleaning) technology greatly reduces the level of airborne particles drawn over the optical elements. This increases the overall performance, light quality and time between routine cleaning and maintenance.

CONTROL AND PROGRAMMING

Setting & Addressing:	ROBE Navigation System 2 (RNS2)
Display:	QVGA Robe touch screen with battery backup, gravitation sensor for auto screen positioning, operation memory service log with RTC, stand-alone operation with 3 editable programs (each up to 100 steps), built-in analyser for easy fault finding

ESPRITE™ Fresnel is for those demanding a classic Fresnel beam whilst enjoying the many advantages of our TE™ Transferable Engines. With this unique, ground-breaking technology, you have a choice of engines.

The TE™ 650W HP White LED Engine (HP – High Performance), producing the highest output possible, or the TE™ 650W HCF White LED Engine (HCR – High Colour Fidelity) for those requiring exceptional colour quality. Now you can fit either engine within the same fixture, without alignment or warranty issues, within five minutes! Without the expense, and complication of needing to have separate luminaires with differing sources, TRANSFERABLE ENGINES give you the right engine, in the right fixture, at the right time!

The revolutionary self-referencing, data capturing engines are all designed, developed and manufactured within our own factory (Patents pending). Performance has not been compromised, with the TE™ 650W HP White 6.700K LED Engine producing a piercing 34.500 lm and the TE™ 650W HCF White 6.000K LED Engine 21.000 lm with its exceptionally high inherent CRI of 94. The L70/B50 ratings of 50.000 hours, means longevity is assured.

The comprehensive feature set includes: Flat field CMY mixing; variable CTO; remotely selectable CRI 70/80/90 (HP Engine); two fast colour wheels; medium and light frosts; Scrim with graduated filter position control with +/- 180° rotation and edge colour correction for added finesse.

A quick, accurate internal barndoor provides individual blade control and +/- 90° module rotation, whilst a wide zoom range of 6 - 61° ensures maximum flexibility.

Furthermore, these fixtures are enhanced by Cpulse™, the flicker-free management system for the latest cameras; EMS™ for enhanced motion stability and L3™ Low Light Linearity dimming, for ultra-smooth fade to black allowing seamless integration with traditional lighting rigs.

Features

- TE™ 650W HP White LED Engine

CUETE™ by name, cute by nature, this spot delivers the perfect compact, quality solution for smaller performance spaces or installations.

Delivering outstandingly fast pan and tilt movement, so beloved by EDM, DJ's and clubs, with dynamic effects, projections, and enhanced by its superior CMY colour mixing system, CUETE™ punches way above its weight, with an impressive 4.200 lumens of sparkling, clear, white light.

To achieve this output and easily maintain light quality and consistency across your inventory, CUETE™ utilises the TE™ 120W White LED Engine from our patented ground-breaking TRANSFERABLE ENGINE technology.

The fixed beam 16-degree lens has remote control focus and can be changed to the optional 24-degree lenses for shorter throw and low ceiling scenarios.

Within its small frame, CUETE™ is packed with Robe innovation. These include CPulse™ flicker-free management system for HD and UHD cameras; L3™ Low Light Linearity dimming software for imperceptible fades to black; AirLOC™ (Less Optical Cleaning) technology keeping the optical elements in pristine condition for far longer.

The dynamic effects package includes a Colour wheel with 13 dichroic filters; Gobo wheel with 9 fully indexable, rotating, replaceable gobos; Static gobo wheel with 6 fixed gobos and 4 beam reducers; 8 facet bi-directional rotating prism and a 5-degree frost for silky smooth washes.

The combination of speed, features, and small footprint makes our CUETE™ the perfect spot partner to the LEDBeam 350™. Step up to CUETE™ colours!

Rotating gobo wheel

When you demand quality, with absolutely no compromise, in a compact spot then SPOTE™ fits the bill! Fun, fast and feature packed, SPOTE™ is ideal for your club, bar or corporate event.

Designed for dynamic effects and projections, within its compact body, SPOTE™ produces an impressive 2.700 lumens of sparkling, clear, white light. To easily maintain light quality and consistency across your inventory, SPOTE™ utilises the TE™ 70W White LED engine, from our ground-breaking Transferable Engine technology.

The fixed beam 16-degree lens has remote control focus and can be changed to the optional 24-degree lens for shorter throw and low ceiling scenarios. The dynamic effects package includes a Colour wheel with 13 dichroic filters; Gobo wheel with 9 fully indexable, rotating, replaceable gobos; 8-facet bi-directional rotating prism and a 5-degree frost for silky smooth washes.

Features

- 70W White TE™ LED Engine
- Fixed 16° Beam Angle
- Rotating Gobo & Colour Wheels
- 2.700 lm Fixture Total Lumen Output
- Super-fast Pan & Tilt Movement
- Lightweight Body only 11 kg

T2. Taking Multispectral perfection even further!

While simultaneously maintaining the absolute colour finesse of Robe's phenomenally successful T1 series, featuring the MSL™ (Multi-Spectral) LED engine, our T2 Profile™ provides an enhanced output of more than 17.500 lumens, measured at the front lens, via its 850W MSL™ source, to throw their beautiful light even further than before. With a zoom range of 5–55°, T2 Profile™ is ideally suited to its longer-throw role in theatre, television, and touring.

T2 Profile™ is again full of theatrical subtlety. With CMY colour control, DataSwatch™ filters containing a selection of pre-programmed colours via our renowned RCC™ (Robe Colour Calibration) algorithm and a wide-ranging 2.700K to 8.000K CCT control, all variations of colour are possible. With absolutely no difference in colour produced by T1 and T2 platforms, you can use them together with confidence to provide consistent colour across your lighting rig, perfect for even the most demanding designers.

The precise needs of theatrical dimming are catered for with our super-smooth L3™ dimming system producing imperceptible fades to black. The high CRI of 95+ assures natural rendition of all skin tones. Specifically, for television work, we have included a plus and minus green channel and the Cpulse™ flicker-free management system for all vision systems including HD and UHD cameras, all controllable directly from your console. All this combined with our acclaimed four plane shuttering system, two rotating gobo wheels, an animation wheel, two rotating prisms, changeable 1° and 5° variable frosts with full zoom range coverage, gives you total control over your designs.

Designed to operate in noise-sensitive environments such as television studios, theatres, and houses of worship, T2 utilises our innovative AirLOC™ system. Meaning "Less Optical Cleaning," this technology not only aids noise reduction but also dramatically reduces the level of airborne particles drawn over the optics, keeping them in pristine condition for far longer.

