OUR HISTORY

Typenex® Medical has been developing medical solutions that react to the ever-changing needs of the healthcare industry since 2004. The Original Typenex Blood Band was our foundation, providing the best possible results for those receiving and delivering blood transfusions. Throughout our growth and advancement, the core part of our operation continues to be how we can better serve patients and caregivers.

While the healthcare landscape is one of constant change, we have continued to develop patient-centered solutions to maximize efficiency and productivity, while streamlining costs. This transition required thoughtful and meaningful change in the way patients are treated. We have continued to add business divisions in areas where customer service and product offerings could benefit from innovation.

Today, our business divisions have grown to include Blood Bands, Operating Room, Patient Identification, Pediatrics, and Laboratory Disposables. And we won't stop there. We will always be looking for more opportunities to aid the healthcare industry and help protect the safety and privacy of patients.

OUR PROMISE

We believe behind every existing and new innovation, there should be real people who are here to partner with you to ensure you have everything you need to deliver the best patient care. We will work with you to figure out which products work well in your current system and what we can do to help you streamline your processes. From education to implementation, we are dedicated to providing patient-centered solutions that bring you, your staff, and the people you treat to better outcomes.

When I started Typenex® Medical, I never imagined it would grow into the company it is today. I saw an opportunity for one product to evolve into an entire company of great solutions for the healthcare industry. The catalyst for this growth has been the people. As a family-run business, I understand the importance of meaningful relationships. That is why I have always viewed our customers as an extension of my own family.

Throughout my time in healthcare, the one thing that has remained constant in this ever-changing space is the need for reliable and attentive customer service. The dedication and hard work that the Typenex Medical family puts in each day is a testament to our passion in meeting that need. No issue is too big or too small for us to tackle if we do it as one.

I look forward to partnering with you so together, we can better serve those in need of healthcare solutions.

Sincerely,

John Fife
Owner, President

CATALOG

BLOOD BANDS

Barcode Band|Handwritten

The Barcode Band Handwritten blood band with paper backing has plenty of space for handwritten patient information or preprinted patient labels. The design allows for up to three days of inpatient use and is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology	Prompts
4R4678	Red				
4R4679	Green				
4R4680	Yellow	150	Up to 3 days	Code 128	Date/Time/Initials/Patient/Name/ID#/DOB
4R4681	Blue				
4R4682	Orange				

Barcode Band|Label

The Barcode Band Label blood band has a large Blood Bank ID (BBID) that makes it quick and easy to check patient information. The barcodes allow more efficiency in capturing the BBID in your LIS (Laboratory Information System). The Barcode Band Label is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology
4R4638	Red			
4R4639	Green			
4R4640	Yellow	150	Up to 3 days	Code 128
4R4641	Blue			
4R4642	Orange			

Barcode Plus™ | Condensed

The Barcode Plus™ Condensed blood band provides a unique identifier without the need to write or apply patient information. Barcoded specimen tube labels make it easy to scan the Blood Bank ID (BBID) into your LIS (Laboratory Information System), helping to save time and avoid transcription errors.

Product Code	Color	Bands/Case	Durability	Barcode Symbology	Prompts
C4000	White				N/A
C4001	Red	150	Up to 5 days	Code 128	Date
C4004	Blue				Time/Date/Initial

Barcode Plus™ | Handwritten

Minimize data entry errors with the Barcode Plus™ Handwritten blood band. The patient information area provides plenty of space for handwritten patient information or preprinted patient labels. This plastic-backed band allows for up to five days of inpatient use. It fits most patients and is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology	Prompts
4R5078	Red				Date/Time/Initials/Patient Name/ID#/DOB
4R5079	Green				
4R5080	Yellow	150	Up to 5 days	Code 128	
4R5081	Blue				Date/Time/Patient Name/MR#/DOB
4R5082	Orange				

9

Barcode Plus™ | Label

The Barcode Plus™ Label blood band is a convenient option for hospitals with mobile phlebotomy systems and bedside labeling. The labeling version of Barcode Plus helps to minimize handwritten errors and maximize efficiency by utilizing a preprinted patient label. This plastic-backed band is also compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology
4R5038	Red			
4R5039	Green			
4R5040	Yellow	150	Up to 5 days	Code 128
4R5041	Blue			
4R5042	Orange			

Barcode Plus™ Slim | Handwritten

The Barcode Plus™ Slim Handwritten blood band is a thinner barcode band with plenty of room to handwrite patient information. Our smallest barcoded blood band allows for increased patient comfort and includes a clear shield for protection. This band is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology	Prompts
4R5378	Red				
4R5379	Green				
4R5380	Yellow	150	Up to 5 days	Code 128	MR#/DOB/PB/ Date/Time/ Patient Name
4R5381	Blue				
4R5382*	Orange				

Product is a non-stock item. Call for availability.

