

**SH-G6901**

Adjustable Starting Position for Customized Comfort

Features an adjustable starting position mechanism with four selectable levels, accommodating users of different body types for optimal range of motion. This enhances comfort and safety by reducing strain at the beginning of each exercise.

Ergonomically Optimized Handle Design

The handle angle is precisely engineered for natural wrist alignment, minimizing joint stress and providing a smoother force application for maximum training effectiveness and joint protection.

Footplate Angle Optimization for Glute Activation

The footplate is designed with a posterior tilt and dual-angle configuration, effectively optimizing the angle of force transmission for increased gluteal activation during leg presses.

① ADJUSTABLE STARTING POSITION

Starting position now offers 4 adjustable levels, fitting different body types and reducing injury risk during heavy training.

② OPTIMIZED SEAT ADJUSTMENT STRUCTURE

New rear tension spring design improves seat stability and ensures smoother adjustment.