Tilt movement: 270°
Movement control: Standard and Speed
Automatic Pan/Tilt position correction
EMS™: Electronic Motion Stabilizer system for Pan & Tilt reducing beam deviation caused by truss movement or vibration (Patented)

STATIC GOBOS

8x static glass gobos
Outside diameter: 30.8 mm
Image diameter: 25 mm
Thickness: 1.1 mm

Max. thickness: 3.5 mm
High temperature borofloat or better glass
Slot & lock system for easy replacement of gobos

ROTATING GOBOS

6x rotating glass gobos
Outside diameter: 30.8 mm
Image diameter: 25 mm
Thickness: 1.1 mm
Max. thickness: 3.5 mm
High temperature borofloat or better glass
Slot & lock system for easy replacement of gobos

EFFECT WHEEL

Single animation wheel
Material: Aluminium
Diameter: 121 mm
Can be used alone or in combination with rotating gobos
Rotating in both directions at variable speed

FRAMING SHUTTERS SYSTEM

Shutters: 4 Blades, each with separate movement and rotation control
Movement: smooth with variable speed
Smooth and very precise motion of framing shutters
Rotation: +- 60° of the complete framing system

CAMERA

Type: SNZ-6320
Resolution: 1920 x 1080, 16:9 Full HD (1080p) resolution support
Zoom: 32x optical zoom
16x digital zoom
Streaming: H.264, MPEG dual codec, Multiple streaming
Vision: Day & Night (ICR), WDR (120dB)
Minimum illumination: 0.3 Lux

THERMAL SPECIFICATION

Maximum ambient temperature: 45 °C (113 °F)
Maximum surface temperature: 70 °C (158 °F)
Minimum operating temperature: -5 °C (23 °F)

T2. Multispectral perfection, only further!
While simultaneously maintaining the absolute colour finesse of Robe's phenomenally successful T1 series, featuring the MSL™ (Multi-Spectral) LED engine, our T2 Fresnel™ provides an enhanced output of more than 16.250 lumens from its 850W MSL™ source.
With their zoom range of 7-62°, and classically soft beam, T2 Fresnels are ideally suited to their long-throw role in theatre, television, and touring.

T2 Fresnels are full of theatrical subtlety. With CMY colour control, DataSwatch™ filters containing a selection of pre-programmed colours via our renowned RCC™ (Robe Colour Calibration) algorithm and a wide-ranging 2.700K to 8.000K CCT control, all variations of colour are possible. With absolutely no variation in colour produced by T1 and T2 platforms, you can use them together with confidence to provide consistent colour across your lighting rig, perfect for even the most demanding designers.

The precise needs of theatrical dimming are catered for with our super-smooth L3™ dimming system producing imperceptible fades to black. The exceptionally high CRI of 95+ assures natural rendition of all skin tones.

Specifically, for television work, we have included a plus and minus green channel and the Cpulse™ flicker-free management system for all vision systems including HD and UHD cameras, all controllable directly from your console.

Designed to operate in noise-sensitive environments such as television studios, theatres, and houses of worship, T2 Fresnels utilise our innovative AirLOC™ system. Meaning "Less Optical Cleaning," this technology not only aids noise reduction but also dramatically reduces the level of airborne particles drawn over the optics, keeping them in pristine condition for far longer.

All this combined with our highly acclaimed internal four individually controlled leaf barndoor system, rotational scrim control, two interchangeable frosts and ground-breaking edge control technology, gives you total control over your designs in theatre, television, and touring.

T2 – the next step.

MOVING LIGHTS

The new ONE and only fixture you need for theatre, television and touring and now with the option to be connected to the Robe innovative RoboSpot system.

Specifically designed to fulfil the challenging requirements of these diverse applications within one comprehensive fixture. The new revolutionary MSL™ (Multi-Spectral Light) LED engine's output reaches 10.075 lumens. It's impressively bright. T1 Profile is full of theatrical subtlety. With CMY colour control, DataSwatch™ filters containing a selection of pre-programmed colours via the new generation RCC™ (Robe Colour Calibration) algorithm and a wide ranging 2.700K to 8.000K CCT control, all variations of colour are possible for even the most demanding designers. The precise needs of theatrical dimming are catered to with our super smooth Robe 18-bit dimming system. In addition, the high CRI of 95+ provides natural skin tones.

For television work, we have included a plus and minus green channel and Cpulse™ special flicker-free management for all vision systems such as HD and UHD cameras. All this combined with our crisp framing shutter system, full zoom range of 0.5° and 10° variable frosts, specially designed breakup and aerial gobos, animation wheel and prism, gives you total control of your designs in theatre, television and touring. You need only ONE. T1.

Rotating gobo wheel

T1. The new ONE and only fixture you need for theatre, television and touring and now with the option to be connected to the Robe innovative RoboSpot system.

The T1 Profile FollowSpot is equipped with the digital camera on the head and can be connected with the RoboSpot BaseStation for off-stage follow spot operation.

Specifically designed to fulfil the challenging requirements of these diverse applications within one comprehensive fixture. The new revolutionary MSL™ (Multi-Spectral Light) LED engine's output reaches 10.075 lumens. It's impressively bright.

T1 Profile is full of theatrical subtlety. With CMY colour control, DataSwatch™ filters containing a selection of pre-programmed colours via the new generation RCC™ (Robe Colour Calibration) algorithm and a wide ranging 2700K to 8000K CCT control, all variations of colour are possible for even the most demanding designers.

The precise needs of theatrical dimming are catered to with our super smooth Robe 18-bit dimming system. In addition, the high CRI of 95+ provides natural skin tones.

For television work, we have included a plus and minus green channel and Cpulse™ special flicker-free management for all vision systems such as HD and UHD cameras. All this combined with our crisp framing shutter system, full zoom range of 0.5° and 10° variable frosts, specially designed breakup and aerial gobos, animation wheel and prism, gives you total control of your designs in theatre, television and touring.

You need only ONE. T1.

Features

- MSL™ 550 W Multi-Spectral LED engine
- DataSwatch™ - Fast selection of colours & tones
- RCC™ - Robe Colour Calibration system
- Variable CCT 2.700 – 8.000K
- CMY Colour Mixing
- Cpulse™ flicker-free management

Specifications

SOURCE

Light source type:	MSL™ 550 W Multi-Spectral LED engine (Patented)
LED life expectancy:	min. 30.000 hours
Colour rendition:	CRI: 95, CRI R9: 91, TM30-18 Rf: 93, TM30-18 Rg: 103, TLCI: 94
Control:	Automatic and remote on/off
Light source warranty:	3 years or 20.000 hours

OPTICAL SYSTEM

Robe's proprietary optical design	
High-efficiency zoom optical system, ratio 7:1	
Zoom range:	7°–49°, covers favoured field angles of most Theatre and TV lights
Fixture total lumen output:	10.075 lm

DYNAMIC EFFECTS AND FEATURES

Factory calibrated whites and colours via the new RCC™ (Robe Colour Calibration) system, automatic or on-call self-re-calibration of the LED engine without the use of any external tool (Patented)	
Colour mixing:	CMY/RGB or RGBAL
White light:	Variable CCT 2.700 – 8.000K
DataSwatch™ filters:	pre-programmed 237 colours and tones including most used whites 2.700K, 3.200K, 4.200K, 5.600K and 8.000K
Tungsten lamp effect:	750W, 1.000W, 1.200W, 2.000W, 2.500W lamp emulation for whites from 2.700K to 4200K (red shift and thermal delay)
+ - Green correction function	
Adjustable CRI from 80 to 95+	
Framing shutters:	Patented Plano4™ framing shutters module with 4 individually positionable blades plus rotation of the complete frame system + - 60°
Rotating gobo wheel:	7 rotating, indexable and replaceable breakup and aerial gobos + open, all gobos specially selected for theatrical and TV productions
Animation wheel:	Aluminium animation wheel, used alone or in combination with gobos, rotating in both directions at variable speed
Prism:	6-facet 8° prism rotating in both directions at variable speed
Iris:	Motorized, stepless, pulse effects up to 3 Hz
Frosts:	MagFrost™ - magnetic paddle fast change system providing exchangeable frosts containing as standard a very light 0.5° for instant softening of the projected gobo or framing shutters, and a medium 10° for even wash, both specifically selected for theatre and TV use
Hot-Spot: from flat field to 6:1 hot-spot	
Motorized zoom and focus	
Electronic strobe effect with variable speed up to 20 Hz	
Pre-programmed random strobe & pulse effects	
L3™ - (Low Light Linearity) Imperceptible 18 bit dimming for ultra smooth fade to black	
Extremely quiet operation suitable for all types of production in Theatre and TV	
Cpulse™ special flicker-free management for HD and UHD cameras	
AirLOC™ (Less Optical Cleaning) technology greatly reduces the level of airborne particles drawn over the optical elements. This increases the overall performance, light quality and time between routine cleaning and maintenance.	

