

A light touch for tiny feet.

The TinyTouch® Lancet equips healthcare professionals with a gentle and effective way to sample newborn blood. Once activated, the blade creates a smooth incision and retracts permanently for safe disposal. With features like a contoured grip for greater control and a sterility cap for increased protection, this lancet helps make the procedure as comfortable and efficient as possible.

TinyTouch[®] Lancet

Features and Benefits

Safe Sterility Cap — The quick-release pull tab keeps the blade sterile, reduces prep time, and helps prevent accidental incisions.

Contoured Design — Multiple ergonomic grip options offer greater control and confidence.

Precise Alignment — The distinct alignment guide assists with accurate placement before use.

Permanent Retraction — The button remains depressed and permanently retracts the blade to help avoid injuries.
