PROFILE

AI and emerging technology explorer, DevOps and cloud enthusiast focused on scalable container orchestration, Infrastructure as Code, automated CI/CD pipelines, and observable cloud systems on AWS.

EDUCATION

Darul Huda Islamic University

Currently studying in the university degree program.

Yenepoya Online BCA

Bachelor of Computer Applications in Computer Science. Currently studying online.

CORE CAPABILITIES

Cloud & infrastructure

AWS / TERRAFORM / CLOUDFORMATION / VPC / EC2 / S3 / IAM

Containers & delivery

DOCKER / KUBERNETES / EKS / GITHUB ACTIONS / NGINX

Systems & version control

LINUX / BASH / GIT / GITHUB / SSH / NETWORKING

Application platforms

PYTHON / FLASK / REACT / NODE.JS / PYTEST

Observability

PROMETHEUS / GRAFANA / PROMQL / SYSTEM MONITORING

LANGUAGES

English

Arabic

Comfortable for communication, learning, and technical work.

Some working knowledge and continuing to improve.

HANDS-ON PRACTICE

GitHub Repository Access Auditor

Secure Bash utility for repository access audits using the GitHub REST API, jq, and environment-based credentials.

React CI/CD Pipeline

Automated testing, multi-stage Docker builds, Nginx packaging, and gated image publishing.

Flask CI/CD with Live Deployment

Push-to-deploy workflow connecting tests, Docker, Docker Hub, and Render.

AWS EC2 Node.js Deployment

Provisioned Ubuntu EC2 infrastructure with IAM, SSH, security groups, and public application delivery.

Advanced Python CI/CD Architecture

Python pipeline with immutable image tags, layer caching, PR protection, and pytest.
