## EXPERIENCE

### Housecall Pro UX ENGINEER/FRONTEND, San Diego

2019 - 2021 Built core features, setup a design system built on top of multiple component libraries.

- Created a design system based on Brad Frost's *Atomic Design*.
- Integrations with *Figma* & *Storybook*.
- Built a calendar integrating *React-Big-Calendar*, used by our customers on a daily basis, with custom views.
- Built custom react components for new features.

### UBER FRONTEND ENGINEER, San Francisco

2018 - 2019 Built apps for a self-service Driver Support Kiosk. Including a **Check in App** & a **Kiosk App** with video chat, SMS texting service, driver search, kiosk settings & status.

- Integrated Uber internal services hitting different APIs including an SMS Texting service and a driver search.
- Created a *Chrome extension* for screenshare using *Twilio* API.
- Collaborated with the design team improving user experience and cutting call times in half.

### Shyp FRONTEND ENGINEER, San Francisco

2017 - 2018 Worked in a small team building new features for Shyp.com and internal tools using React / Redux.

- Created React components to expand component library.
- Improved web product UX experience for customer facing app.

## PROJECTS

**INSTASHOP** Full-stack single page app. Frontend: React/Redux. Backend: Ruby on Rails. API: Cloudinary for storing assets.
