Senior UI UX Designer

Job brief

We are looking for an experienced UX/UI designer to work within a tight knit, niche multi-disciplinary design studio. You will need to be comfortable working proactively, sharing and presenting ideas with the team and clients on a daily basis and working in agile. Your role is likely to be very hands on as well as being strategic. At least two years of industry experience is a must.

To be successful in this role, you should have experience with design software and wireframing tools. If you have a portfolio of professional design projects that includes work with web/mobile applications, we'd like to meet you.

Responsibilities

- Lead a team of 2-3 junior designers—providing expertise, direction, and design guidance
- Be the project manager—develop, and drive the project plan and own the project outcomes
- Understand business level issues, and contribute solutions to CxO level clients
- Gain technology capability, working closely with ICD's tech lead on projects
- Work closely with the management at ICD for discussions on project planning, and strategy
- Be on track for an associate role in a few years

- As a team lead, your involvement in a typical UI UX project— analyse requirements, wireframe a prototype, explore and design interface, usability testing, refine, finalise and deploy design, record and document

You must have...

- Great typographic and colour sensibility and attention to detail
- Ability to research on the net and amongst real world users
- Good understanding of user experience and user centric design
- Good understanding of production for development
- at least 2 years of industry experience with some client facing roles
- To be able to estimate and manage time
- To be able to lead and be a champion of visual design within the team
- To be able to work collaboratively with other disciplines. You are likely to be working on ideas and wireframes with team lead, team members and the dev team
- Figma / After Effects / Illustrator / knowledge is a must. Knowledge and usage of other online softwares to design, project manage is nice to have.
- Experience in multi-platform design (website/mobile/iPad etc.)
- Good mix of portfolio from different sectors
- Experience in agile, or have an open minded approach to process