CONTROL AND PROGRAMING

Setting & Addressing:	ROBE Navigation System 2 (RNS2)
-----------------------	---------------------------------

Display: QVGA Robe touch screen with battery backup, gravitation sensor for auto screen positioning, operation memory service log with RTC, stand- alone operation with 3 editable programs (each up to 100 steps), built-in analyser for easy fault finding	
Protocols:	USITT DMX-512, RDM, ArtNet, MA Net, MA Net2, SACN
REAP™ - Robe Ethernet Access Portal	
Wireless CRMX™ technology from Lumen Radio:	On request
Epass™: Ethernet pass through switch which sustains Ethernet integri- rity, when the fixture has no power, to automatically maintain network connectivity	
DMX Protocol modes:	3
Control channels:	49, 33, 53
Pan/Tilt resolution:	16 bit
Colour mixing:	8 or 16 bit (internal 18 bit)
Variable CCT:	8 bit
Adjustable CRI:	8 bit
+ - Green correction:	8 bit
Framing shutters module movement & rotation:	8 bit
Rotating gobo wheel positioning:	8 bit
Gobo indexing & rotation:	8 or 16 bit
Animation wheel:	8 bit
Prism indexing & rotation:	8 bit
Iris:	8 or 16 bit
Frost:	8 bit
Zoom:	8 or 16 bit
Focus:	8 or 16 bit
Dimmer:	8 or 16 bit (internal 18 bit)
MOVEMENT	
Pan movement:	540°
Tilt movement:	265°
Movement control:	Standard and Speed
Automatic Pan/Tilt position correction	
EMS™: Electronic Motion Stabilizer system for Pan & Tilt reducing beam deviation caused by truss movement or vibration (Patented)	
ROTATING GOBOS	
7 x rotating glass gobos	
Image diameter:	23.5 mm
Outside diameter:	26.8 mm
Thickness:	1.1 mm
Max. Thickness:	4 mm
High temperature borofloat or better glass	
Slot & lock system for easy replacement of gobos	
EFFECT WHEEL	
Single animation wheel	
Material:	Aluminium
Can be used alone or in combination with rotating gobos	
Rotating in both directions at variable speed	
FRAMING SHUTTERS SYSTEM	
Shutters:	4 Blades, each with separate movement and rotation control
Movement:	Smooth with variable speed
Smooth and very precise motion of framing shutters	
Rotation:	+ - 60° of the complete Framing system
CAMERA	
Type:	SNZ-6320
Resolution:	1920 x 1080, 16:9 Full HD (1080p) resolution support
Zoom:	32x optical zoom 16x digital zoom
Streaming:	H.264, MPEG dual codec, Multiple streaming

The DL7S Profile is the first DL range fixture to receive a powerful new 800W version of the LED engine with seven colours for unprecedented smooth, stable and even colour mixing and a very high CRI.

From the deepest to the lightest colours the DL7S provides a rich full colour spectrum experience, and features custom colour mixing and dimming and seamless operation especially at the minimum brightness levels. Four fast framing shutters within the optical path are individually controllable for position and angle and the entire framing module can be rotated. Crisp and soft frames can be used on projections, and a new series of effects is possible using a selection of preprogrammed shutter blade shape and movement sequences. One rotating gobo wheel with six slot & lock gobo positions plus a static gobo wheel with 8 static gobos can be combined with the Animation wheel. Other effects and features include variable frost, rotating prism and super-fast iris. As with all the DL luminaire range, the multiple LED lightsource is completely homogenised.

Features

- Bright 7-colour LED engine
- CRI: 90
- Zoom: 7°–43°
- Fast pan/tilt with EMS™
- Extra smooth high resolution (internal 18 bit) dimming and colour mixing
- Fast and precise framing shutter module
- Rotating & Static gobo wheels
- Animation effects wheel

Product on Request

Let the colours shine and enjoy the feeling of the gorgeous spectrum of stable high CRI chromatics. Adjust seven colours, individually, to give unprecedented smooth, stable and even colour mixing and a very high CRI of 90 to meet the high standards of your applications. Add or remove green and regulate CTC between 2.700 to 8.000 kelvins via dedicated control channels.

Traditional fresnel front lens of the DL7F Wash ensures a classic look and homogenized conventional beam with high resolution smooth dimmer. The 200 mm diameter fresnel lens is easily interchangeable for optional PC lens. New innovative internal Scrim module of graduated filter can be inserted into the light path and allows rotation of the whole assembly +/- 180° to achieve even wash coverage when projecting onto a non-perpendicular surface. Mechanical features include a newly designed linear motorized zoom of 7°–65° and an interchangeable diffusion filter. The fixture uses an internal barndoor module for creating different shapes. The barndoor module consists of four individually controllable blades and is rotatable by +/- 90°.

Features

- Full spectrum LED light source
- Beam shaper module Internal scrim
- Zoom: 8°–85° Fresnel
- Extra smooth high resolution (internal 18 bit) dimming and colour mixing
- 7°–62,5° PC
- CRI: 90
- Fast pan/tilt with EMS™

DL7F Beam Shaping module

Product on Request

Improved, brighter version of the ROBE RGBW LED module allows the DL4X Spot fixture to utilize the specifically modified color mixing and dimming for extra smooth, stepless operation especially at minimum brightness levels while giving colour outputs brighter than a 1.200 Watt discharge unit, but with an average very eco-friendly power consumption of only 250 Watts. To magnify the already perfectly smooth colours, fades and dimming, the DL4X features innovative LED driving system for improved, extremely high definition dimming curve for all R, G, B, W colours, with 18 bit resolution. The optical system produces a very smooth, high quality light output of rich, beautiful colours with no shadows and utilizes a versatile zoom of 10–45 degrees. Effects features consist of a combination of static and rotating gobo wheels that have custom replaceable positions, variable frost, three-faceted prism, superfast iris and more... including full range dimming and variable strobe effects.

