

### **Georgia Rivers Trash Trap Funding Request**

In 2025, Georgia Rivers has \$250k in funding available for trash traps across the state with the intent of reducing trash and plastic pollution in waterways. Additional funding may be available in 2026 and 2027, so requests not funded in 2025 will be held for future consideration. Please provide a request for trash trap funds from Georgia Rivers with the information below. Upon approval of funding, you will receive a contract and funds will be transferred to you within 14 days of signature. Grantees will be asked to report back with photos and information about the impact of the traps within the year after installation. Grantees will also agree to place Georgia Rivers' logo on educational and promotional materials for the litter traps as well as on trap signage. If you have any questions, contact Dana Skelton at [dana@garivers.org](mailto:dana@garivers.org) or 706-247-6998.
