Section A

Question 1.

Read the following text carefully :

Climate change and sustainability of environment are two pressing issues that have captured global attention. In recent years, the world has witnessed a surge in extreme weather events including severe droughts, cloud bursts, floods, land slides, receding coastlines and the alarming melting of arctic ice and Himalayan Glaciers. Wildfires have become more frequent and intense.

In this context, sustainable agriculture emerges as a crucial solution. This refers to those farming practices that meet today's requirements while preserving resources for the future generation. This means adopting methods that protect the environment, reduce dependence on chemical inputs, efficiently using water and land and ensuring socio-economic equity for farmers.

On one hand sustainable agricultural practices are necessary, on the other, they are often more expensive to implement compared to conventional methods. Sustainable practices like organic farming, climate – smart technologies, modern irrigation system may seem costly upfront, but they offer long-term benefits by improving productivity, and environmental stewardship. Without accessible and affordable financing options, the much needed shift to sustainable farming practices will remain a distant dream for many.

Therefore, sustainable finance should not only promote eco-friendly practices but also ensure that financial resources are available to the farmers who need it.

Question 2.

Read the following text carefully :

Balance of Payments (BOP) systematically summarise, the economic transactions of an economy with the rest of the world, over a given period of time. The BOP can be broadly divided into two accounts namely :

- current account
- capital account

The current account measures the transfer of goods, services, income and transfers between an economy and rest of the world. The current account may be sub-divided into merchandise account and invisible account. Merchandise account consists of transactions related to export and import of goods.

In the invisible account, there are three broad categories :

Non-factor services such as travel, transportation, insurance etc.

Transfer which do not involve any value in exchange.

Income which includes compensation of employees and investment income.

The capital account reflects the net changes in financial claims on rest of the world.

The capital account can be broadly broken up into two categories :

- Non-debt flows such as direct and portfolio investments.
- Debt flows such as external assistance, commercial borrowings, nonresident deposits etc.

The sum of the two accounts indicates the overall balance, which could be either be in surplus or deficit. The movement in overall balance is reflected in changes in international reserves of the country.