Features

- RGBW LED engine
 - RGBW/CMY colour mixing
 - True whites
 - 1 x Prism, variable frost
- Rotating & Static Gobo Wheel
 - Tungsten lamp effects
 - Zoom: 10°–45°
 - Flat & Even light Beam

Product on Request

This is the perfect companion to the DL4S Profile, the new DL4F Wash is based on the same RGBW LED module with improved brightness and with specifically modified color mixing and dimming for extra smooth, stepless operation especially at minimum brightness levels. To magnify the already perfectly smooth colours, fades and dimming, the DL4F features innovative LED driving system for improved, extremely high definition dimming curve for all R, G, B, W colours, with 18 bit resolution. With a perfectly smooth output via the front Fresnel lens, this fixture has been optimized for those wanting an even light output with no shadows (RGB breakups and shadows are not present even when on closely positioned trussing or other objects.) Mechanical features include a newly designed linear motorized zoom of 5.5° – 60° and a diffusion filter for extension of the zoom up to 75°. The fixture uses a internal Barndoor module for creating different shapes. The module consists of four individually controllable blades and is rotatable by plus or minus 90 degrees. Advanced software features include RGBW or CMY colour mixing, a set of calibrated whites, CTO, Tungsten lamp emulation (amber shift) and more.

Extending the possibilities of the playful, colorful DLS Profile, the new DL4S is equipped with enhanced version of the ROBE RGBW LED module for brighter saturated colours and more powerful output.

To magnify the already perfectly smooth colours, fades and dimming, the DL4S features innovative LED driving system for improved, extremely high definition dimming curve for all R, G, B, W colours, with 18 bit resolution. The DL4S adds a system of 4 fast, smooth, framing shutters within the optical path design of the proven DLS Profile format. There is individual control of each shutter blade position and angle, together with rotation of the complete framing module. As well as providing a sharp precise or soft frame for the projected image, the system produces a new series of effects through pre-programmed shutter blade shape and movement sequences. As with all models in the Robe DL luminaire range, the multiple shadows normally associated with an LED source have been eliminated. The enhanced Robe RGBW LED light source reproduces both rich and pastel colours at output levels normally associated with 1 200 W discharge fixtures as well as pure whites at preselected 2 700, 3 200, 4 200, 5 600 and 8 000 kelvin colour temperatures. The tungsten emulation function allows the fixture to be integrated seamlessly into lighting schemes with existing traditional lanterns.

Features

- LED light source module
- RGBW/CMY colour mixing
- True whites
- Tungsten lamp effects
- 1 x Gobo Wheel
- Zoom: 10°–45°
- Animation Effects Wheel
- 1 x Prism, variable frost

Controllable speed of Pan/Tilt movement	
Automatic Pan/Tilt position correction	

ROTATING GOBOS

7 x rotating metal gobos	
Image diameter:	22.5 mm

Outside diameter:	26.8 mm
Thickness:	0.15 mm
Slot & lock system for easy replacement of gobos	

EFFECT WHEEL

Single animation wheel	
Material:	Aluminium
Can be used alone or in combination with rotating gobos	
Rotating in both directions, variable speed	

FRAMING SHUTTERS SYSTEM

Shutters:	4 Blades, each with separate movement and rotation control
Movement:	smooth with variable speed
Ultra fast blade movement for creating mid-air effects	
Pre-programmed shape and blade sequences	
+- 45° rotation of the complete Framing system

Bigger, bolder, brighter! Building on the highly successful LEDBeam 150™ the big brother LEDBeam 350™ has arrived, delivering more punch and presence to create even more fast sweeping beams and gorgeous washes.

Maintaining the spectacular 3.8° to 60° zoom range and Robe's innovative lens coating technology, which keeps lenses clearer and scratch-free, we have added more advanced technology. CPulse™, our highly respected Pulse Width Modulation control system, removes any on-screen camera flicker, making LEDBeam 350's eminently suitable for work with the most advanced HD and UHD cameras.

All features, including fast movement, colour mixing, zoom and control from its smaller sister can be maintained via a compatibility mode, meaning seamlessly use both models together with identical behaviour on the same rig. The 12 x 40W RGBW high power multichips provide plenty of output or CMY colour mixing control. DataSwatch™ contains 66 premixed colours and tones, including whites, for fast, reliable colour selection, while our system takes care of imperceptible fades to black. Being exceptionally quiet, due to the advanced cooling system and new super smooth zoom stepper motors, tungsten lamp emulation for lamps 2500W, and a variable CTO from 2.700K to 8.000K, the fixture is ideal for theatrical use.

Features

- 12 x 40W RGBW multichips
- L3™ – Low Light Linearity

The best things come in small packages, now with zoom included. LEDBeam 150 is the answer for with fast sweeping beams and a wide far-reaching quality wash in compact housing. Attractive colorful chases and smooth transitions are powered by a cluster of high power multichip 40W RGBW LEDs. The spectacular zoom range of 3.8° to 60° uses an eminent custom-designed optical system, now equipped with Robe's innovative lens coating technology which brings benefits such as bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning. A highly optimized motorised control produces speedy pan and tilt movement. Besides intense strobing capabilities, the LEDBeam 150 also offers gentle 18-bit dimming, including Tungsten lamp effects. Simplified control via pre-programmed colors on a virtual color wheel and various strobing and pulsing effects allows quick and easy programming.

The enhanced LEDWash 800X brings Robe's patented system for seamless, even and smooth zoom and output of a new generation RGBW multichip LED technology a step further. 30% brighter LED chips and a Robe's patented removable beam shaper module with motorized rotation producing an ovalized beam, which can be precisely positioned on the stage or illuminated object, creates the perfect combination for theatre, TV, car show, exhibition and other professional applications. The fixture has an incredibly wide zoom range starting at 8 degrees and going up to 63 degrees. Many enhanced features include quiet zoom operation, Beam/Wash zoom mode, virtual colour wheel with calibrated whites, RGBW/CMY colour mixing and more. The touch screen navigation display supports many controlling protocols, status data logging, software updates and other features which are standard in the Robe ROBIN series. PowerCON True1 chassis connector has been now added on the back of the fixture's base to guarantee a safe power connection. The powerCON TRUE1 connector can be connected or disconnected under load or live.

Features

- Innovative Beam shaper
- True whites
- Individual control of LED rings
- High Power 15W RGBW LEDs
- Zoom: 8°– 63°
- Flat & Even light beam

The super-slim LEDWash 600X features a new generation of 30% brighter 37 x 15 Watt RGBW multichip LEDs with colour output ranging from gentle pastels to the richest saturation.

Arranged in 3 concentric rings these LEDs offer unique possibilities for creating stunning colour and pattern audience blinding effects as well as for providing comprehensive and perfectly even wash coverage. This system sets the LEDWash 600X ahead of any other LED wash light products, making it a truly, „multi-purpose“ unit, equipped also with Robe’s patented an extremely versatile 8–63 degree motorised zoom, powerful fast strobing and pre-programmed pulse strobe effects.

PowerCON True1 chassis connector has been now added on the back of the fixture’s base to guarantee a safe power connection. The powerCON TRUE1 connector can be connected or disconnected under load or live.

Features

- Perfect colour mixing
- Individual control of LED rings
- True whites
- High Power 15W RGBW LEDs
- Zoom: 8°–63°
- Flat & Even light beam

Utilizing a new generation of 30% brighter 19 x 15W RGBW multichip LEDs and Robe's patented motorized linear zoom 8°– 63°, the LEDWash 300X offers great flexibility with superior homogenization of the light source.

Specialized component optics composed of highly efficient elements ensures completely smooth colour mixing and it emphasizes a dynamic array of true colours and hues. This lightweight compact fixture is ideal for all small-to-medium applications, particularly those where space and accessibility is an issue. PowerCON True1 chassis connector has been now added on the back of the fixture's base to guarantee a safe power connection. The powerCON TRUE1 connector can be connected or disconnected under load or live.

