Professional Summary

Frontend Engineer with 2+ years of experience building scalable production web applications using React.js and Next.js. Skilled in designing reusable component architectures, implementing complex financial workflows, integrating REST APIs, and improving application performance using modern frontend engineering practices.

Technical Skills

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Familiar With	Node.js, Express.js, MongoDB
Tools	Git, GitHub, Postman, Vite, Firebase, Digital Ocean

Professional Experience

Finnest Technologies

Kochi

Software Developer

May 2024 – Feb 2026

- Engineered frontend modules for an enterprise fintech platform supporting **remittance processing, AML compliance, treasury operations, and accounting workflows**.
- Contributed to a large-scale system used by **money exchange businesses** to manage financial transactions, regulatory compliance, and operational processes.
- Designed complex **multi-step financial transaction interfaces** with **draft persistence**, enabling users to safely pause and resume transaction workflows.
- Created reusable **core UI components and shared form modules** improving consistency across multiple product features.
- Delivered **AML monitoring dashboards** that allow compliance teams to investigate flagged transactions and perform risk assessments.
- Implemented secure **Maker-Checker approval workflows** enabling multi-level authorization for sensitive financial operations.
- Developed **role-based access control (RBAC)** mechanisms supporting module-level and action-level permission management.
- Improved application performance through **code splitting and lazy loading**, reducing initial load time and improving UI responsiveness.
- Integrated **paginated REST APIs** to efficiently process large financial datasets while collaborating closely with backend engineers and QA teams.
- Represented the frontend engineering team during a **client product demonstration in Qatar**.

Tech Stack: React 18, Next.js, TypeScript, Zustand, React Query, Tailwind CSS, REST APIs, JWT, Git

Brototype

Kochi

MERN Stack Developer Intern

Jan 2023 – Feb 2024

- Developed a full-stack e-commerce platform using the **MERN stack (MongoDB, Express, React, Node.js)**.
- Implemented core features including **cart management, order processing workflows, and Razorpay payment integration**.
- Built secure authentication flows using **JWT, bcrypt password hashing, and Twilio OTP verification**.
- Designed and integrated **REST APIs** while improving database performance through **MongoDB aggregation pipelines**.
- Completed multiple practical projects to strengthen hands-on experience with **React, Node.js, Express, and MongoDB**.
- Participated in **team collaboration, peer code reviews, and technical feedback sessions** throughout the internship.

Tech Stack: JavaScript, React.js, Node.js, MongoDB, Express.js, Bootstrap, REST APIs, JWT, Git

Projects

Dinero – Enterprise Financial Operations Platform *Finnest Technologies · May 2024 – Feb 2026*

- Enterprise fintech system used by **money exchange businesses** to manage remittance operations and financial workflows.
- Platform supports **90+ operational modules** including treasury management, accounting processes, AML compliance monitoring, and reporting.
- Enables **teller operations, customer onboarding, external service integrations, and secure maker–checker authorization flows.**

Tech Stack: React 18, Next.js, TypeScript, Zustand, SWR, REST APIs

SynConnect – NFC Digital Business Card Platform *Freelance · Feb 2024 – Present*

- Developed an **NFC-enabled digital business card platform** enabling professionals to share digital profiles through NFC tap or QR scan.
- Implemented customizable **profile pages and a management dashboard** for updating personal information and monitoring visitor engagement.
- Designed the platform to support **lead capture, digital networking, and profile sharing.**

Tech Stack: Next.js, Redux Toolkit, Node.js, Express, MongoDB, DigitalOcean Droplet, React Query

Venture Apparels – E-commerce Platform *Brototype Internship · Sep 2023 – Nov 2023*

- Built a full-stack **e-commerce platform** supporting product browsing, cart management, checkout, and order processing.
- Developed an **admin dashboard** for product management, inventory updates, and order tracking.

Tech Stack: Node.js, Express.js, MongoDB, JWT Authentication, Bootstrap, HTML5, CSS3, JavaScript

Education

Zamorins Guruvayoorappan College, Calicut University 2019 – 2022
B.Sc. Chemistry — Calicut, India — 65%
