LEAGUE ANNOUNCES GREAT NEW AWARD DETAILS INSIDE

FROM THE PREZ

I would like to thank Connie, N8ZHL, for making a personal donation to the club which I forwarded to the C.A.R.S. scholarship fund. The winners of the two \$500 scholarships will be announced at the annual summer picnic. The scholarships are available to any C.A.R.S. member or member of their immediate family for continuing education after high school. Applications for the scholarship award are available on the C.A.R.S. website, and they must be completed and submitted by May 31st. This is an excellent opportunity for anyone eligible to help defray the cost of their education. We have had tremendous success with past recipients of the scholarships over the years; most have graduated and have begun their careers with the help from C.A.R.S. The scholarships are paid for by the proceeds from a raffle that also will have has the winners announced at the summer picnic. As a C.A.R.S. member there are two ways to participate in this excellent program. First, encourage any member of your family (or yourself) to apply for one of the two available scholarships. It is quite easy to do, and there is nothing to lose. Secondly, please obtain from Bob, W8GC, our club treasurer, a book of tickets to sell to your friends, family, neighbors or co-workers. And please, if for what ever reason you cannot sell any tickets, buy a few for yourself. If every C.A.R.S. member bought two for themselves, and two for a significant other, the scholarships would be paid

If you hear some different activity on the club repeater, it may be another member using Echolink

to bring more information of interest to our members and listeners using a link to another repeater. This practice will be experimented with in the future. Please realize, the use of the repeater is for club members and all local traffic will take priority. If you wish to use the repeater and the repeater is linked to another via Echolink, just politely request the use of the frequency for local use. The intention of this experiment is to increase the use of the repeater for the benefit of those who listen to "82." You may also want to join into the conversation and add to the group discussion. Most importantly, please realize this is an experiment and we will use the outcome to develop a repeater use policy. Any comments will be welcomed by me or Tom, WB8N, the repeater trustee.

73, Toby, WT8O

MARCH MEETING MINUTES

The C.A.R.S. membership meeting was called to order by President Toby Kolman, WT8O, on the 13th of the month at 7:30 P.M. The meeting was held at the Busch Funeral Home community room in Parma, Ohio. Thirty-one members and three guests were in attendance.

After introductions, the February meeting minutes were approved as published in the March *Wobbly Oscillator*.

The Treasurers report was given by Bob Check, W8GC. Bob announced that scholarship raffle tickets are for sale and that roughly 100 tickets have been sold so far. The price for tickets is two tickets for \$5.00, or a book of tickets for \$20.00. The winner will be announced at the July picnic.

Toby reminded everyone to leave the parking spaces close to the building for members that need them. The presentation for the evening will be given by Eddie, KD8FTS, on cross band repeaters.

Toby stated a Constitution Committee will meet to rewrite and amend the club constitution and amendments, because it was written wrong and didn't follow Roberts Rule of order to the "T." Toby read from the "WO" for constitution for amendments, "Two signatures shall be required on any checks issued. One must be the Treasurer along with either the president or one other member of C.A.R.S. who is authorized by the board as a signer.

AMEND to read "one signature is required on any check issued. The signer can be any one of 3 authorized signers. The members present voted to add the amendment to the constitution.

The Copley school report was given by Dave Dressler, KD8V, who said that the School Club Roundup at the middle school went well thanks to Gary, NI8Z; Metro, W8MET; and Tom, WB8N, assisting students in various operations of the roundup. The high school needs new antenna to be put up; a Kenwood Radio has been donated to the school.

Gary, NI8Z, mentioned that the "VE" Session went well on Sunday 3/11/2012.

Gary also reported that get well cards were sent out to Toby, WT8O; Mike, KG8MTG; whose son is in the hospital, and Steve, K8SAS, whose wife has been ill.

Secretary Dwaine Modock, K8ME, announced that the Dayton Hamvention Bus has roughly 18 people signed up and the cost is \$45.00. The bus will be parked next to the arena and open all day. Further information can be obtained on club web-site at www.2cars.org.

