

UNDERSTAND THE TIMES. FEAR NOT! BE READY!

Moving from panic to preparation without hiding from what's real, and without being ruled by fear of it.

The core tension

Awareness should produce readiness, not dread.

2 Timothy 1:7

God has not given us a spirit of fear, but of power, love, and a sound mind.

Luke 19:13

Occupy / do business until I come.

Unhealthy fear

Hides from evidence, panics under pressure, and makes emotional decisions.

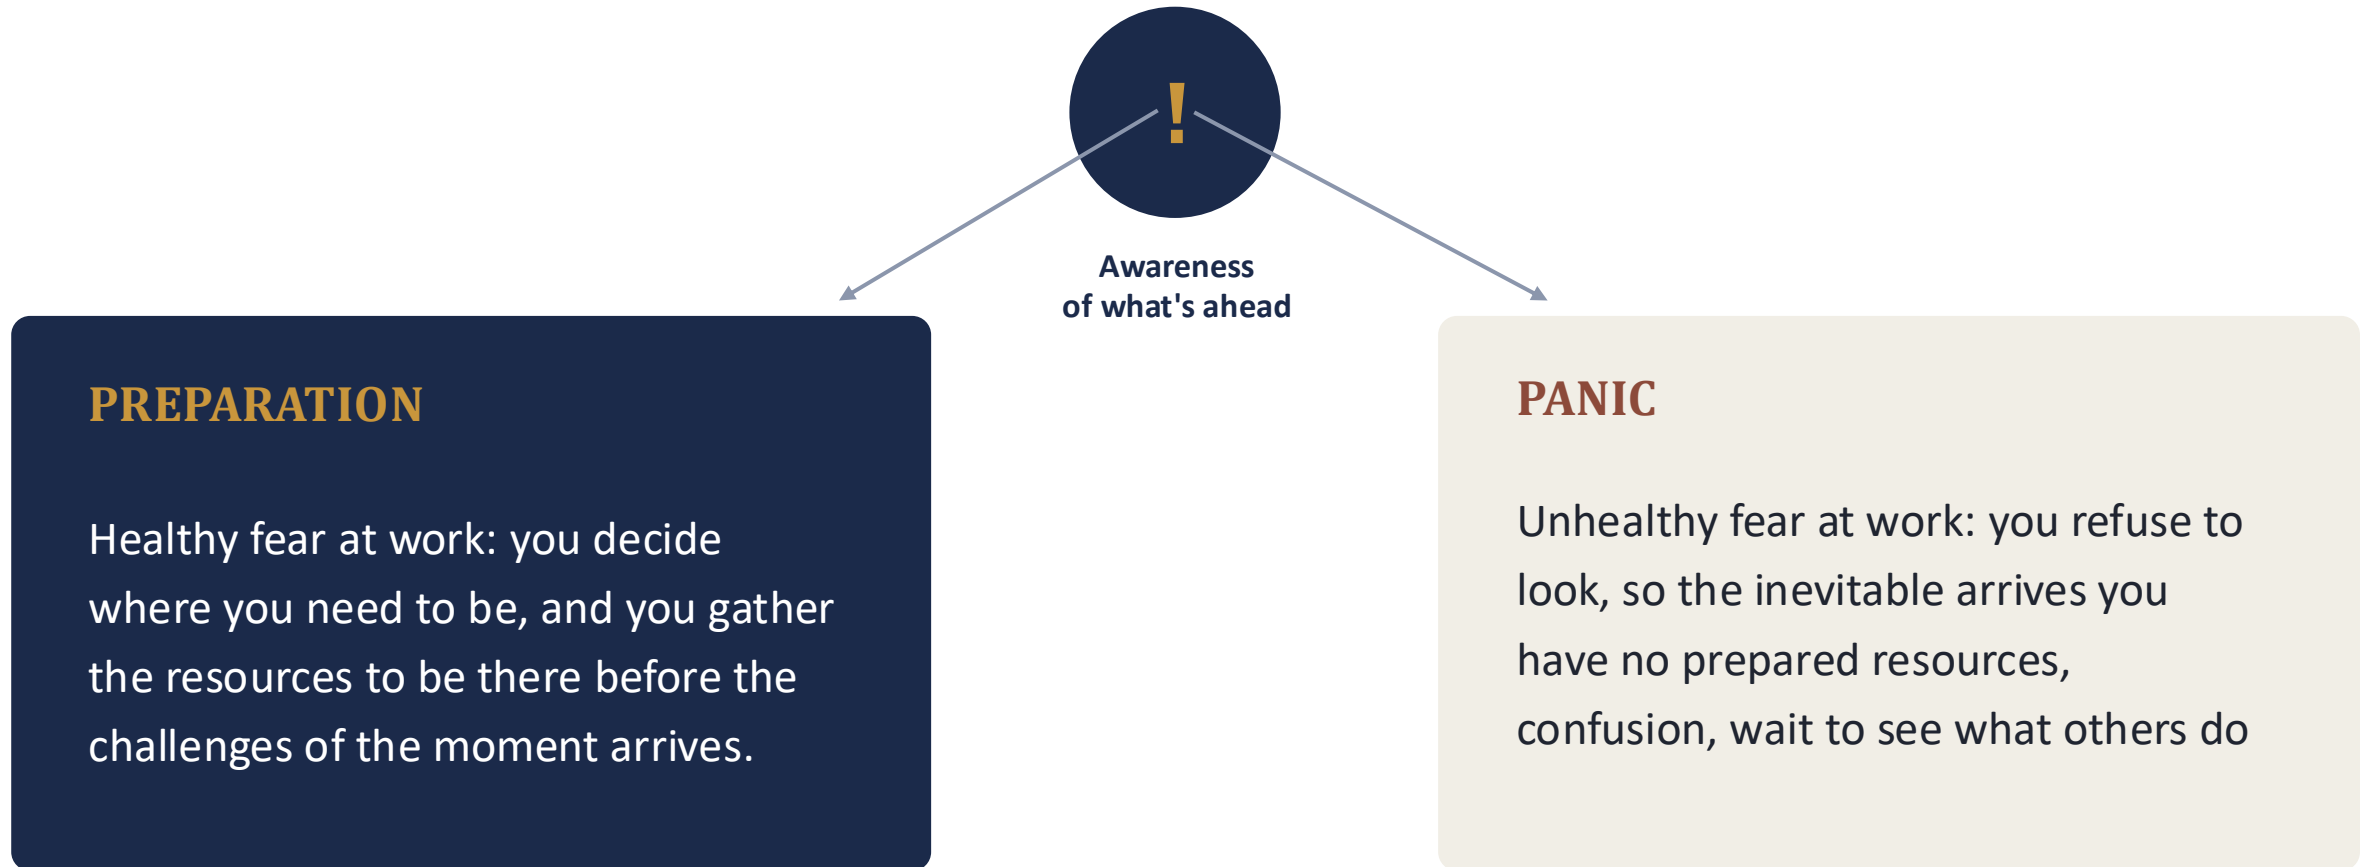

Healthy fear

Respects the element producing the fear, becomes thoughtful, counts the cost, seeks resources, and gets positioned.

Kingdom posture

We watch, pray, build, serve, and prepare communities to endure and be a witness.

Every Challenge Sends You One of Two Ways

What's Actually Producing the Fear?

01 The Reckoning

Scripture's own warning about judgment - the part preachers often soften

02 Revelation

A book many fear to open, given for the opposite reason

03 AI & Machines

Systems that promise to know us, decide for us, replace our labor

04 Policy & Control

Laws, surveillance, and systems that press on daily freedom

05 Famine & Scarcity

Food, water, and resource pressure in a changing world

06 The Enemy's Intent

A real, ongoing intent to pressure and destroy God's people

Every scheme meant to pressure and destroy God's people has also been an opportunity for God to display His glory. Ask Daniel... Ask Joseph...