Speed, great colors and beautiful gobos have always been our top priorities. With the SilverScan we celebrate 25 years of ROBE lighting fixtures and their continuing evolution. With super-fast mirror movement, the bright and colorful SilverScan utilizes all the massive improvements technology has made and brings it back to its roots - a small form factor, good-looking performant LED-based scan. The 350W white LED light engine, with a total lumen output up to 9.020 lm, gives an extra punchy beam with even flat field and an incredible 20.000 hours of operation. Smooth color transition and fixed, vivid and radiant colours can be applied from the CMY mixing system and colour wheel, with 7 rotating or 9 static gobos added for projections or mid-air effects. The smooth zoom can go out to 27° at its widest while the minimum 9° zoom produces a piercing beam that can be trimmed with an ultra-fast stepless iris for punchy output.

Features

- Super-fast mirror movement
- Rotating and static gobos
- Low power consumption
- White LED engine
- Zoom: 9°–27°
- CMY color mixing system

Always ready to perform, our IP65 rated iBar 15™ is ideally suited for festivals, concerts and outdoor events, or any scenario needing to deal with inclement or unpredictable weather.

With its 15, equally spaced, super-bright RGBW multichip LEDs for enhanced colour mixing and Robe's exceptionally smooth L3™ dimming software, you have the perfect 1 metre LED bar for indoor or out in washing, grazing or cyc light applications. Flexibility is provided for the fixed 7.5° beam angle via optional diffusers, allowing different beam angles, including two asymmetrical variants, for use as a high-quality cyc light. Optional barndoors can further trim the beam if required. With advanced pixel control, a virtual colour wheel with pre-programmed colours, and a set of true whites with CTO Tungsten lamp emulation, you have all the tools available for exceptional creative control. The practical and highly readable small display provides a menu with personality settings, including DMX and RDM protocols.

iSeries – Robe reliability in all weathers.

Features

- High Power 15W RGBW LEDs
 - Individual pixel control
 - L3™ super smooth 18-bit dimming technology
- Predefined Tungsten whites
 - Even output without Fringing
 - Optional diffusers
 - IP65 Ingress Protection

Power is everything, now in color! Add colour into your blinding strobing sequences with the ColorStrobe to achieve dyed effects, white flashing with colorful backgrounds or continuous bright light output with colored animations.

Ultimately controllable, configurable and arrayable. Super fast bursts of high powered pulses can be adjusted in frequency, duration and intensity, optically harnessed from the 120x High Power RGBW chips. Easy to rig individually or in multiples and easy to program, using direct segment control or the pre-defined macros. Fitted with the standard Robe RNS touch screen system with DMX, RDM, Art-Net, MA Net and sACN protocols. Optional wireless DMX module.

Features

- Strobe, Wash, Audience Blinder, FX – All in one fixture
- Bright powerful RGBW LEDs
- Highly adjustable super fast strobing
- Individually controllable LED zones
- Extra smooth high res. dimming
- Multipoint segment locking system
- Continuous full power operation

A powerful single source LED luminaire designed specifically to provide the highest quality of light.

Available in different colour temperatures to suit the application – a crisp 5.700K white for exhibition/display or a warm 2.700K for stage performance. High resolution DMX dimming and a native 23° output, make it universally appealing. Designed and built entirely at our Czech facility in a lightweight composite material finished in either black or white. Supplied complete with gel frame, detachable barn door set and swivel floor stand/hanging bracket. Very competitively priced and offered with a full compliment of additional cost options including: beam diffusers and plug-in wireless DMX module.

Features

- Bright white output

■ High CRI (>80)

■ 2.700 K or 6.000K white light
- High resolution dimming

■ Made in Europe

■ Combined Hanging Bracket/floor stand

An LED source ACL beam at an affordable price made in Europe, now with zoom included.

ParFect 150 RGBW is a static, zoomable version of the successful LEDBeam 100 and retains all the key features including both CMY & RGBW colour control, 18-bit dimming, Tungsten emulation, selectable & variable colour temperatures and the powerful punchy beam ranging from 3.8° to 60°.

The compact and lightweight moulded composite unit includes a combined hanging bracket/floor stand. Accessories such as barn-doors and the gel frame give ParFect 150 RGBW the features required for TV and theatre.

Now equipped with Robe's innovative lens coating technology which brings benefits such as bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning.

Features

- Perfect colour mixing
 - 7 x 40W RGBW multichips
 - Combined Hanging Bracket-floor stand

Professional luminaire in affordable package made in Europe.
ParFect 150 FW is a static fixture with a fresnel wash type of light output. The edge of the beam is smoothly diffused at any beam angle of the remotely controllable zoom ranging from 3.8° to 60°. It has perfect colour mixing,including both CMY & RGBW colour control, 18-bit dimming, Tungsten emulation, and selectable & variable colour temperatures of pure and crispy whites. The compact and lightweight moulded composite unit includes a combined hanging bracket and floor stand. Exceptionally quiet – ParFect 150 is a perfect solution for theatres, concert halls, TV´s and any kind of installation.
Now equipped with Robe's innovative lens coating technology which brings benefits such as bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning.

The all-new iParFect 150™ FW available in RGBW or RGBA LED configuration is loaded with impressive features. It has an exceptionally wide zoom range, is completely silent, due to passive cooling and, with an IP 65 rating, is ideal for television, theatres, concert halls and any kind of outdoor event.

Other characteristics include CMY & RGBW or RGBA colour control, L3™ dimming and Tungsten emulation with both selectable & variable colour temperature providing total output control.

The RGBA LED colour combination provides a high CRI and allows designers to produce warm, rich, amber tones that are usually difficult to achieve.

The powerful, punchy beam with a zoom range of 3.8° to 60°, combined with a Fresnel style beam edge, results in a smooth, homogenised beam of light. This compact, lightweight fixture includes a combined hanging/floor stand bracket and accessories such as a gel frame and barndoors.

Now equipped with Robe's innovative lens coating technology that brings benefits such as bright and clear lenses, no scratches or marks, higher light output and longer intervals between cleaning.

The Divine 60 UV is a breakthrough in true UV illumination - a 160 Watt all-LED luminaire providing superb UV output levels at 365nm (peak). Precision UV-stable components are housed in an IP67 rated casing with flexible mounting options enabling rapid installation, making it perfect for themed environments and events of all types.

Inbuilt DMX and RDM control facilitates the accurate setting of light levels, and a wireless control option allows retro fitting into existing installations without needing additional control infrastructure. Perfectly suited for both indoor and outdoor environments, the Divine 60 UV as an ideal choice for theatres, theme parks, attractions, leisure facilities and entertainment events requiring a true UV 'black light' effect.

Features

- 60 x 385 nm UV LEDs
- Extra smooth high res. Dimming
- Beam angle 38° (at 1/2 beam)
- 6 individually controllable LED zones
- IP67
- IK10

The Divine 160 is a high-performance 440W luminaire with phenomenal light output that can be used for a variety of entertainment and architectural lighting scenarios including the application of dynamic colour changing effects to building exteriors and façades, or illuminating complete areas with subtle CCT controllable white light.

