The Trusted Name In Nitrous

PorterInstrument.com/Silhouette

Robert Guyette,
D.M.D., M.D.

Designed By An Oral Surgeon To Make Nitrous Oxide Easier To Use

The Porter SILHOUETTE nasal mask is the brainchild of Robert Guyette, D.M.D., M.D., an Oral and Maxillofacial Surgeon in Scottsdale, AZ. Dr. Guyette recognized that the available nitrous oxide masks made it difficult to access the oral cavity during procedures which resulted in him avoiding using nitrous oxide for his patients.

His solution was to design an anatomic, low profile mask that fits comfortably over the patient's nose while also allowing his patients full range of head motion – and SILHOUETTE was born!

Now, after years of successful application in dental offices around the world, SILHOUETTE has been redesigned with a number of enhancements, making it even better – along with a new lower price.

Description

Like its predecessor, Porter's new and improved SILHOUETTE nasal mask is a translucent, single-use nasal mask and breathing circuit designed with lightweight tubing and a comfortable, conforming mask. It provides unobstructed access to the oral cavity and full range of motion for the patient.

Traditional nasal mask

Porter SILHOUETTE nasal mask

Features & Benefits

The new SILHOUETTE mask is narrower, flexed in, and combined with the new support bars, pulls the mask in against the nose. Other advantages over traditional nasal hoods include:

- Conforming shape and fit without adhesive
- Enhanced scavenging efficiency
- Colored masks for easy size identification
- Disposable mask and circuit for improved infection control
- Four size options
- New nasal barb shape and size for improved flow and comfort
- Mild mint scent
- Capnography port in each mask
- No tubing behind headrest
- Protective eyewear fits over mask

SILHOUETTE allows unobstructed access to the oral cavity and full range of motion.

SILHOUETTE Low Profile Nasal Mask And Breathing Circuit

Fits securely without adhesive

New and improved mask design

Built-in capnography port

Single-use mask and tubing for improved infection control and efficient room turnover

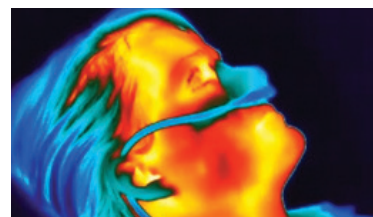

A Comfortable Fit For Patients

The new and improved SILHOUETTE mask is designed to fit comfortably and securely over the bridge of the nose without adhesive.

Scavenging Efficiency

Visit our website to see videos of SILHOUETTE's scavenging efficiency.

Mask redesigned to pull in on the nose and fit securely. Cannula shape and size redesigned to improve flow as well as a smaller size for small and pediatric masks.

Patients can wear protective eyewear and maintain an excellent seal of the mask.

Tubing is in front of the patient (versus behind headrest) which allows for full range of head motion. Patients can turn their head, sit up, and rinse without the mask becoming dislodged.