The Warning We're Afraid to Say Out Loud

Scripture presents hell as real and judgment as coming. Many preachers avoid the subject...for the sake of comfort; being afraid of the face of man, rather than say plainly that a reckoning is ahead.

HOWEVER

Those whose garments are washed, those who belong to Christ, partake in the kingdom now and in the hereafter. The warning isn't given to terrify people. It's given so they're aware.

*A Simple Truth in Scripture:
Those whose garments have not
been washed in the blood of the
Lamb will not partake of/in His
Kingdom.*

What Revelation is for

A letter of unveiling, endurance, worship, witness, and warning.

Not a codebook for date-setting.

It reveals Jesus, exposes the world system, calls the church to prepare and to endure hardship, and keeps hope alive under pressure.

Reveal

Jesus is central - not the beast, not fear, not assumptions.

Resist

Every human kingdom becomes anti-God in its endeavors when it detaches from God.

Remain

The saints overcome by faithful witness, worship, and endurance.

End-Time Pressures

1

Technological

AI decision-making, biometric systems, the pace of automation

2

Economic

Debates over universal basic income, digital currency

3

Environmental

Climate policy, resource strain, water and land pressure

4

Geopolitical

Unrest, propaganda, and laws that reshape daily freedom

These aren't settled predictions. They're pressures already shaping daily life, and reasonable people read them differently. The question worth asking of any of them: is this strengthening my dependence on God, or am I giving up or hiding in fear?

Artificial intelligence: tool, temptation, test

Tool

AI can assist research, medicine, education, translation, planning, and productivity. Steward it.

Temptation

Counterfeit intimacy, replace human authority, manipulative media/media, job displacement, surveillance at scale. Test it.

Test

Will we keep the image of God, truth, labor, and conscience above convenience? Govern it.

Discernment question: “Does this technology complement human stewardship or replace moral responsibility?”

When Technology Starts Speaking Like Religion

“JESUS-LEVEL MIRACLES”

In 2026, Elon Musk described his brain-implant company Neuralink's work; restoring speech, movement, and sight, in exactly those words, calling it a scale of breakthrough people aren't grasping yet.

“DATAISM”

Historian Yuval Noah Harari names an emerging worldview in which the flow of data; not human worth, not God, becomes the highest value humanity organizes around. He calls it, plainly, a new religion.

Technology and the work mandate

Convenience can become captivity when stewardship is outsourced.

Genesis 1–2

Human beings are given image-bearing work: cultivate, guard, name, steward, create.

2 Thessalonians 3:10

Work is responsibility, dignity, discipline, and contribution — not only income.

Complement

Tools that help humans steward better.

Replace

Systems that make people passive consumers.

Command/Subdue

Train, retrain, build, solve, serve.

The church must not merely be consumers in/of the future. It must help shape it.

Climate, pestilence, resources: prepare without fear

Climate change...?

