ABOUT ME

< Web development enthusiast with great goals and objectives, and the same motivation and discipline to carry them out. Constant learning and improvement driven by great curiosity.

In my free time I love stargazing, walking with my dog in nature, travel with my van and read/listen podcast about ancient history />

LANGUAGES

Spanish: Native

English: Advanced

Basque: Native

EXPERIENCE

Front-end / Full-stack Developer
Digital Cuisine | October 2020 - Present

- Development of solutions for first level multinational clients, both web applications and web pages
- I worked mainly with Jamstack (Gatsby + Contentful), having also worked as full-stack in projects with Node.js/Express for the back-end and vanilla JS and Handlebars (templating) for the front-end compiling with Gulp. Finally I also worked on React/React Native apps and Webflow sites
- I have worked with clients such as: German Government (Corona Warn App, German national website about the app), Vimcar, Bahlsen, iF Design, VetZ, Vier, FriEnt, PBF, TeleData, among others
- Lead developer in PWA app for Spanish metallurgical company in the province of Cadiz
- Other tasks: Collaborative workflow between teams, PR review and management, SEO/performance improvements, support to new employees when introducing them to the company's workflow

Web Developer | Technical Support
Lawyou | June 2019 - June 2020

- Development of application for the automatic assignment of lawyers with incoming cases to the firm (Next.js - Firebase) streamlining the process by 2X
- Support in the improvement and implementation of functions in a web app with React
- Management and administration of CRM and ERP (Hubspot / Openbravo)
- Provide technical support / computer consulting to the company, partners and collaborators
- Web analytics with Google Analytics, Funnelytics, etc.