Barcode Plus™ 8 | Handwritten

The Barcode Plus™ 8 Handwritten blood band can accommodate handwritten patient information or a preprinted patient label, and includes extra stickers to remain with the patient, labeling paperwork, or additional specimens. This band allows for up to five days of inpatient use and is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology	Prompts
4R4578	Red				
4R4579*	Green				
4R4580	Yellow	150	Up to 5 days	Code 128	Date/Time/Initials/ Patient Name/ID#/ DOB
4R4581*	Blue				
4R4582*	Orange				

* Product is a non-stock item. Call for availability.

Barcode Plus™ 8 | Label

The Barcode Plus™ 8 Label blood band utilizes a preprinted label and includes extra stickers to remain with the patient for labeling paperwork or additional specimens. The additional stickers are ideal for hospitals that require longer inpatient stays or extra steps in their protocol. This band is compatible with the Typenex® Medical R3™ Reattachment System.

Product Code	Color	Bands/Case	Durability	Barcode Symbology

CheckDigit® | Band and Form

CheckDigit General

CheckDigit® bands are designed specifically to be used with the Cerner Bridge system, which requires the transfusionist to scan the permanent Blood Bank ID (BBID) barcode on the patient's wrist in order to proceed with the transfusion. Additional digits are embedded in the permanent BBID on the band insert to help ensure patient ID checks are completed at the patient's bedside. The CheckDigit Band and Form system is durable for up to seven days of regular patient wear, including daily showering.

Product Code	Color	Bands/Case	Durability	Barcode Symbology

FLX016	White			

CheckDigit® | Condensed

Condensed 4

Condensed 6

Condensed 8

The CheckDigit® Condensed blood bands are designed specifically for use with the Cerner Bridge system, ensuring that pre-transfusion checks happen only at the patient's bedside to help prevent transfusion errors. The condensed feature does not require technicians to write patient information, but still includes additional digits embedded in the permanent Blood Bank ID (BBID). This band has four, six, or eight patient stickers for additional paperwork.

Product Code	Color	Patient Stickers	Bands/Case	Durability	Barcode Symbology	Prompts

Flexi 2.1™ | Band and Form

Condensed

General

The Flexi 2.1™ blood band and accompanying form offers the necessary durability and greater comfort required for long-term stay or outpatient scenarios. The band and form combination comes with a Blood Bank ID (BBID) that creates a physical connection between the patient, transfusion tag, and blood component. The water-resistant cover keeps patient information legible throughout the patient's stay, even with daily showering.

Original™ | Blood Band

The Original™ Blood Band is the first blood band designed specifically for transfusion patients. It provides a unique Blood Bank ID (BBID) identifier in an easy to read alphanumeric format and helps minimize errors by giving caregivers an objective method for coordinating patient and blood. The band features a self-cutting clasp to remove excess band and additional stickers.

| Product Code	Color	Bands/Case	Durability

LAB DISPOSABLES

Typesafe® | Segment Piercing Device

Typesafe® single-use segment piercing device sits on top of a tube and is designed for use during cross-matching procedures. Typesafe supports laboratory technicians by minimizing the risk of spills and breakage.

Product Code	Color	Units/Case
TS500	Green	500
4R4750	Green	1000

Typesafe® 2.0 | Segment Piercing Device

Typesafe® 2.0 single-use segment piercing device sits around a test tube and is designed for use during cross-matching procedures. Dividers help guide the blood segment to the needle, aiding in emptying the blood segment without the use of scissors.

Product Code	Color	Units/Case
SP0201QD	Green	500
SP0201QM	Green	1000

Smearsafe™ | Blood Dispenser

Smearsafe™ is a single-use quick and safe way to dispense a drop of blood from a test tube without removing the top. The technician can easily control the size of a drop of blood by varying the pressure and speed at which the tube is pressed down onto the slide.

Product Code	Color	Units/Case
C1000	Clear	1000

Universal Tube | 12 mL

The universal tube can be used in manual urine microscopy procedures and may also function as a centrifuge tube. It facilitates the holding, transporting, and analyzing of the urine. Easy-to-read millimeter markings allow for increased accuracy. This tube is compatible with the Kova® Urinalysis Kit.