The Echolink committee met on 3/5/2012 and discussed repeater protocol and Echolink. Ed, WB8ROK, stated upon checking in, to have respect for the other stations and that local traffic has priority over stations using Echolink. Clubs wanting to use the repeater for different uses have to contact Tom, WB8N, repeater license trustee for permission.

The meeting was adjourned: 8:10 P.M.

A 50/50 Raffle took place, with \$32.00 going to the club and \$31.00 to the winner, which was Ken Osicki, K8OAE. Congratulations Ken!

Respectfully submitted by Dwaine Modock, K8ME, C.A.R.S. secretary.

KD8FTS giving his presentation on cross-band repeating at the meeting.

MARCH BOARD MEETING MINUTES

The meeting was called to order by board chairman Tom Wayne, WB8N, at 10:01 am at the Old Town Hall in Independence, OH.

In attendance were Tom Wayne, WB8N; Gary Dewey, NI8Z; Toby Kolman, WT8O; George Pindroh, K8KR; Dwaine Modock, K8ME; Bob Check, W8GC; David Rickon, NF8O; Steve Spisak, K8SAS; & Matt Webb, W8EBB. Gary Berkowitz, K8REF was absent. We also had one visitor, Ron Borkey, K8VJG.

Tom, WB8N, asked for a motion to approve the minutes for the January 2012 board meeting be approved, motion was made, seconded and the minutes were approved by the members present.

Treasurer Bob Check, W8GC reported on the financial status of C.A.R.S. Bob also reported that scholarship tickets are on sale with about 80 tickets sold so far.

President Toby Kolman, WT8O, mentioned that Ed, WB8ROK, was correct in his statement made at the February meeting regarding the constitution. Toby stated that the constitution cannot be changed

amendments can be made to the constitution. Toby mentioned that the whole structure of the constitution, by-laws and amendments will be reviewed with the constitution committee and guided by Roberts Rules of Order. This review will determine how far the club has to go with this, does club need a constitution, or can it get by with just By-laws.

Gary Dewey, NI8Z, mentioned that he will establish a monthly list of programs for the newsletter. Gary & Metro, W8MET, are working out a deal with the independence school system to use a vacant building for a club station and possibly radio classes, etc.

Gary made a report of the Copley middle school, telling how they got the students involved with the School Club Roundup which Kids really enjoyed. It was mentioned that the kids don use the WA8CMS web-site that was established for them. No one is maintaining it so it will be dropped. He also said that the C.A.R.S. license classes going well with six students.

Toby, WT8O will contact Gary Berkowitz, K8REF, scholarship fund chairman, with regards to the maintaining the scholarship fund. Sunshine: Cards were sent to Steve, K8SAS's wife Chris, Toby & Dave K8DAV.

Toby stated that the Echolink Committee met on 3/5/2012 to establish a protocol on operating Echolink. Very few use Echolink. Some progress was made. The committee will meet again in a few months.

Old Business: Dwaine, K8ME, gave progress summary of the Dayton bus trip, reporting that we have several people paid, he expects few more at the club meeting, and sign-ups were ahead of last year. May 19th is coming up fast.

New Business: A discussion was brought up by Dave NF8O, with regards to contesting and submitting scores for the club. K8ME mentioned that you have to have to have 3 member entries for the club to get credited, besides the stations entering getting credit. It was mentioned that the club doesn't have very many HF operators

A motion was made and seconded to adjourn the meeting. Meeting adjourned at 11:05 am.

Submitted by Dwaine Modock, K8ME, Secretary

KEN'S JUNK BOX

By Ken Osicki, K8OAE

So, here's the story. I was asked by the Parma Amateur Radio Club if I would consider doing a few turns as net control on the club's weekly Tuesday night net. Of course, I as reluctant to accept, but I did say that I would consider the invitation.

My first step was to listen in on one or two regular nets and pretend that I was net control. I listened in on two PARC nets and one CARS net. Issues, issues!

