

Keep your eye on patient comfort.

Eye Safety Tape, available in adult and pediatric sizes, protects patients' eyes while under general anesthesia for a comfortable, cosmetic post-op experience — all for less than \$1 per pair.

Unlike standard medical tape, the medical grade adhesive does not damage eyelashes or eyebrows during removal, and is gentle enough to prevent irritation even on sensitive skin. With two sizes to choose from, Eye Safety Tape helps prevent corneal abrasions* and provides a better fit for patients big and small.

Benefits	Eye Safety Tape	Medical Tape
Reduces the risk of corneal abrasion	X	X
Helps keep eyes from drying out	X	X
Adhesive is gentle on the skin	X	
Gentle on eyelashes	X	
Patented design covers full eye area	X	
Smaller size for pediatric patients	X	
Easy application with red nonstick handle	X	
No need to measure	X
