

The floor is yours.
We're here to help keep it clean.

Typenex® Medical is proud to provide a versatile collection of absorbent floor mats to effectively manage floor fluid waste in the operating room. Designed with high-quality materials, our absorbent floor mats are available in two unique styles to support a full range of surgical uses.

Absorbent Floor Mats

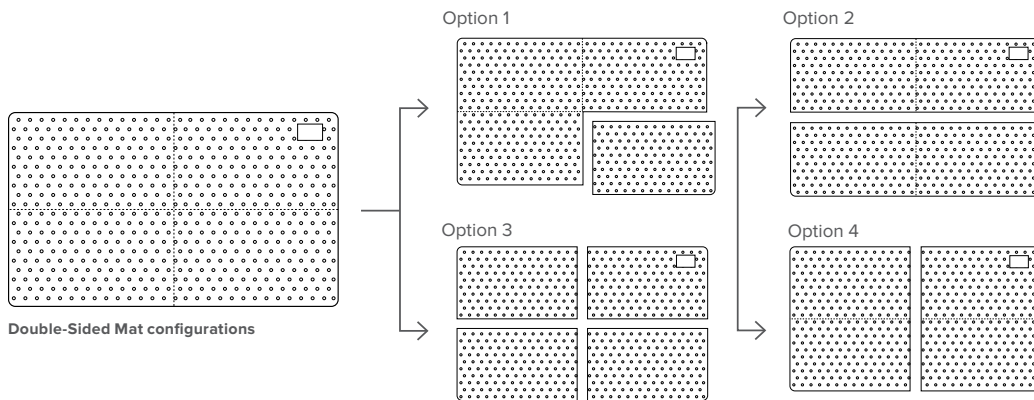

Create the ideal floor fluid management solution for your facility by choosing from our double-sided mats, waterproof backsheet mats, or a combination of both. Our absorbent floor mats are affordable, easy to use, and designed to help improve turnover rates. To reduce risks of cross-contamination, dispose after use per your facility's protocol.

Double-Sided Absorbent Floor Mat

- Can be used to absorb floor fluid during and after surgery.
- Modular design and perforations allow for complete configuration.

Absorbent Floor Mat with Waterproof Backsheet

- Place on dry operating room floor prior to surgery.
- Waterproof underside grips to the floor to help minimize risks of slipping.

Ordering Information