Extreme weather and ecological strain

Disease ecology

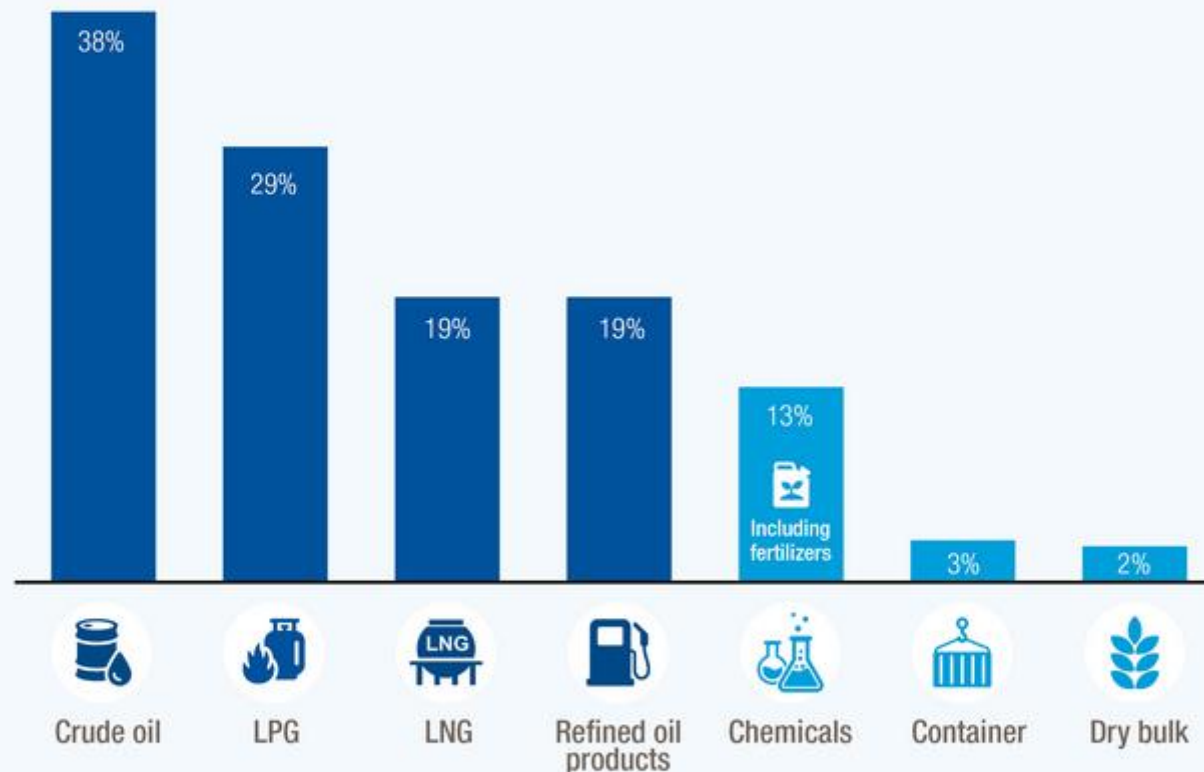

Tick-borne disease, pandemics, and public health issues...

Resource strain

Energy and water demands, including data centers...

The Strait of Hormuz is a vital passage for world trade

Share of global trade passing through the Strait, based on average flows during the week before the military escalation that began on 28 February.

Source: UN Trade and Development (UNCTAD), based on data provided by Clarksons Research 2026.

Notes: In 2024, total oil transported through the Strait was around 20 million barrels per day (bpd), or the equivalent of 25 per cent of global seaborne oil trade. Crude oil and condensate account for 14 million bpd and petroleum products for 6 million bpd. LPG: Liquefied Petroleum Gas, LNG: Liquefied Natural Gas, dry bulk includes grains.

Geoengineering (also known as **climate engineering** or **climate intervention**) is the deliberate large-scale interventions in the Earth's climate system intended to counteract human-caused [climate change](#).^[1] The term commonly encompasses two broad categories: large-scale [carbon dioxide removal](#) (CDR) and [solar radiation modification](#) (SRM). CDR involves techniques to remove [carbon dioxide](#) from the atmosphere and is generally considered a form of [climate change mitigation](#). SRM aims to reduce global warming by reflecting a small portion of [sunlight \(solar radiation\)](#) away from Earth and back into space. Although historically grouped together, these approaches differ substantially in mechanisms, timelines, and risk profiles, and are now typically discussed separately.^{[2]:168}^[3] Some other large-scale engineering proposals—such as interventions to slow the melting of polar and alpine ice—are also sometimes classified as forms of geoengineering.

Weather modification is the act of intentionally manipulating or altering the [weather](#). The most common form of weather modification is [cloud seeding](#), which increases rainfall or snowfall, usually for the purpose of increasing the local [water supply](#).^[1] Weather modification can also have the goal of preventing [damaging weather](#), such as [hail](#) or [hurricanes](#), from occurring; or of provoking damaging weather against an enemy, as a tactic of military or [economic warfare](#) like [Operation Popeye](#), where clouds were [seeded](#) to prolong the monsoon in Vietnam. Weather modification in warfare has been banned by the [United Nations](#) under the [Environmental Modification Convention](#).

