11. Open accidentally removed tabs

Sometimes, chrome does not respond, and you have to close it. And it removes all tabs. So, when you reopen it chrome will give you an option to restore all recently closed tabs. Another way is by using history to open your recently closed tab.

12. Open Specific Pages

To open specific pages, go in the settings menu, click on startup, and pick what you have open and what you want to pick up on startup. You can add or delete pages as you see the list.

13. Bookmark tabs with one link

To save all tabs right click on the tab. The last option will be to bookmark all tabs. This will save you all tabs.

14. Voice Search

Voice search is one of the best features. Google chrome uses your voice and grants permission to record your voice. By speaking in google voice search you can easily search out for anything. The voice search icon is given in the corner of the chrome search bar. In this way, you don't have any need to type on the search bar. Google will show you the result of what you have spoken out.

Q Search Google or type a URL

15. Guest Mode

If you are giving your phone to someone's else. So go to the guest mode. It will remove your account and passwords from chrome and help to secure your data.

J

For this purpose click on the icon on the top right corner. Now click on the guest. This would sync all your information and remove all of your histories. It will also secure your data from others.

16. Play T-Rex game

When the internet is not working this will be shown on your screen. You can play this game by pressing the space button.
