

# Configure your cleanup.

---

Typenex® Medical's Absorbent Floor Mat Rolls equip healthcare professionals with an easy, efficient approach to keep operating room floors clean. With varying sizes and styles, our Absorbent Floor Mat Rolls offer a tailored solution specific to your facility.

# Absorbent Floor Mat Rolls

Choose from a variety of options to find the right floor fluid management solution for your facility. The Double-Sided Mat Roll effectively captures fluid during and after surgery with its modular design. The Waterproof Backsheet Mat Roll can be placed in the operating room before surgery, providing a tight grip on a dry surface. Both are available in standard thickness or a lightweight “E Roll” for low-fluid intensive cases. Floor Mat Roll Carts are also available for effortless transportation from room to room.

## Features and Benefits

**Safe** — Keeps operating room floors clean, lowering the risk of slipping.

**Efficient** — Can be configured to accommodate specific needs and helps to reduce turnover time.

**Optimal Coverage** — Perforated to help best fit the shape and size of your operating room floor.

**Mobile** — Optional cart allows for easy transportation and convenient storage.
