SMALL

26.5”L x 16”W x 9.5”H
Volume: 17 Gallons

BASIN MATRIX ASSEMBLY GUIDE

Each small basin matrix is made up of two (2) large panels, two (2) small side panels, and four (4) end / center support panels.

Scan for YouTube Instruction & Installation Tips Video

1. Lay one large side panel flat on a solid surface. The ground works well because it will allow you to utilize a greater downward force when performing the following steps.

2. There are nine (9) rows of holes for setting the support panels. Push the four (4) end / center panels into place utilizing the two (2) end positions and the two (2) rows located on either side of the center position.

3. Place the second large side panel on top of the four (4) support panels. Start at one end and work one complete row at a time into place making sure to keep everything aligned.

4. Finally, press the two (2) small side panels into place in the same way by starting at one end and working your way across one row at a time.

LARGE

26.5”L x 16”W x 17.5”H
Volume: 32 Gallons

Each large basin matrix is made up of four (4) large side panels, and four (4) end/center support panels.

1. Lay one large side panel flat on a solid surface. The ground works well because it will allow you to utilize a greater downward force when performing the following steps.

2. There are nine (9) rows of holes for setting the support panels. Push the four (4) end / center panels into place utilizing the two (2) end positions and the two (2) rows located on either side of the center position. Be sure you insert the long tabs at this stage leaving the short tabs facing to the sides.

3. Place the second large side panel on top of the four (4) support panels. Start at one end and work one complete row at a time into place making sure to keep everything aligned.

4. Finally, press the two (2) remaining large side panels into place in the same way by starting at one end and working your way across one row at a time.
