

All eyes on safety and efficiency

Eye Safety Tape covers and protects patients' eyes while under general anesthesia. This customized solution reduces the risk of corneal abrasions and other common injuries caused by dry eye during long surgeries. Compared to medical tape, our product is specifically shaped and designed for the sensitive eye area — and will not damage the skin, eyebrows, or eyelashes.

Eye Safety Tape

Features and Benefits

Safe Design – Reduces the risk of corneal abrasions* and helps to protect patients’ eyes from drying during long procedures.

Comfortable Fit – Contoured design fits the eye’s anatomy. Medical grade material helps avoid skin irritation and, unlike tape, removal does not damage the skin, eyebrows, or eyelashes.

Efficient Removal – Red nonstick handle makes application and removal fast and easy with gloved hands.

Convenient Access – Dispenser can be placed on anesthesia cart or mounted on wall.

Different Sizes – Available in adult and pediatric sizes.
