

# ETFS US Technology ETF (WWW)

## Benchmark

Solactive United States Technology Index

## Benchmark Provider

Solactive

## Benchmark Description

Construction of the index starts with companies that are in both of the following indexes:

- (i) The Solactive GBS United States 500 Index, which measures the performance of the largest 500 US companies.
- (ii) The Solactive GBS Global Markets All Cap Technology Focused USD Index, which measures the performance of technology companies from developed and emerging markets, as defined under FactSet's Revere Business Industry Classification System (RBICS).

These companies are judged to be large US technology sector companies. All such companies are selected in the Index and weighted by free float market capitalisation.

There were 90 stocks in the index in February 2025.

The Index rebalances and reconstitutes quarterly on the first Wednesday in February, May, August and November.

**Solactive is an independent company of ETF Shares.**
