## Sauvignon Blanc

### **DURBANVILLE HILLS**

#### **COLLECTORS RESERVE THE CAPE MIST**

**335**

Durbanville | Marin Moore

The Cape Mist is a natural phenomenon in Cape Town, stealthily moving in as a cool Atlantic breeze over Table Bay. The mist provides a soft blanket over the surrounding slopes and creates the perfect cool climate conditions associated with the Durbanville terroir. These conditions are crucial in creating the perfect environment to grow Sauvignon Blanc, renowned for its abundant and lingering tropical fruit flavours and balanced freshness.

### **SPRINGFIELD LIFE FROM STONE**

**295**

Robertson | Abrie Bruwer

Life from Stone derives its name from the incredibly rocky soils in which it is grown. Every year the vineyard battles against nature in order to produce highly concentrated, powerful wines with a flinty, mineral character true to the quartz rock in which it is grown. Monumental human effort was required to plant the vines – implements destroyed, and, in the case of the older vineyards, dynamite deployed.

### **ATARAXIA**

**286**

Hemel-en-Aarde Ridge | Kevin Grant
