

THE DENTAL
SOLUTIONS
COMPANY™

Intego & Intego Pro

Performance you can rely on

dentsplysirona.com/intego

Your reliable partner

Intego is the best treatment center of its class. It is based on the innovative power and award-winning design of our existing treatment centers. As a reliable partner for an efficient practice, Intego has all the features that provide optimal support: ergonomic design for better work-flows, high quality standards in processing and design, and a great value – this is why Intego is our performance class.

Great value

Excellent performance and innovative functions at a great price, customized options for great value.

Ergonomic design

Designed for intuitive handling and optimized, integrated workflows.

Quality made in Germany

Defined quality assurance processes, durable materials, and sturdy, future-proof design.

It's up to you

One size fits all – we know that in a dental practice, very often this is not true. This is why Intego comes in two versions to match your individual requirements.

Intego

If you are looking for a treatment center to optimally support your personal workflows at a fair price, Intego is your choice. While being simple to operate, it brings all relevant functions where you need them to be. The

ergonomic design offers high comfort to both you and your patients. The Compact water unit with a fresh water bottle makes it easy to comply with all infection prevention regulations.

Intego Pro

The highlight of Intego Pro undoubtedly is its comfort water unit, that brings a comprehensive infection prevention concept to your practice. The integrated disinfection system reduces the workload of your team

through automatic purging and sanitization of the water lines, as well as a permanent disinfection with Dentosept S.

Intego TS (OTP arm design)

- Ergonomic positioning of the dentist element due to a wide range support arm system
- Functional tray system with detachable tray that can be positioned flexibly

Great value you can rely on

Your work day is complex and places many different demands on the treatment center you choose. Intego gives you the perfect solution: Choose from two treatment concepts that you can configure flexibly. Whether you select a whip arm or a hanging hoses design – every option offers optimal performance at a fair price.

CS – The whip arm design

- Ideal for the widest range of treatment situations with four- or two-handed dentistry
- Can be rotated up to 240° for optimal positioning
- Maximum distance between the dentist element and instruments is 90cm

- 1 Sprayvit E**
Optimal visibility due to integrated LED light.
- 2 BL ISO E motor**
Sterilizable brushless motor with speed and torque control during treatment. Especially lightweight, compact and with a wide speed range.
- 3 SiroSonic L scaler**
Handpiece and tips can be sterilized. Controlled, straight oscillation with electronic power and water control.
- 4 SiroCam F or AF or AF+**
Detailed intraoral images with the easy to operate SiroCam F or AF/AF+ with autofocus.

Intuitive operation

Difficult treatments require your full concentration. This is why Intego is intuitive – with two state-of-the-art user interfaces and innovative instruments for stress-free treatment. So you can concentrate on what's really important – your patient and a perfect treatment result.

State-of-the-art, intuitive interfaces

EasyPad

Clear and intuitive user interface – standard in Intego. Basic Endo function available with EasyPad.

EasyTouch

This user interface can be optionally integrated. More operating comfort thanks to intuitive touchscreen technology and additional operating and display options. Required for advanced Endo function.

Integration possibilities for endodontic treatments

The integrated endodontic function of Intego is the ideal solution for dental professionals looking for more safety, efficiency, and simplicity in performing endodontic procedures. Having everything integrated results in a streamlined and absolutely hygienic workflow and reduces set up times to a minimum.

ApexLocator
An ApexLocator can also be integrated into the EasyTouch to allow for permanent control of the working depth during endodontic treatment and a reduction of X-ray exposure.

Integrated Torque Control
Speed and torque can be preset for 6 different files, and the motor stops automatically when the set maximum torque is reached. This ensures greater safety for endodontic treatments.

Heliodent Plus unit model
Fast, reliable intraoral X-rays with the Heliodent Plus unit model. The durable X-ray unit gives you maximum flexibility and optimal image quality.

**T1 Line contra-angle handpiece
Endo 6 L with light**
Improved visibility during endodontic treatment increases the rate of a successful treatment. Another available option without light is the contra-angle handpiece Endo 6:1.

Reciprocal file systems

Intego integrates the Dentsply Sirona Maillefer and VDW reciprocal file systems, enabling a fast and easy use of common file systems.