First, my hearing. I had my hearing tested last Fall and was diagnosed as normal, but borderline. Be sure to have it checked next year, she said. I was losing my hearing on high frequency sound. I don't know how much this actually entered into my experience on the net, but I did certainly have more difficulty than when I was just a call in. Wow! I didn't expect that, at all. continued on next page....

But there's more, and this is where all members come in. I found that I didn't have problems just because of my hearing. I found that quite a large number of call-ins are trying to break some kind of speed record. They came in so fast that I had a hard time picking up call signs even when reception was excellent.

Now, even the speed of presenting a call sign might not have been a problem if phonetics had been used, but a lot of members don't tend to use phonetics on 2-meters. If they did, that would have helped me pick up more calls.

At any rate, my hearing was most likely the biggest deterrent to my accepting the PARC invitation. The experience I had trying to do the job certainly gives me a greater appreciation for the job that all of our net controllers do in taking care of the nets for us. I think we can all say thanks to them for being there and for doing such great work every week throughout the year. Amateurs, yes, but professional in every way.

As for me, I am going to try to make their job a bit easier when I call in. I will use phonetics and do my best impression of Walter Cronkite's slow and easy voicing. My way of saying "thanks" to all the guys and gals who control our nets. I'm looking forward to hearing you often.

MARCH BIRTHDAYS

Because I did not have a current list for last month, I was not able to include the March Birthdays in last month's W.O. - Ed.

NEW FEATURE FOR THE W.O.

This month, we are beginning a new feature for the newsletter, called QSL CARD of the MONTH. We are asking you to send a copy of one or more of your favorite QSL cards that you have received either recently or over the years along with a short description of the card. One or two cards will be featured each month.

We'll start out this month with two cards that WB8N received recently. The first is a card from Mike Baxter, KA0XTT, who is a fictional character on the ABC comedy, Last Man Standing, starring Tim Allen. Tim's character Mike is a Ham and has a station in his office at the store he works at. All you have to do to get one of these cards is send in one of your QSL cards to the address shown on KA0XTT's card along with an SASE and they will send you the card autographed by Tim Allen. You can get the address on QRZ.com. Look up KA0XTT.

The second card is from HB9STEVE, which was a special event station in Switzerland commorating Steve Jobs, the founder of Apple Computers.

So start sending in your cards guys & gals and lets see how this goes.

THE LEAGUE ANNOUNCES GREAT NEW AWARD

By April Forthemonth, NF0OL

The League has announced that they are introducing a new award for Amateur Radio Operators to work for. It is the Worked All Cities award. All licensed radio amateurs are eligible to work towards earning this new prestigious award. Those who earn this award will be qualified to ask continued on next page.....

for a beautiful certificate from The League, (for a small fee of course) suitable for framing, after providing proof to The League that they did, indeed, qualify by working every city in the United States of America.

In order to earn the Worked All Cities award. one must work at least one amateur radio station in each city in the United States of America. Each station worked must be a permanent fixed station, not portable or mobile, unless there is no permanent fixed Amateur radio station in a particular city. If that is the case, a licensed Radio Amateur from an immediately adjoining city may set up a station located in either a campground, motel, friend's house, park, or in a supermarket or mall parking lot, in the city that has no permanent fixed Amateur radio station provided they remain operating at that location for three consecutive days and nights. The operators going after this new award may be mobile however. Villages and townships do not qualify as being a city. One may work a particular city only once, on any band authorized for Amateur Radio use in the U.S.A. Working a particular city on EACH band is not necessary.

Amateurs from Canada, Mexico, and any other DX entity are also eligible for this new award. It is suggested that Radio Amateurs get started as soon as possible working for this award, as it is going to take some time to achieve it.

The Worked All Cities award provides a new challenge for those Radio Amateurs that have earned all the other awards offered by The League and other organizations, such as for working DX, working all states, county chasing, and others, and feel that there is nothing challenging for them in Amateur Radio anymore.