* Kova® is a registered trademark of Kova International.

Product Code	Color	Units/Case
US0101QD	Clear	500

Universal Cap

Place this cap on the Universal Tube 12 mL to prevent spillage and secure contents.

| Product Code	Color	Units/Case
US0201QD	Clear	500

OPERATING ROOM

Absorbent Floor Mat | Double-Sided

The Double-Sided Absorbent Floor Mat is a convenient, safe, and affordable option for floor fluid management in the operating room. Absorbent material on both sides aids in fluid absorption and retention. The modular format allows you to choose how much material is needed to create the ideal size and shape. Each mat provides 11 square feet of coverage and can be used before, during, and after surgery.

Product Code	Description	Color	Size	Units/Case
FMB30	Double-Sided	Blue	36" x 44"	30

Absorbent Floor Mat | Waterproof Backsheet

The Waterproof Backsheet Absorbent Floor Mat is designed to grip the floor firmly to help prevent slipping. The absorbent top collects fluid during a case and in the cleanup process. Each mat provides 11 square feet of coverage and can be applied before surgery.

Product Code	Description	Color	Size	Units/Case
FMBP30	Waterproof Backsheet	Blue	36" x 44"	30

BASS® Suction Mat

The BASS® Suction Mat by Typenex® Medical is the all-in-one solution for high fluid volume cases. At 18 square feet, it covers an area big enough for three people to stand on at once. The continuous suction capability helps effectively capture and remove fluid, keeping your operating room floor safe and dry.

Product Code	Color	Size	Units/Case
FM0201	White	43" x 60"	3

PowerOne | Microfiber Mop

Dense microfiber strands help to ensure your operating room floor is clean and dry. The microfiber technology can absorb up to six times its weight in water, while attracting dust particles.* The hybrid-use design can be used once, or laundered up to six times while maintaining its initial efficiency.

* Environmental Protection Agency, 2002
(http://www.epa.gov/region9/waste/p2/projects/hospital/s.pdf)

Product Code	Description	Color	Units/Case
MMB150	Microfiber Mop Head	Blue	150

String Mop

The Typenex® Medical String Mop supports best practices by providing a clean, single-use mop head for every case, and also reduces laundry costs. These mops are available in two different sizes to accommodate different case needs and facility protocols. The mop handle (sold separately) features a hands-free, quick-release handle.

Product Code	Description	Color	Size	Units/Case
SMW1024	String Mop Head - 10 oz	White	10 oz	24
SMW1618	String Mop Head - 16 oz	White	16 oz	18
SHG1	String Mop Handle	Grey	N/A	1

Big Foot® Suction Disc

The Big Foot® Suction Disc quietly and continually suctions fluid off the operating room floor during low, moderate, or high fluid-intensive surgical cases. Sixteen suction ports are distributed across the device to maximize liquid removal. The sleek design allows for easy repositioning. The Big Foot connects to any suction system through a simple attachment of tubing to the device.

Product Code	Color	Units/Case
FM0301	Black/Clear	40

Big Foot® Quiet | Suction Disc

An enhanced version of our Big Foot® Suction Disc, the Big Foot® Quiet has an absorbent layer on the underside of the disc. This feature mitigates unwanted noise and helps effectively vacuum fluid off the floor. The Big Foot Quiet connects to any suction system through a simple attachment of tubing to the device.

Product Code	Color	Units/Case
FM0301Q	Black/White	40

Gen I Rover Alternative Manifold | 4-Port

Gen I Rover's patented filter features a
unique assortment of pegs designed to trap
particulates and reduce the risk of clogging.

* Gen I Rover is a registered trademark of 5ˣ Surgical
* Typenex Medical is a distributor of 5ˣ manifolds
* Stryker® is a registered trademark of Stryker Corp

Fibernex™ Laser Fibers

Fibernex™ single-use and reusable Holmium Laser Fibers are for temporary invasive and non-invasive use as a part of a full medical laser system. The fibers are compatible with Holmium and Nd:YAG laser systems with standard SMA-905 fiber connections. Designed with medical grade glass and surrounded with a Tefzel®** outer jacket, these fibers have a rounded tip, polished edge* to minimize damage of the scope.

* Available on single use fibers only and prior to cleaving.
** Tefzel® is a registered trademark of Dupont™.
