SAFETY PRECAUTIONS

6. This product is limited to use with the matched components (including the parts that are equipped with the product and sold independently by this company), such as stirring tool apron, main engine and so on. Please don't use the mismatched components to avoid affecting product performance or accidents.
7. Please check whether the electrical part, cup body and other parts are intact before use. If any damage is found, please stop using and contact with our customer service department in time. Please don't disassemble and repair by yourself to avoid affecting the product performance or accidents.
8. If the flexible cord is damaged, it must be replaced by professionals from the manufacturer, its maintenance department or similar departments for avoiding the danger.
9. Please don't use wet hands to plug or pull out the power plug to avoid getting an electric shock. Please hold the plug by hand to pull it out and don't pull the power supply when disconnecting the power supply. Please don't touch the power cord with sharp edges, sharp corners and other objects to avoid the damage and leakage of electricity.
10. Please put it on a stable table when using this product. Please don't operate it on unstable, soft (such as bedspread) or heat-prone surfaces (such as tablecloth, including carpet, towel, plastic, paper, etc). Please keep away from the edge of the table to avoid dumping or accidents.
11. It is forbidden to use the product with no-live load (no ingredients in the cup) or overload (the quantity of ingredients exceeds the rated value).
12. The running speed of the product has been set to the ideal state without the need for adjustment.
13. Please make sure that the product has the sealing ring to avoid leakage when installing the components of tool apron. Please ensure that the components of cup body and tool holder are installed in place. Please don't install the tool apron on the principal part separately.
14. Please make sure that the switch is off before turning on the power, and the tool apron and other parts have been installed in place, so as to avoid interruption to the machine or personal injury.
15. Please turn off the on-off switch and power supply before replacing parts or touching moving parts.
16. It is forbidden to move the product, lift the cup or touch the blade, motor and other movable parts when the product is working, so as to avoid personal injury or damage of the product.
17. Please turn off the switch and power supply to avoid leakage or accidental activation before removing, installing, adjusting or cleaning any parts of the product.