The Divine is available in numerous configuration options including optics for flood or accent lighting. RGBW, SmartWhite or PureWhite in a variety of colour temperatures combined with different mounting options and accessories make Divine a truly flexible solution. A high IP rating of 67 and 2-year warranty underline the reliability required for the most demanding projects, be they permanent installations or temporary events. The compact size and low weight of the Divine combined with its adaptability make installation a smooth and streamlined process.

■ onePATT™	254
■ picklePATT™	257
■ PATT 2013™	259

Expanding the ROBE series of retro style lighting, PATT 2017 is LED driven, environmentally conscious and can be a playfully colorful or adaptable tungsten white-like eye-candy effect for the stage and set - perfect for bands, television, film and general prop lighting. Lighting fixtures can be more than a practical necessity – the luminaires themselves can be a piece of art and create the mood. This fixture is based on an idea conceived by lighting designer Tim Routledge. The 7 x 40W RGBW LEDs powerfully illuminate the sleek, spun aluminium body which maximises its curves to look as good on stage as the performers it illuminates. Besides controlling the complete LED cluster as one unit, it is possible to control each single LED independently, creating smooth animations, transitions and rainbow effects on the aluminium reflector featuring the PATT gold-brown coating. The PATT 2017 has a remote power and data box PATT driver and is connected through standard colour scroller cables with 4-pin XLR Connectors. For easy installation the PATT 2017 can be connected or disconnected from the PATT Driver under power.

Joining Robe's line of retro style lighting products is pixelPATT, the latest addition to the PATT family. In spite of its eye-catching retro design, pixelPATT is based on modern LED pixel-controlled technology. The pixelPATT is composed of 7 x 40W RGBW LED multichips, one in the centre surrounded by a ring of six, housed in a super-slim and lightweight brushed metal frame. Aesthetically it keeps the dimensions and attractive curvature of the PATT 2013 and the picklePATT, making it desirable for both its physical appearance and as a light source. In order to make the pixelPATT elegant and lightweight, it has a remote Power and Data box PATT Driver, which is connected with the pixelPATT through a standard colour scroller cable with 4-pin XLR connectors. For easy installation the pixelPATT can be connected or disconnected from the PATT Driver under power. The pixelPATT is ideal for television broadcasts, concerts, fashion shows as well as a variety of other events.

Features

- Perfect colour mixing
- Individual control of LED rings
- True whites
- Multichip LED technology
- Zoom: 8°–63°
- Flat & Even light beam

Another member of the extended PATT family of retro-style lighting fixtures, onePATT is a RGBW multichip, high-powered, multicolored LED fixture housed in a super slim, lightweight, brushed metal retro-style frame.

The unit's high light output can be pixel mapped and therefore controlled and used for large scale matrix applications, as well as individual illuminating needs.

An integrated, intelligent, electronic Control System provides protection from overheating, remote addressing, calibration and status messaging, with a Power Supply unit, ensuring simple, remote maintenance and long-term reliability. For easy installation the onePATT can be connected or disconnected from the PATT Driver under power.

Seven onePATTs can be connected to the PATT Driver – a power and data box specifically designed for the pixlePATT, PATT 2017 and onePATT family of products.

Following the series of retro style lighting, the picklePATT is the new cute compact addition to our tungsten classic family. It is the second fixture, made in collaboration with lighting designer Tim Routledge, which combines traditional aesthetics and modern build quality.

The picklePATT is specifically designed to further the current trend for tungsten eye-candy on stage and set - for bands, television, film and general prop lighting, while keeping its vintage looks and utilizing the modern, readily available 575W HPL lamp.

The 575W tungsten softlight is formed around a 392 mm sleek, spun parabolic aluminium body which maximises its curves to look as good on stage as the performers it illuminates. The picklePATT proves that lighting fixtures can be more than just a practical necessity – the luminaires themselves can be a piece of art and create the mood. The well-known member of Robe's tungsten classic range - PATT 2013 - has already been used on television broadcasts and concerts worldwide including Jeff Lynne's ELO, Gary Barlow, The Prodigy, Robbie Williams, Paul McCartney, X Factor, Britain's Got Talent, The Graham Norton Show plus numerous other talkshow sets.

The revolutionary RoboSpot is a follow spot system that allows the simultaneous remote control up to 12 fixtures ... without the safety concerns and / or impracticality of having people working at height above the stage or at the very top of venues like theatres and stadiums, or in elevated positions on film and TV sets.

Stunning visual displays are now possible utilising as many as 12 perfectly synchronised fixtures to follow a performer across a stage. Utilizing the RoboSpot system, operators can now safely and conveniently control multiple Robe fixtures from any location within the venue, also reducing set-up times and operational costs.

The RoboSpot BaseStation has a large 15.6-inch HD touch screen display, so the operator observes the performance space from a "first person" perspective – like most video games.

A live video picture relays visual and positional information – of the artist / cast - from MotionCamera/s that are either integral to the fixture itself or rigged adjacent to each individual fixture on the rig that is being used for remote follow spotting.

The operator has full control of the remote spotted fixture using the BaseStation handles and two programmable faders which can tweak parameters like dimmer or iris for additional effects.

The operator's commands are instantly transferred to the luminaires via DMX signal with no lag ... so, they can perfectly motion track the artist across the stage or performance area.

Extra control over the remote follow spot can be achieved via the Base Station touch screen display and four programmable jog wheels which have 10 additional button settings ... for a truly customisable experience.

The remote lighting desk can still control all the internal features of the follow spot units such as light intensity and colours.

BMFL LightMaster is an accessory of externally mounted programmable followspot handles with a control panel and two individual faders that allow you to create quality followspot from any of the Robin BMFL fixtures you already have on site.

Available in either sideways or back mounted option, the handles feature two programmable faders (for example for dimmer and iris) and a control panel with touch screen display and four custom programmable jog-wheels and ten assignable buttons for a fully-customizeable user experience.

The programmable buttons, jog-wheels and faders allow the operator to comfortably trigger and control dimmer, iris, focus, zoom, frost, colors or other features of the unit.

While in use by followspot operator, remote desk can still take control of all the internal features of the unit (like dimmer, colors etc.). Internal fixture's settings allow you to fully tailor pan/tilt movement behavior by adjusting tension smoothness and resistance.

Quick mounting in back or side position is assured by using quarter turn lock screws. Control panel connects to the unit via USB connection.

The T1 / ESPRITE LightMaster externally mounted programmable follow spot control interface allows you to use these fixtures as manually controlled followspots, thereby maximizing the use of your inventory.

The sideways mounted LightMaster kit, specifically designed to fit the entire T1 and ESPRITE Profile fixtures, features two programmable faders (to control dimmer and iris, for example) mounted on the handles, together with a control panel and touch screen display. Four custom programmable jog wheels and ten assignable buttons provide a fully customizable user experience.

The programmable buttons, jog wheels, and faders allow the operator to comfortably trigger all the features of the fixture with ease.

While in use by a follow spot operator, a separate control desk may still take control of all the internal features of the unit allowing maximum flexibility in the application of your T1 and ESPRITE Profile fixtures.

Installation is via lock screws, the control panel connecting to the fixture with a USB connection. Settings allow you to tailor the behaviour of pan and tilt movement, to suit follow-spot operation, by adjusting tension and resistance to ensure smooth movement.

X1 FT PRO™ is a Trademark of Robe lighting s. r. o.

