

The solution to floor suction has been found.

The Big Foot® | Suction Disc is designed to continuously vacuum fluid off the floor during low, moderate, or high fluid intensive surgical cases. The design allows for easy repositioning to effectively remove fluid on the operating room floor.

Big Foot® | Suction Disc

Features and Benefits

16 Suction Ports - Ports are distributed across the device to maximize liquid removal.

Quiet - Big Foot effectively vacuums and removes fluid without disturbing communication between clinicians.

Sleek Design - The design makes Big Foot easy to maneuver and reposition on the floor to address areas of high fluid volume.

Compatible - The Big Foot is able to connect to any suction system through a simple attachment of tubing to the device.
