

The solution to floor suction has been found.

The Big Foot™ Suction Disc is designed to continuously vacuum fluid off the floor during low-, moderate-, or high-fluid-intensive surgical cases. The design allows for easy repositioning to effectively remove fluid on the operating room floor.

Big Foot® | Suction Disc

TYPENEX 
MEDICAL

Big Foot® | Suction Disc

Features and Benefits

16 Suction Ports — Ports are strategically distributed across the device to maximize fluid removal.

Quiet — Effectively vacuums and removes fluid without disturbing communication between clinicians.

Sleek Design — Easy to maneuver and reposition on the floor to address areas of high fluid volume.

Compatible — Suitable for all standard OR suction systems through a simple attachment of tubing.
