

# A smarter way to secure ETT.

Airway Tape equips healthcare professionals with a gentle yet durable approach to securing endotracheal tubes (ETT) during intubation. A smarter alternative to standard medical tape, Airway Tape is pre-cut, easy to peel, and designed with comfortable materials. This innovative solution helps minimize the risk of cross-contamination while maximizing patient comfort and efficiency.

# Airway Tape | Endotracheal Tube Fastener

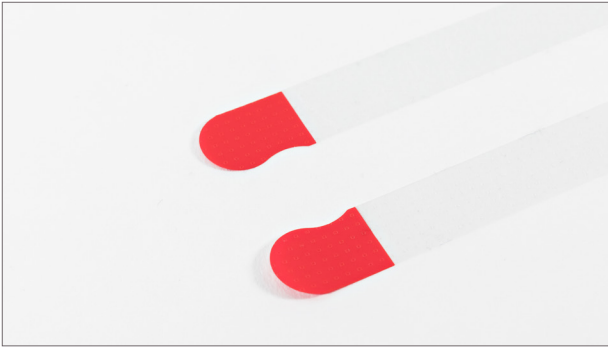

## Features and Benefits

**Safe Design** — Single-use, pre-cut strips help reduce the risk of cross-contamination.

**Easy to Use** — Non-adhesive red tabs allow for effortless application and removal.

**Enhanced Comfort** — Produced with medical grade materials; not made with natural rubber latex.
