

Make testing less tearful

The Infant Heel Warmer from Typenex® Medical increases blood flow to an infant's heel area to minimize potential bruising, infection, or cartilage damage caused by heel sticks from blood tests. It's an easy way to help babies stay as safe and comfortable as possible.

Infant Heel Warmer

Features and Benefits

Comfortable - Wrap around design conforms to baby's heel. Available in both cloth-back and clear, providing options for softness and comfort

Convenient - Easy peel adhesive secures warmer to baby and tear away strap allows for simple removal

Safe - Not made with natural rubber latex and safe for infants