- WaveOne®
- WaveOne® Gold
Reciprocating Files
- Reciproc®
One file endo

Impressive patient comfort

Your patients will also appreciate this comfort: The Intego patient chair has an ergonomic design and, together with the headrest, ensures that your patients are especially comfortable. The chair lowers far enough for even shorter patients so that they can get in and out easily. And there is no doubt – patients who are comfortable feel more secure and remain loyal to your practice.

Dentsply Sirona's unique ErgoMotion for Intego

Your benefits

- Better positioning for maxillar or mandibular treatment
- Less overstretching of patient's head
- No overstretching and compressing of patient's spine
- No readjustment of headrest necessary

Double articulating headrest

Quickly adjustable to various treatment situations as well as patients with varying statures.

Premium/Lounge upholstery

The high-quality upholstery ensures comfort evenduring long treatments.

ErgoMotion

The tilting of the backrest matches the movement of the patient's spine to prevent stretching and compression effects.

Armrests

Your patients can rest their arms comfortably.

Lifting system

The unique chair lift drive gently moves patients into the proper position.

Vario footrest

The Vario footrest that comes with the Premium upholstery can be easily extended to provide even very tall patients with ergonomic positioning.

Safety you can rely on – with Intego

Dentists all over the world have the highest demands for the safety of their patients and practice team. The Intego infection prevention concept is designed so you can comply quickly and easily with all infection control regulations. The assistant element and water unit designs make infection prevention procedures even easier and less time consuming. All of this guarantees perfect infection control.

Intego with
compact water unit

Cuspidor

Removable and swiveling, easy to clean, and easily accessible.

Purge function
Manual purging of all instrument waterlines on the dentist and assistant side.

Suction systems

Compatible with all conventional wet and dry suction systems, including amalgam separator.

Intego

The Compact water unit and assistant element can be adapted to many different demands and requirements by freely selectable suction systems and infection prevention options.

Fresh water bottle

For controlled water quality. Can also be filled with Dentosept S solution for permanent disinfection and manual sanitization.

Automatic suction hose cleaning

Cleaning adapter for automatic flushing of saliva ejector and HVE.

Smooth surfaces

The largely gap-free design of the surfaces ensures maximum infection control in the shortest time possible.

Safety you can rely on – with Intego Pro

Dentists all over the world share the highest demands for the safety of their patients and practice team. The Intego Pro infection prevention concept is designed so you can comply quickly and easily with all infection control regulations. The assistant element and water unit designs make infection prevention procedures even easier and less time consuming. All of this guarantees perfect infection control.

Intego Pro with
comfort water unit

Cuspidor
Removable and swiveling, made
of high-quality glass.

**Purge and
Autopurge function**
The instrument hoses can
be flushed for a short time
or cleaned intensively via
the cleaning adapters.

Suction systems
Compatible with all conventional
central wet or dry suction systems,
including amalgam separator.

Intego Pro

The Comfort water unit and assistant element are based on a comprehensive infection prevention concept.

Integrated disinfection system
Permanent disinfection of all water
lines with Dentosept S. Automatic
sanitization function for regular
intensive disinfection. Can also be
used as a self-contained water
supply.

Integrated cleaning adapters
For automatic purging of
instrument hoses (Autopurge) and
sanitization of the water lines.

Chemical suction hose cleaning
Cleaning agent container for
chemical flushing of the suction
lines. The concentration of cleaning
agents can be individually adjusted.

Intego Ambidextrous – a masterpiece of flexibility

Ambidextrous option available for both
Intego and Intego Pro

Perfect ergonomic turning

In organizing an efficient everyday practice routine, it is essential that the practice equipment can be adjusted not only to your requirements, but also to the requirements of your team. This is an even greater challenge in a group practice, where a treatment center will be used by several dentists. The treatment area must be quickly and easily adjustable. This process must also be absolutely safe and stable. The Intego Ambidextrous is designed precisely for this purpose.

The turning process in a nutshell

1 The turn process is activated by a single step on the respective foot pedal and the backrest moves automatically in the designated Turn position.

2 As the water unit is smoothly moved behind the backrest on a robust support arm, the dentist element and OP light can be simultaneously swiveled to the new position with no additional space required.

3 Finally, if they are existent, tray holder and camera support can be swapped.

Your benefits

Fast

Due to the intelligent mechanism design, the treatment position can be switched in just 15 seconds.