A [tornado](#) near [Anadarko, Oklahoma](#) during the [1999 Oklahoma tornado outbreak](#). Weather researchers may aspire to eliminate or control dangerous types of weather such as this.

WHO Demands Global Online Lockdown with Digital ID Checks

The World Health Organization, together with French President Emmanuel Macron, has issued a joint statement urging governments to impose stricter controls on digital platforms.

The move, presented as a way to protect children's health, centers on mandatory age verification systems and redesigned platform features.

According to the statement, digital environments including social media, gaming, and AI tools require “effective governance, age-appropriate design, and stronger safeguards.”

Officials highlight risks such as anxiety, sleep disruption, harmful content exposure, and data profiling, arguing that current designs are not neutral and demand intervention.

The practical outcome of these age-assurance requirements would be widespread identity checks (using government IDs, facial scans, or linked databases) to restrict access.

This infrastructure would apply across major platforms, effectively requiring verification for most users rather than minors alone.

Similar efforts are already advancing in countries like Australia, the UK, and Canada, where laws targeting under-16 access are raising concerns about broader adult identification mandates.

Human 2.0 Is Coming Faster Than You Think. Will You Evolve With The Times?

By Neil Sahota, Former Contributor. © Neil Sahota is a globally sought after speaker and bu... [▼](#)

for COGNITIVE WORLD

As an inventor and futurist, I've spent my career envisioning the future of humanity in an age of accelerating technological progress. The idea of "Human 2.0" is one that I've explored extensively—especially the concept of the technological singularity, where artificial intelligence surpasses human intelligence and begins to drive the future of our evolution. The merging of human minds with machines holds incredible promise for our species. From enhancing our cognitive abilities to radically extending life expectancy, AI has the potential to propel us into a new chapter of human existence, one where our limitations—both mental and physical—are vastly expanded. But this future is not without its challenges. The very technologies that will enable Human 2.0 also raise important ethical, philosophical, and societal questions. How do we ensure that these advancements benefit everyone? How do we protect human rights and maintain dignity as we integrate AI into our very selves? The transformative power of AI brings us face-to-face with these dilemmas, and it is our responsibility to address them thoughtfully and carefully.

Canada joins push for social media age assurance with new digital safety law

TO THE HOUSEHOLDERS / AUX MEMBRES DU MÉNAGE

Please read steps 1 and 2 in the accompanying box, then access your online questionnaire by:

- visiting www.survey.statcan.gc.ca or scanning the QR code below,
- and using your Secure Access Code:

Hello,

Your household has been selected to participate in the **National Travel Survey (NTS)**, conducted by Statistics Canada.

Your participation is important, whether you travelled recently, stayed close to home, or did not travel at all

The purpose of the National Travel Survey is to study the characteristics of Canadian travellers and non-travellers, in order to measure the economic impact of tourism. The survey includes questions on domestic and international travel, as well as smaller local trips (for visiting friends/relatives, or for other personal or business reasons). This data helps governments, municipalities, agencies and the tourism industry better understand and serve Canadian travellers. Your participation in this survey will help us measure changes in the travel habits of Canadians, and the recovery from any impacts on the tourism industry.

Participating is easy and secure

Step 1 – Who should complete this survey?

- If you are the **only person** in your household who is 18 years of age or older, **you have been selected** to participate in the survey.
- If your household has **two or more members** 18 years of age or older, **the youngest member has been selected.**

Step 2 – How can the selected person complete the survey?

The selected person can access the online questionnaire by following the instructions located in the top right corner of this letter. A Statistics Canada employee may email or text your household to follow up if we do not receive your completed questionnaire by **July 31, 2026**.

