

VidAI

An AI-Powered Wedding Planning Assistant

▶ WHAT IS VIDAI:

VidAI is an AI-powered platform that seamlessly blends rich cultural traditions with modern event management. Utilize our intelligent tools to effortlessly track budgets, source culturally aligned vendors, and generate perfectly tailored event workflows.

▶ KEY MODULES:

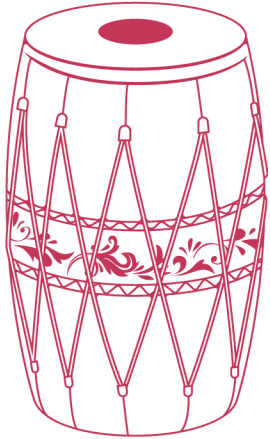

- Automated Budget Tracking
- Multi-Event Planning
- AI Vendor Recommendations
- Booking Management
- Digital Invitation Generation
- In-App Chat

▶ TECH STACK:

- Gemini AI API
- Ollama (Llama 3.2:3b)
- React Native
- React
- Node.js / Express
- MongoDB

▶ OUR VISION:

VidAI solves a real problem, which is that wedding planning in Pakistan is fragmented, stressful, and largely undigitized. The platform brings couples and vendors onto a single, AI-powered ecosystem where discovery, communication, budgeting, and booking happen in one place, on any device. The architecture is built to scale, the market is massive, and the product is ready to grow from a working prototype into a commercial platform.