Easy

There is no need for special training, the process can be intuitively handled by your team. The swivel mechanism is released with just one click on the foot pedal and the backrest travels automatically into the correct position.

Elegant

The treatment center can be converted smoothly and effortlessly in a single flow. No jerky movements, no screws, no assembly.

More freedom of movement with no extra space needed

Intego Ambidextrous provides great flexibility in a small area. Despite the conversion option, no more space is required than for our existing Dentsply Sirona treatment centers. The intelligently designed rotating mechanism enables compact and space-saving movement at all times in every phase. During the conversion process, the treatment center remains completely stable in all positions. The water unit is guided safely and in a controlled manner around the backrest – this rules out the risk of damage. The following figures exemplify the fact that Intego Ambidextrous in every phase of the conversion movement does not require more space than other Intego treatment centers.

This figure illustrates the required space of any Intego when used in 12 o'clock treatment position.

This figure illustrates the maximum required space of Intego Ambidextrous with Comfort assistant element during the conversion process.

Perfect ergonomic position for every treatment

Achieve perfect results even at the end of a long working day – with your expertise and the support of our treatment center. No matter if you prefer to treat your patients as a right- or left-handed practitioner, in every situation you will benefit from intuitive sitting, comfortable positioning, optimal visibility and integrated workflows. This combination will lead to perfect clinical results.

More freedom of movement

- Thin backrest for ideal freedom of leg movement
- Flexible positioning of the foot control
- Easy height adjustment via dentist element or optional foot switch
- Swiveling cuspidor

Optimized instrument placement

- Perfect coordination of dentist and assistant element
- Flexible positioning of the additional tray for more storage place
- Compact and comfort assistant element based on your treatment concept

Comfortable working stools

- Hugo, Carl, Paul
- New: Saddle stool Theo for improved lower jaw treatment
- Supports healthy sitting position throughout the day

Optimum visibility

- Double-articulating headrest for quick and flexible adaptations
- Flat headrest with variable positions through the magnetic cushion
- LEDview Plus or LEDlight Plus operating light, LED instrument light

Design meets function

Prestigious design awards such as the iF communication award and the red dot design award bear witness to the outstanding design quality of the Dentsply Sirona Treatment Centers. Intego offers an enormous range of design options for your practice with three different color schemes. Let your imagination run free and put together the perfect combination.

Upholstery colors

The elegant world

Carbon*

Upholstery options

Premium upholstery

The high-quality, seamless upholstery ensures comfort even during long treatments.

Lounge upholstery

Soft, pleasant surface material and comfortable filling for the utmost relaxation. Contoured surface for perfect positioning.

Flexible into the future

In a good practice, customized settings add to your comfort. This is why you can configure the Intego Pro exactly the way you need for optimal support of your treatment workflow. But flexibility means even more to us – and you can prepare Intego Pro with technical options and interfaces so you are ready for future applications.

Many models

Choice of two headrests

The flat headrest can be adjusted quickly and flexibly. Optionally, you can select a double articulating headrest that is easier to position and allows you optimal visibility even in difficult-to-see areas.

Flat headrest

Quality you can rely on

We don't want to just satisfy our customers, we want to impress them. This is why quality, performance, and service are key for us. Dentsply Sirona treatment units combine high quality with real innovations that perceptibly enhance treatment comfort and workflow.

Reliability and durability

Precise, elaborate quality tests and robust materials make Intego Pro a reliable treatment center with an above-average service life.

High quality

Intego Pro immediately shows our attention to detail. The materials used – robust, shapeable plastics, solid steel and aluminum components on the inside, high-quality glass and upholstery – meet the high quality demands of a premium product.

High standards

Dentsply Sirona is a technology leader with more than 130 years of innovation history. Our engineers and scientists in Research & Development not only pay close attention to innovation, but also quality.

Future-proof design

At the Dentsply Sirona innovation center, future trends are anticipated and products are prepared to be equipped for the technology demands of the future.

Individual configuration

Intego

Basic unit
Patient chair - Premium upholstery - Pneumatic foot control - Flat headrest - Ambidextrous option Dentist element 5 instrument positions - EasyPad user interface - Supply for 2 drill drives Assistant element - Compact version on a swivel arm directly mounted to the cuspidor 4 handpiece positions - Saliva ejector and HVE Water unit - Standard wet suction - Ready for integration of a fresh water bottle - Cuspidor with manual swivel function
