

LAT PULLDOWN

SH-G6806

Enhanced Handle Height Adjustment

The previous model had a limited range for taller users. The handle height has been increased to offer a broader range of motion and accommodate users of varying heights.

Improved Stability

A support bar has been added beneath the seat to prevent backward tilting during heavy-weight training, significantly enhancing overall machine stability.

Optimized Seat Structure

The seat now features a built-in gas spring, providing smoother and more convenient height adjustments.

Streamlined Design

The cup holder and PC panel have been removed to streamline the design, enhancing the overall aesthetic and functional coherence of the machine.