This survey is conducted under the authority of the *Statistics Act*, which ensures that the information you provide will be kept confidential. We do not release any information that could identify you or any member of your household. To enhance the data from this survey, Statistics Canada may combine it with information from other surveys or from administrative data. To learn more on how we protect your data please visit www.statcan.gc.ca/trust.

For survey-related enquiries or technical assistance

Contact us Monday to Friday (except holidays), from 8:00 a.m. to 7:00 p.m. (Eastern Time):

- 1-877-949-9492 (TTY: 1-800-363-7629*)
- infostats@statcan.gc.ca

*If you use an operator-assisted relay service, you can call us during regular business hours. You do not need to authorize the operator to contact us.

Could Pope Leo Baptize Aliens? The Catholic Church Faces a Historic Debate

By Abby Trivett 🕒 Nov 5, 2025

Vatican Holds Conference on Extraterrestrial Life

THE REAL TEST

What Actually Breaks Our Resolve

We assume the pressure that will break the church will be dramatic: famine, violence, persecution. Often it isn't. It's convenience.

In recent years, many who said a certain line would never be crossed found their conviction tested not by hunger, but by the loss of something far smaller - the ability to travel. Comfort, not survival, is often where faith is actually tested first.

THE ROOT QUESTION

***Our god is our belly.
Are we prepared to go without,
if it comes to that?***

The squeeze will get tighter, a slow cook, not a sudden fire. Many who fall away won't stop believing in Jesus. The pressure to stand will simply cost more than they prepared to pay.

A practical readiness grid

Move from intention to inventory.

Spiritual

Repentance, prayer, Scripture, worship, courage

Mental

News discipline, scenario thinking, calm decision-making

Household

Water, food, medicine, documents, emergency plan

Economic

Get out of debt, savings, multiple skills/income

Land/Food

Garden, seeds, local producers, preservation skills

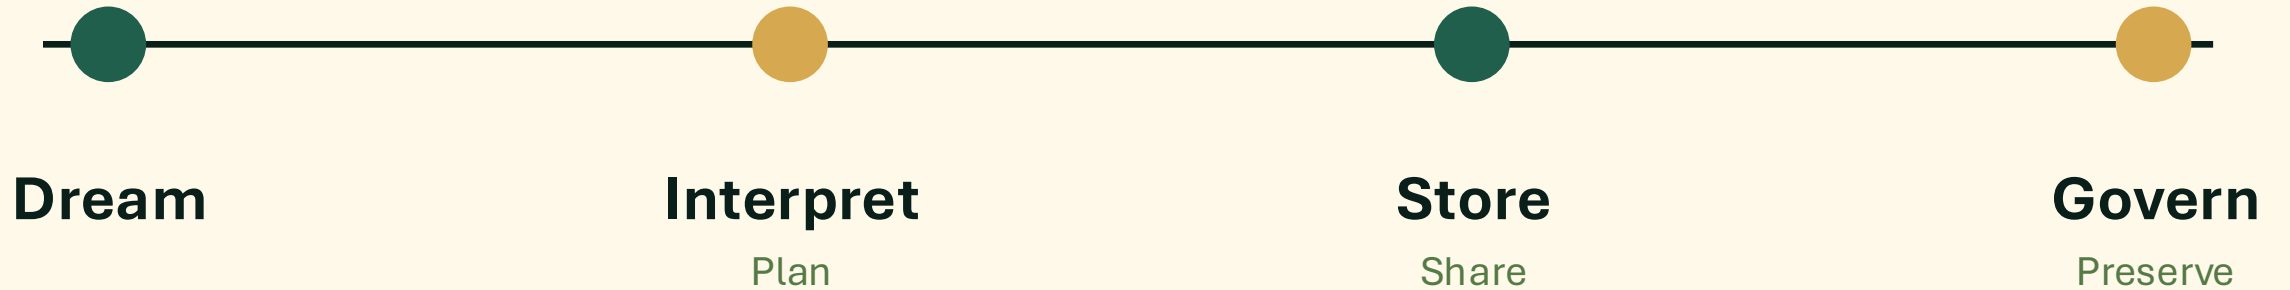

Community

Trusted network, shared tools, care for vulnerable

Better to be prepared for something that does not happen than unprepared for something that does.

