# chicken

In NATUREA we believe that when using a properly formulated food, only the daily ration needs to be adjusted to the weight and activity level of the animal.

chicken **75%**

Fresh deboned chicken	40%
Dehydrated chicken	30%
Hydrolysed chicken liver	5%

## Composition

Fresh deboned chicken, dehydrated chicken, dehydrated potato, chicken fat, hydrolyzed chicken liver, brewer's yeast, carob, apple, calcium carbonate, dried whole egg, fish oil, seaweeds, cranberries, blueberries, tomato, potassium chloride, yucca schidigera.

## Feeding guide

Please note that each cat has individual characteristics and metabolism, and his feeding requirements will vary with breed, environment, activity level and age. We recommend using the following table as an initial guideline, and then monitor your cat's weight and adjusting daily ration accordingly. We also recommend feeding him twice daily.

*Very Important: Always remember to keep fresh and clean water easily available to your furry friend.*