FOG 1600 FT™ uses newly designed piping system with electronically controlled electromechanical valve and generates clear burst without excess fog and ensures that only the purest, driest white fog is produced. This piping design automatically removes remaining fluid from the system, resulting in extended lifespan of the heater unit. Internal electronic fluid level sensor stops operation in low-fluid situations offering complete protection to the heavy-duty and silent running pump and the 100% pure aluminum cast heater. FOG 1600 FT™ is the perfect solution for productions needing intensive effects. FOG 1600 FT™ also caters to the portability needs of the touring and rental markets with custom flightcases available for this fogger.

FOG 1600 FT™ is a Trademark of Robe lighting s. r. o.

This versatile FAZE 1050 FT™ is the result of an evolution between a fog and a haze machine. The Faze 1050 FT™ has the best features of both technologies without any compromises. The FAZE emits a fine, dry haze effect which is a perfect compliment for lighting. It is equipped with a range of sophisticated features which include a high precision PCB design; aluminum cast heater, a silent heavy-duty pump and controllable twin fans. Precise fan control is achieved by 3 adjustable levels via onboard DMX. The DMX connection can be via either 3 or 5 pin connector. Silence is golden in some environments, so the FAZE 1050 FT™ is equipped with the quietest pump allowing virtually silent operation, great for noise-sensitive events. A perfect fine particled haze with minimal residue, has a minimal effect on sensitive lighting equipments. FAZE 1050 FT™ has become the machine of choice for stage and studio professionals worldwide.

HAZE 500 FT PRO™

ROBE proudly unveils its latest Hazer – the HAZE 500 FT PRO™ – to the entertainment industry with great enthusiasm. This groundbreaking product is the result of extensive R'n'D in the field of haze machines, and has been developed following many years of experience and hard work. The performance of HAZE 500FT PRO™ is therefore second to none. It works spectacularly with laser beams and lighting effects to bring the best atmospheres to all events. HAZE 500 FT PRO™ is definitely the best choice for selective stage designers, performers, and audiences. Finally, the extraordinary low haze liquid consumption rate makes HAZE 500 FT PRO™ energy-efficient and environmentally-friendly.

ROBE Cases

Our Cases provide full protection for your units. They were built to endure the rigors of the touring and rental market. The cases were manufactured from high-quality, water repellent 9.6 mm thick plywood with black finish exterior and features aluminium protected edges and tough steel corners. The features include durable construction, consisting of ball corners, strong metal handles and roller castors on the base to enable easy roll-in and roll-out.

A photograph of a stage performance. In the background, a grid of 15 circular stage lights is arranged in 3 rows and 5 columns, casting a warm orange glow. Two musicians are visible on stage: one in a red shirt playing a keyboard and another in a dark shirt playing a guitar. A drum kit is also visible on the right. The foreground shows the silhouettes of an audience.

PATT SERIES

■ PATT 2017™	248
■ pixelPATT™	251
■ onePATT™	254
■ picklePATT™	257
■ PATT 2013™	259

Expanding the ROBE series of retro style lighting, PATT 2017 is LED driven, environmentally conscious and can be a playfully colorful or adaptable tungsten white-like eye-candy effect for the stage and set - perfect for bands, television, film and general prop lighting. Lighting fixtures can be more than a practical necessity – the luminaires themselves can be a piece of art and create the mood. This fixture is based on an idea conceived by lighting designer Tim Routledge. The 7 x 40W RGBW LEDs powerfully illuminate the sleek, spun aluminium body which maximises its curves to look as good on stage as the performers it illuminates. Besides controlling the complete LED cluster as one unit, it is possible to control each single LED independently, creating smooth animations, transitions and rainbow effects on the aluminium reflector featuring the PATT gold-brown coating. The PATT 2017 has a remote power and data box PATT driver and is connected through standard colour scroller cables with 4-pin XLR Connectors. For easy installation the PATT 2017 can be connected or disconnected from the PATT Driver under power.

Features

- Perfect colour mixing
- PATT Driver
- 7 x 40 W RGBW LED multichips
- Individual control of each RGBW pixel

Specifications

SOURCE

Light source type:	7 x 40W RGBW LED multichips
LED life expectancy:	min. 50.000 hours
Typical lumen maintenance:	L70/B50 @ 50.000 hours

OPTICAL SYSTEM

550mm parabolic aluminium reflector with high reflectivity coating
Diffusor dome distributing light evenly from RGBW LED source inside of the reflector

DYNAMIC EFFECTS

Colour mixing mode	RGBW or CMY
Individual control of each RGBW pixel	
Variable CTO:	2.700 – 8.000K
Virtual Colour Wheel:	with 66 preset swatches
Pre-programmed pixel effects with colour, dimming and strobe chases, waves and pulses at variable speed and direction	
Shutter:	Electronic with variable speed strobe (max. 20 flashes per second)
Pre-programmed random strobe & pulse effects	
High resolution electronic dimming:	0–100 %

Product on Request

Joining Robe's line of retro style lighting products is pixelPATT, the latest addition to the PATT family. In spite of its eye-catching retro design, pixelPATT is based on modern LED pixel-controlled technology. The pixelPATT is composed of 7 x 40W RGBW LED multichips, one in the centre surrounded by a ring of six, housed in a super-slim and lightweight brushed metal frame. Aesthetically it keeps the dimensions and attractive curvature of the PATT 2013 and the picklePATT, making it desirable for both its physical appearance and as a light source. In order to make the pixelPATT elegant and lightweight, it has a remote Power and Data box PATT Driver, which is connected with the pixelPATT through a standard colour scroller cable with 4-pin XLR connectors. For easy installation the pixelPATT can be connected or disconnected from the PATT Driver under power. The pixelPATT is ideal for television broadcasts, concerts, fashion shows as well as a variety of other events.

Features

- Perfect colour mixing
- Individual control of LED rings
- True whites
- Multichip LED technology
- Zoom: 8°–63°
- Flat & Even light beam

Another member of the extended PATT family of retro-style lighting fixtures, onePATT is a RGBW multichip, high-powered, multicolored LED fixture housed in a super slim, lightweight, brushed metal retro-style frame.

The unit's high light output can be pixel mapped and therefore controlled and used for large scale matrix applications, as well as individual illuminating needs.

An integrated, intelligent, electronic Control System provides protection from overheating, remote addressing, calibration and status messaging, with a Power Supply unit, ensuring simple, remote maintenance and long-term reliability. For easy installation the onePATT can be connected or disconnected from the PATT Driver under power.

Seven onePATTs can be connected to the PATT Driver – a power and data box specifically designed for the pixlePATT, PATT 2017 and onePATT family of products.

Features

- Perfect colour mixing

■ 40W RGBW LED multichips

■ Flat & Even light beam
- Multichip LED technology

Following the series of retro style lighting, the picklePATT is the new cute compact addition to our tungsten classic family. It is the second fixture, made in collaboration with lighting designer Tim Routledge, which combines traditional aesthetics and modern build quality.

The picklePATT is specifically designed to further the current trend for tungsten eye-candy on stage and set - for bands, television, film and general prop lighting, while keeping its vintage looks and utilizing the modern, readily available 575W HPL lamp.