So 73 and good luck everyone, and happy city hunting! *Continued on next page....*

(Editor's note...Ms. Forthemonth is applying to become a member of C.A.R.S. and is a League member. This is her first article submitted to the Wobbly Oscillator. Hopefully we'll see more articles from her in the future. - Ed.)

the C.A.R.S. Wednesday evening net. 73 for now, de Tom, WB8N

THE RANDOM WIRE

By Tom Wayne, WB8N

AH....Spring at last!

When every Ham's fancy turns to Amateur Radio! As I write this, the weather has become cold again. There was ice in my dog's outside water bowl this morning. But the sun is shining and things are still blooming. Heck, I even had to cut my grass already! Had to be carful in the back yard though, as I have several radials laid out from my SteppIr vertical. I had cut a couple of the radials last fall and had to splice them back together. Oh, the trials and tribulations of a ham radio operator!

I'm getting excited about Dayton already. The Hamvention is less than 2 months away. The bus to Dayton seems to be filling up well. If you are planning on taking the bus to the Hamvention this year, you'd better make your reservation asap. *Disclaimer*

Being as this is the April issue of the Wobbly Oscillator, there may be an article or two that just doesn't ring exactly true. Just so you know.. *New Award*

I'm anxious to begin working toward earning the new award the League announced, the Worked All Cities Award. I'll have to start going through my logs to make a list of all the cities I've worked so far I wonder what the award will look like? Web Site Info

For those who are looking for info on the C.A.R.S. Tina Check Scholarship and need the application, just go to the C.A.R.S. web page and on the left hand side you will see "Member Info" Just click on that and all the info you need is right there. You can also fill out the member survey and submit it from there as well.

Gotta Run

That's about it for now. Hope to see you on the air and at the next meeting. Don't forget to check into

GEARVACf (the f is silent) BULLETIN

Dr. Childe Lander Moon Returns From Worldwide Mission

Gearvakf's Chief of Installations and Facilities, Dr. Childe Lander Moon, has returned from almost a year of assignments around the world supervising the installation of history's first 1.5 million meter radio antenna array. Dr. Moon's assignments took him from the steamy jungles of the Amazon where the antenna wires had to be hung from the tops of trees, to the chilly high Himalayas where mountain top installations had to be completed in bitter cold and lack of oxygen. Even more difficult were the deep ocean antenna systems which had to be installed using deep sea manned submarines at depths of over 30,000 ft., where water pressure exceeds the 10,000 psi.limit of the sub's pressure measuring instruments. Dr. Moon reported no problems dealing with the great depths, although he did return home approximately half his original size.

Existing Clocks to Become Obsolete As Decimal Time Standards Take Over

New high-definition decimal time standards being applied by the National Bureau of Standards and Technology, will make all present clocks obsolete by July 2014, according to NBST spokesman Kent Atwater. New high-definition clocks will be available for said in January 2014, and will be calibrated in the new 100-minute hour and 10-hour day standards. A minute will be 100 seconds long, and all clocks will display milliseconds and microseconds. Possession and use of 12 and 24 hour clocks showing 24 hour day, 60 minutes will become illegal in January 2015.

Tuna Tin Imbroglio

In an obviously well coordinated action, members of the Longshoremen's union, the Teamsters, the Japanese "Fishing Research Institute" and staff members of Senator Ted Steven's (R-Alaska) office set up simultaneous picket lines this morning in front of LARA HQ in Oldington CT, QC Magazine in Hicksville, NY; and DigiKey and Mouser Electronics warehouse across the U.S. "This ham radio in a tuna-tin baloney has to stop," shouted Elmo "Fish Lips: Salmonski through a bullhorn from the sidewalk in front of LARA HQ; although he obviously kept aiming the bullhorn at the gathering TV cameras rather than the HQ building. "The recent shortage of tins is really hurting the fishing industry," said Imelda Cashman from the senator's office, "and it's all because of you stupid radio nerds!" Picket line signs included, "Buy your damn radios," "QRP hurts American workers," "Save our Tins," and "Hobbyists: Grow UP!" By N4GG
