

Keep your eye on patient comfort.

Eye Safety Tape protects patients' eyes during surgery, helping to prevent corneal abrasions* and eye injuries — all for less than \$1 per pair.

Unlike standard medical tape, Eye Safety Tape does not damage eyelashes or eyebrows during removal, and is gentle enough to prevent irritation even on sensitive skin. Eye Safety Tape is available in adult, pediatric, and sensitive skin options.

Benefits	Eye Safety Tape	Medical Tape
Reduces the risk of corneal abrasion	✓	✓
Helps prevent eyes from drying out	✓	✓
