# RainMaker

The RainMaker water treatment system has been researched and proven where it matters most: on commercial irrigation systems. RainMaker has consistently achieved the same results - satisfied clients with cleaner and efficient irrigation systems and better water, **making every drop of available water count!**

## QUALITATIVE BENEFITS

- Relieve compaction
- Oxygenate the soil
- Break down salts
- Cleaner system
- May reduce irrigation water requirements

## ECONOMIC BENEFITS

- Reduce costs (water, energy, some inputs)
- Can lead to increased yields, and in many cases decrease disease pressure

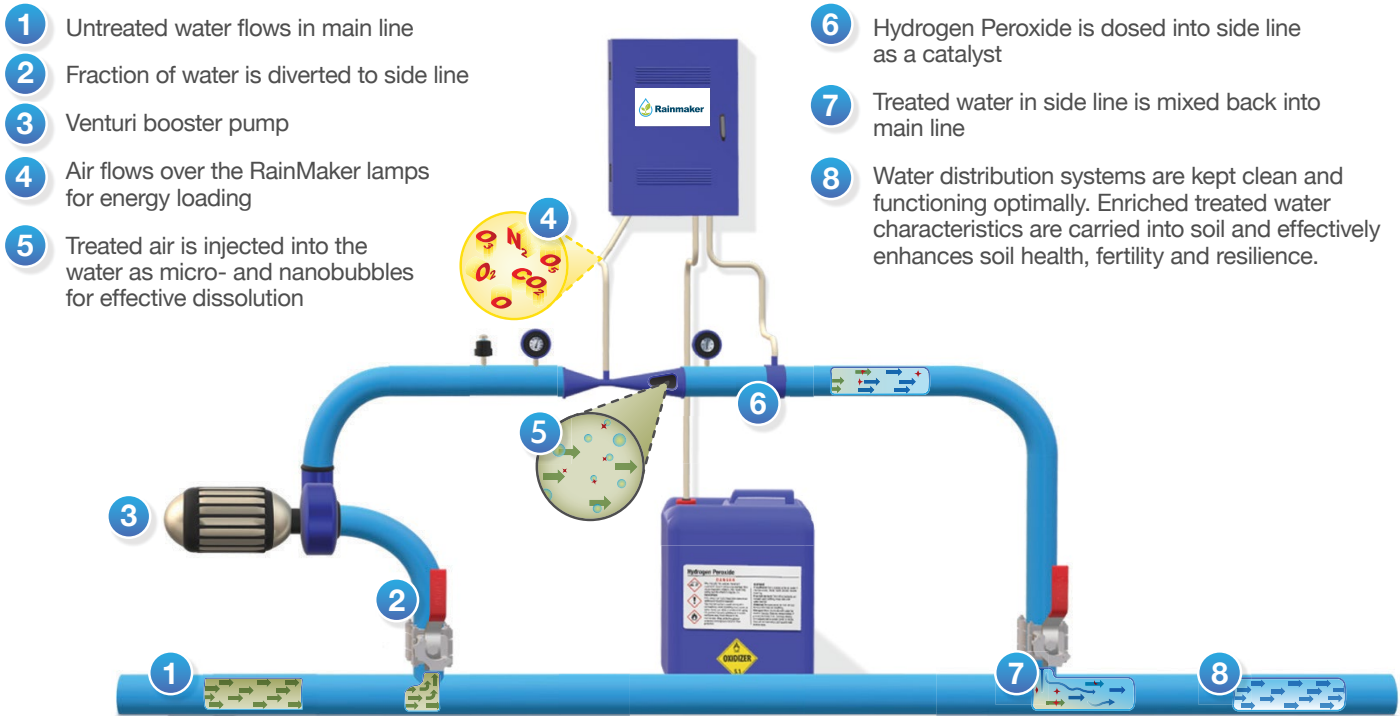

## BIOLOGICAL BENEFITS

RainMaker treatment can significantly reduce waterborne pathogens in effluent or biologically contaminated water sources. Oxidization of chemical contamination is also accelerated.

## HYDROGEN PEROXIDE CATALYST

The advanced oxidization process decreases biofilm, and can significantly reduce other water born pathogens. Our Hydrogen Peroxide is administered at a very low dose (2 PPM - 50% Hydrogen Peroxide) and acts as a catalyst. It does not corrode or harm irrigation infrastructure.
