

Hearth Compatible

OPTIONAL

The Tinderbox range are all ECODesign 2022 ready, Smoke Control Area Exempt and a A+ Energy Rating.

Designed in the UK.

The body of the stove is made from high grade steel with a durable cast iron door.

Easy to use and highly controllable independent primary and secondary air controls.

CONSTRUCTION

Key features include 5mm and 8mm steel seam welded stove body construction and cast iron door. The firebox is lined with 30mm vermiculite panels. Polished black handle and air control.

VARIABLE AIR FLOW SYSTEM

The air slider allows you to easily control the combustion of your stove.

TERTIARY AIR

The powerful tertiary system is central to the stoves efficiency and cleanliness. Pre-heated air is drawn into the fire chamber and injected into the path of the gases produced during primary combustion. This re-ignites the gases resulting in a significantly cleaner and more efficient fire.

EASY INSTALLATION

All Mi-Fires stoves are equipped with an installer friendly 125mm outlet allowing you to flue the stove from the top or rear.

Discreet levelling screws hidden in the legs ensure that the stove can be secure no matter how uneven the hearth surface.

Small Multi Fuel