The 575W tungsten softlight is formed around a 392 mm sleek, spun parabolic aluminium body which maximises its curves to look as good on stage as the performers it illuminates. The picklePATT proves that lighting fixtures can be more than just a practical necessity – the luminaires themselves can be a piece of art and create the mood. The well-known member of Robe's tungsten classic range - PATT 2013 - has already been used on television broadcasts and concerts worldwide including Jeff Lynne's ELO, Gary Barlow, The Prodigy, Robbie Williams, Paul McCartney, X Factor, Britain's Got Talent, The Graham Norton Show plus numerous other talkshow sets.

The revolutionary RoboSpot is a follow spot system that allows the simultaneous remote control up to 12 fixtures ... without the safety concerns and / or impracticality of having people working at height above the stage or at the very top of venues like theatres and stadiums, or in elevated positions on film and TV sets.

Stunning visual displays are now possible utilising as many as 12 perfectly synchronised fixtures to follow a performer across a stage. Utilizing the RoboSpot system, operators can now safely and conveniently control multiple Robe fixtures from any location within the venue, also reducing set-up times and operational costs.

The RoboSpot BaseStation has a large 15.6-inch HD touch screen display, so the operator observes the performance space from a "first person" perspective – like most video games.

A live video picture relays visual and positional information – of the artist / cast - from MotionCamera/s that are either integral to the fixture itself or rigged adjacent to each individual fixture on the rig that is being used for remote follow spotting.

The operator has full control of the remote spotted fixture using the BaseStation handles and two programmable faders which can tweak parameters like dimmer or iris for additional effects.

The operator's commands are instantly transferred to the luminaires via DMX signal with no lag ... so, they can perfectly motion track the artist across the stage or performance area.

Extra control over the remote follow spot can be achieved via the Base Station touch screen display and four programmable jog wheels which have 10 additional button settings ... for a truly customisable experience.

The remote lighting desk can still control all the internal features of the follow spot units such as light intensity and colours.

BMFL LightMaster is an accessory of externally mounted programmable followspot handles with a control panel and two individual faders that allow you to create quality followspot from any of the Robin BMFL fixtures you already have on site.

Available in either sideways or back mounted option, the handles feature two programmable faders (for example for dimmer and iris) and a control panel with touch screen display and four custom programmable jog-wheels and ten assignable buttons for a fully-customizeable user experience.

The programmable buttons, jog-wheels and faders allow the operator to comfortably trigger and control dimmer, iris, focus, zoom, frost, colors or other features of the unit.

While in use by followspot operator, remote desk can still take control of all the internal features of the unit (like dimmer, colors etc.). Internal fixture's settings allow you to fully tailor pan/tilt movement behavior by adjusting tension smoothness and resistance.

Quick mounting in back or side position is assured by using quarter turn lock screws. Control panel connects to the unit via USB connection.

The T1 / ESPRITE LightMaster externally mounted programmable follow spot control interface allows you to use these fixtures as manually controlled followspots, thereby maximizing the use of your inventory.

The sideways mounted LightMaster kit, specifically designed to fit the entire T1 and ESPRITE Profile fixtures, features two programmable faders (to control dimmer and iris, for example) mounted on the handles, together with a control panel and touch screen display. Four custom programmable jog wheels and ten assignable buttons provide a fully customizable user experience.

The programmable buttons, jog wheels, and faders allow the operator to comfortably trigger all the features of the fixture with ease.

While in use by a follow spot operator, a separate control desk may still take control of all the internal features of the unit allowing maximum flexibility in the application of your T1 and ESPRITE Profile fixtures.

Installation is via lock screws, the control panel connecting to the fixture with a USB connection. Settings allow you to tailor the behaviour of pan and tilt movement, to suit follow-spot operation, by adjusting tension and resistance to ensure smooth movement.

FORTE™ LightMaster is an accessory of externally mounted programmable followspot handles with a control panel and two individual faders that allow you to create quality followspot from the FORTE™ and FORTE™ FS fixtures.

Available in either sideways or back mounted option, the handles feature two programmable faders (for example for dimmer and iris) and a control panel with touch screen display and four custom programmable jog-wheels and ten assignable buttons for a fully-customizeable user experience.

The programmable buttons, jog-wheels and faders allow the operator to comfortably trigger and control dimmer, iris, focus, zoom, frost, colors or other features of the unit.

While in use by followspot operator, remote desk can still take control of all the internal features of the unit (like dimmer, colors etc.). Internal fixture's settings allow you to fully tailor pan/tilt movement behavior by adjusting tension smoothness and resistance.

Quick mounting in back or side position is assured by using quarter turn lock screws. Control panel connects to the unit via USB connection.

FOG 1600 FT™ uses newly designed piping system with electronically controlled electromechanical valve and generates clear burst without excess fog and ensures that only the purest, driest white fog is produced. This piping design automatically removes remaining fluid from the system, resulting in extended lifespan of the heater unit. Internal electronic fluid level sensor stops operation in low-fluid situations offering complete protection to the heavy-duty and silent running pump and the 100% pure aluminum cast heater. FOG 1600 FT™ is the perfect solution for productions needing intensive effects. FOG 1600 FT™ also caters to the portability needs of the touring and rental markets with custom flightcases available for this fogger.

FOG 1600 FT™ is a Trademark of Robe lighting s. r. o.

This versatile FAZE 1050 FT™ is the result of an evolution between a fog and a haze machine. The Faze 1050 FT™ has the best features of both technologies without any compromises. The FAZE emits a fine, dry haze effect which is a perfect compliment for lighting. It is equipped with a range of sophisticated features which include a high precision PCB design; aluminum cast heater, a silent heavy-duty pump and controllable twin fans. Precise fan control is achieved by 3 adjustable levels via onboard DMX. The DMX connection can be via either 3 or 5 pin connector. Silence is golden in some environments, so the FAZE 1050 FT™ is equipped with the quietest pump allowing virtually silent operation, great for noise-sensitive events. A perfect fine particled haze with minimal residue, has a minimal effect on sensitive lighting equipments. FAZE 1050 FT™ has become the machine of choice for stage and studio professionals worldwide.

HAZE 500 FT PRO™

ROBE proudly unveils its latest Hazer – the HAZE 500 FT PRO™ – to the entertainment industry with great enthusiasm. This groundbreaking product is the result of extensive R'n'D in the field of haze machines, and has been developed following many years of experience and hard work. The performance of HAZE 500FT PRO™ is therefore second to none. It works spectacularly with laser beams and lighting effects to bring the best atmospheres to all events. HAZE 500 FT PRO™ is definitely the best choice for selective stage designers, performers, and audiences. Finally, the extraordinary low haze liquid consumption rate makes HAZE 500 FT PRO™ energy-efficient and environmentally-friendly.

HAZE 500 FT Pro™ is a Trademark of Robe lighting s. r. o.

The Haze 400 FT™ has an internal, maintenance-free air compressor, a sophisticated haze transfer mechanism and a specially designed liquid tank, together with two haze nozzles. It is capable of producing large volumes of virtually invisible haze. The fine translucence and staying power of the haze is even more remarkable because this hazer has no temperature controls, hot air or warm-up times during operation. It's extremely powerful internal compressor is quiet and very efficient. Onboard DMX offers fully flexible control. Haze 400 FT™ Professional Hazer is an elegant combination of ultimate haze quality from a high capacity, low fluid consumption, silent operating machine as demanded by professionals in all sectors.
