

R3™ Reattachment System: R3attach, R3locate, R3size

The patented R3™ Reattachment System, found exclusively at Typenex® Medical, provides a solution to the challenge of relocating, resizing, or reattaching blood bands. Compatible with almost all Typenex Medical blood bands, the R3 band saves your facility the time, money and patient dissatisfaction associated with having to redraw and reband a patient or quickly resize a band for patients who need a larger option.

R3™ Band | Reattachment System

R3™ Band | Reattachment System

Features and Benefits

Compatibility - Works with almost all Typenex Medical barcoded blood bands

Economical - Saves your facility the time and money associated with redrawing and rebanding a patient

Patient comfort - Extra spacing holes and a long band accommodates a wider range of wrist sizes

Peace of mind - Helps ensure that caregivers have access to the necessary information even after band relocation
