

OLYMPIC INCLINE BENCH

SH-G6373

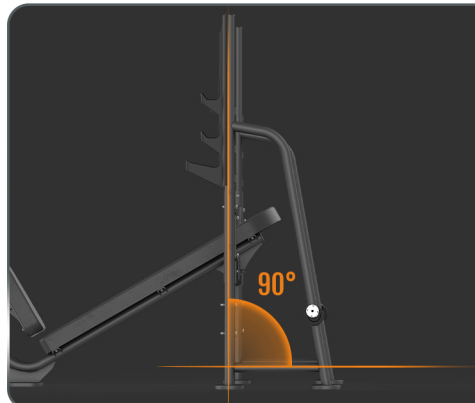

Optional Safety Bar System with Multi-Level Adjustment

Optional safety bars prevent accidental barbell drops and feature 10 height adjustments to suit different users and exercises, ideal for squats, bench press, and other free-weight movements.

Ergonomic Optimization for a Wider User Range

Dual-position barbell hooks accommodate different arm lengths, body sizes, and lifting styles, enabling smoother racking and unracking with improved comfort.

Upgraded Structure for Superior Stability & Heavy-Duty Performance

The SH-G6373 adopts a redesigned vertical upright structure with extended rear supports, replacing the traditional angled frame. This improves load distribution, reduces backward tipping during heavy re-racking, and ensures greater stability for high-intensity commercial use.

Commercial-Grade Safety Professional Durability

Purpose-built for commercial gyms, the SH-G6373 balances safety, durability, and modular expandability, ensuring reliable performance under high-frequency, long-term use.
