Best facebook alternatives: List of 2021

How many hours have you spent on social networking platforms?
About 14 hours, people visit their social profiles in a day.

We all are aware of Facebook use. Lately, Facebook hurt its users by changing its privacy policy. When we are on a network, we demand privacy. But what if there are security issues?

In this era of innovation, companies work hard to introduce new apps. Socializing apps are on the top. We all have a large number of professional & non-professional relationships. We want to be secure.

We researched & found the best Facebook alternatives for 2021. These socializing apps are amazing but with little bit feature changes.

Some of these apps are common. You may have knowledge about them. But some are amazing & unknown to you.

Note: We do our best to provide you with the best of best quality content but, If you find we do not provide value in our content or our list arrangement so please tip us to improve our user experience.

Let's find the app for the best connection!

Best facebook alternatives for media sharing

Instagram

1. Instagram

Photographers always love to capture moments. Instagram is my favourite platform for photography. While I can share my stories too. In the past, we knew it as the Facebook competitor. But now it is part of Facebook.

It has almost 400 million active users that connect every month. The average is increasing day by day.

Users upload thousands of images within a few seconds. It connects to your other networking sites. You can also upload a video but just limited to 15 seconds. Settings are good. There is no issue of privacy.

[Visit Discord](#)

4. MeWe

This platform has an attractive interface. Features are the same as Facebook have. You can say it is a replicated social network of Facebook. The user's information is safe here.

[Visit MeWe](#)

5. WT social

It is a social app just like Facebook. WT social apps for non-toxic social networking. The Wikipedia co-founder Jimmy Wales launched this social network. The purpose is to enhance microblogging. Its important feature is that it does not collect user's data.

WT social does not store your data. In this way, your data remains safe. In fact, it does not supervise the user's activity. Users are free to use without any data-stealing fear.

The owners have strict rules & regulations against misleading content. Users have the right to change or edit their information. Contributors can edit any misinformation.

Another good feature is that it removes members who violate rules & regulations. You will feel free as it is a plain & simple social platform.

[Visit WT Social](#)

6. EyeEm

In 2011, EyeEm compensated for the photo-sharing feature of Facebook. Users can upload & share iPhone photos. Photographers must use this app.

A photographer can share their art on EyeEm. Other users can also share, appreciate this art, & can learn from it.

There is also the option of doing business. Yes business, you can start a business by selling your stock photos. That's why it contains more than 100 million high-quality images. This feature makes it highly popular with brands & marketing agencies.

It does not give advertisements but uses artificial intelligence for better results.

[Visit EyeEm](#)

7. Yubo

Yubo is an interesting socializing app. Have a look. We are sure you will love it. It does not contain ads. Hence, Yubo cares about your privacy too.

It collects little data but just for making the user's experience better. You can read its terms & conditions. These are easily understandable.

It focuses on live streaming. Members can organize live streaming with 10 guests with unlimited viewers. You can see hot topics on the top of this app for live streaming.

The target users of this app are from 13 to 25. For youngsters, Yubo divides members into two communities. Elders cannot interact with youngsters.

[Visit Yubo](#)

8. Sociall

Sociall is a similar app to Facebook. The main motto is maintaining the privacy of users. It follows the standard features. Users can create posts, follow others, & find new content. It keeps your posts private as per your permission.

This platform implements blockchain technology. Owners store your data in different places. It makes it impossible for hackers to hack the system. So, your data is secure here.

Sociall gives you free choice to remove spam or posts.

[Visit Sociall](#)

9. Friendica

It is another social media platform that promotes more freedom. Friendica is a little bit more complex than Facebook. It depends on the developer that they can make it easy. Contributors have the choice to create an installation process. This process is similar to WordPress on websites. It is interesting to know that friendica is not a one-person property. Some are volunteers that add their part in this app.

You need to install software that should be compatible with your device. This software will help you to create an account with friendica. It connects people to people. You should contact companies or people. Your social circle is only able to see your posts.

It gives the choice to insert contacts from other social apps. So, you will find it more relaxing.

[Visit Friendica](#)

10. Ello

In 2014, Facebook changed its policy. Ello presents itself as the best social network. It says that Facebook is a killer social network. This app does not push ads. Moreover, it does not sell user's data to third parties.

Ello started a #deletefacebook campaign. Users feel secure on this network. It is the most growing network than Facebook.

Artists feel here like home. All types of users love it.

[Visit Ello](#)

11. Steemit

It works like both Reddit & Quora. You can publish your posts & content here. However, it is a good platform for cryptocurrency.

If you do not want to post content, it's ok. You will get involved in conservation-related to all aspects.

Steemit has a record of about 10 million visits per month. This is a huge audience. It proves that it is growing speedily.

[Visit Steemit](#)

Bye Bye!
