

Fluid on the Floor?

Typenex® Medical's Absorbent Floor Mats are a durable choice for the management of spilled bodily fluids. Typenex® Medical offers two versatile mats that give healthcare professionals multiple, reliable solutions for a full range of surgical uses.

Absorbent Floor Mats

Absorbent Floor Mats

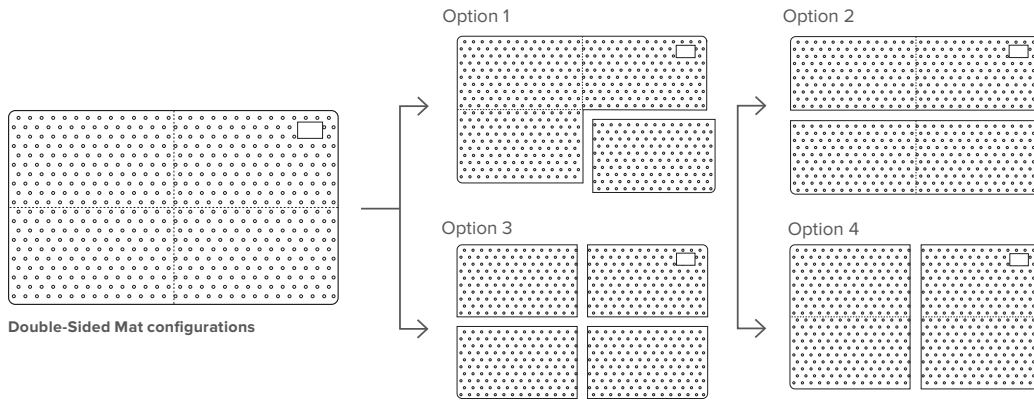

Choose from either a Double-Sided Mat, a Waterproof Backsheet Mat, or a combination of both to create the floor fluid management solution that works best for your facility. Absorbent Floor Mats are easy to use, cost efficient, and help reduce turnover time. To reduce cross contamination, dispose after use per your facility protocol.

Waterproof Backsheet Mat

- Place the mat on a dry operating room floor before a case.
- The backsheet grips to the floor helping reduce your chance of slipping.

Double-Sided Mat

- Use the mat to help absorb fluid on the floor, during and after a case.
- The Double-Sided Mat is modular and can be configured to meet your specific needs.

Order Number	Description	Color	Size	Mats/Case
FMB30	Double-Sided	Blue	36" x 44"	30
FMBP30	Waterproof Backsheet	Blue	36" x 44"	30