Joseph: revelation plus administration

Prophetic insight without planning is not sufficient.

End-time readiness is spiritual perception translated into administration, supply, policy, and community infrastructure.

What do you have in your hand?

Training and retraining are part of occupying.

Calling

What burden, gift, or problem keeps finding you?

Capacity

What skill can you strengthen or monetize ethically?

Community

Who needs what you can do, and what do you need from them?

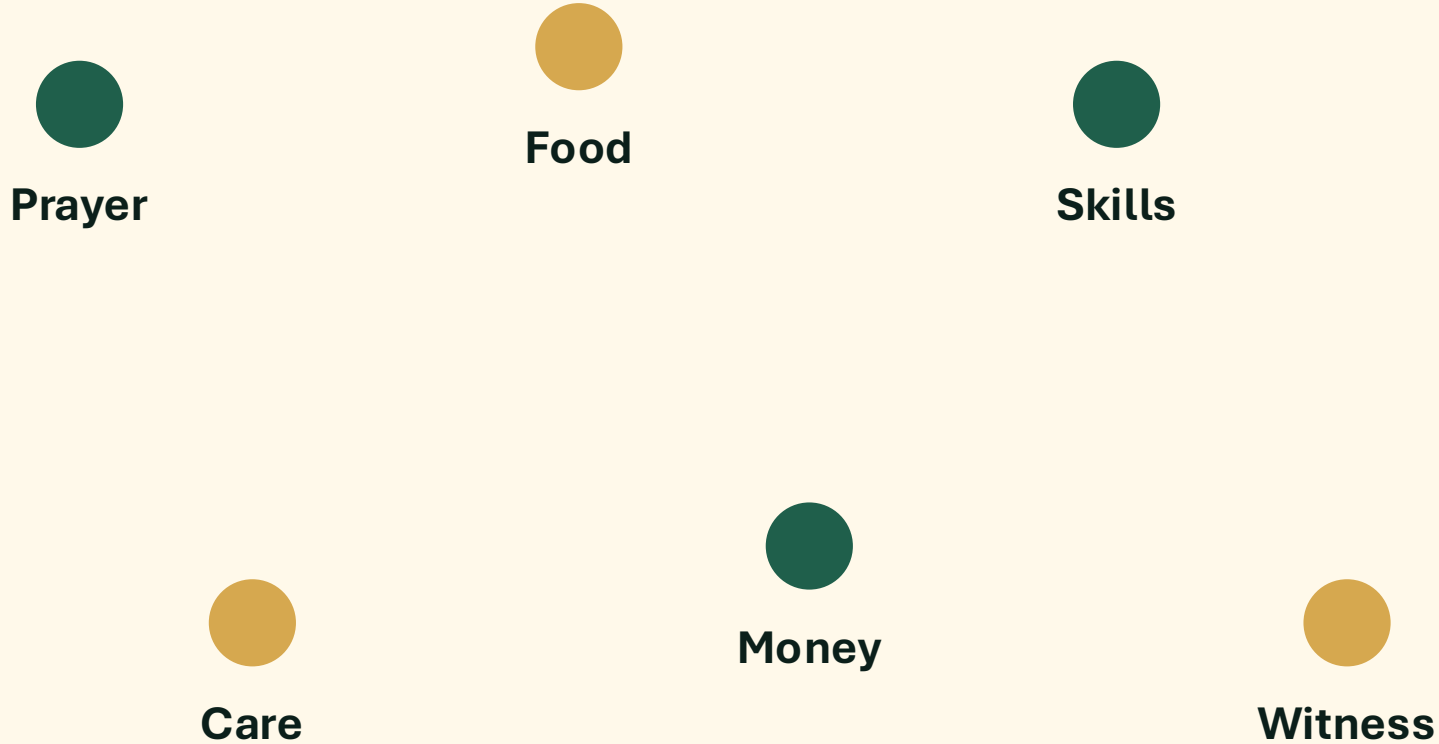

Capital

What resources, land, tools, savings, or time can be stewarded?

Do not let hard times only bruise you. Let God use them to build you.

Community is key

Endurance is easier when the body is actually a body.

The goal is not a bunker. It is a resilient, generous, discerning people able to care for one another and stay faithful under pressure.

From riches to wealth

Riches can be individual. Wealth becomes communal, generational, and missional.

RICHES

can become status, isolation,
consumption...

WEALTH

relationships, skills, land,
businesses, savings, influence,
institutions...

This is not prosperity gospel. It is impact gospel: “Thy kingdom come.”

The closing call

Awake. Align. Act.

Awake

Stop hiding from reality.

Align

Get positioned in Christ
and community.

Act

Build, prepare, serve,
witness.

**We are not called to panic at the darkness. We are called to shine,
stand, and steward until He comes.**

What should be done

Freedom, Sovereignty, and the Christian Response

Action Plan Overview

Seven Mandates for the Church and Community

- Build a watchman function
- Build legal and civic readiness
- Build digital resilience
- Build financial resilience
- Build independent communication channels
- Build family and youth
- Build a kingdom business network

Mandate 1: Build a Watchman Function

Track the Times Intentionally

- Create a small team to monitor major developments
- Track:
 - Legislation
 - Court cases
 - School-board policies
 - Digital ID
 - Online speech laws
 - Banking and payment changes
 - Religious-liberty cases
- Produce a monthly “Issachar Brief”
- Help churches and families act before crisis arrives

Mandate 2: Build Legal and Civic Readiness

Know Your Rights Before You Need Them

- Review church bylaws and governance documents
- Prepare policies for:
 - Facility use
 - Membership
 - Employment
 - Child safety
 - Privacy
 - Public statements
 - Media response
- Build relationships with legal advocates
- Encourage civic engagement
- Teach people how laws are made and challenged

Mandate 3: Build Digital Resilience

Do Not Be Digitally Defenseless

- Teach password security and two-factor authentication
- Use secure communication where appropriate
- Reduce unnecessary data sharing
- Train people to recognize scams and manipulation
- Understand AI tools and risks
- Avoid total dependence on one platform
- Protect children from algorithmic discipleship

Mandate 4: Build Financial Resilience

Prepare Households, Churches, and Businesses

- Reduce unnecessary debt
- Build emergency savings
- Maintain diversified banking relationships
- Preserve lawful cash options where practical
- Teach financial literacy
- Support local business networks
- Prepare churches for giving disruptions
- Help families withstand economic pressure
- Have food, water, medicinal, energy reserves

Mandate 5: Build Independent Communication Channels

Own the Relationship With Your People

- Do not depend only on social media platforms
- Build and maintain:
 - Email lists
 - SMS lists
 - Church websites
 - Printed contact lists
 - Podcasts or newsletters
 - Local gatherings
- Platforms can change rules suddenly
- Direct communication is a resilience issue

Mandate 6: Build Family and Youth

The Next Generation Is Being Disciplined

- Algorithms are disciplining children every day
- Parents need tools, not just warnings
- Teach children:
 - Biblical identity
 - Truth and discernment
 - Sexual ethics
 - Financial wisdom
 - Digital wisdom
 - Courage under pressure
 - Respectful public witness
- Strengthen the home as the first place of discipleship

Mandate 7: Build a Kingdom Business Network

Economic Cooperation Is Part of Resilience

- Connect Christian business owners and professionals
- Build trusted directories
- Support ethical commerce
- Create apprenticeship and mentorship pathways
- Share legal, financial, and technical expertise
- Help believers find services, jobs, and support
- **Build practical alternatives before they are urgently needed**
