

BONGBONGBEERWIZARDS

-Rider-

Thank you for flying with BBBW.

Our Backline needs a lot of breathing space; we will only play in venues that can provide it.

The number of cabinets and amps is crucial to our concept and sound.

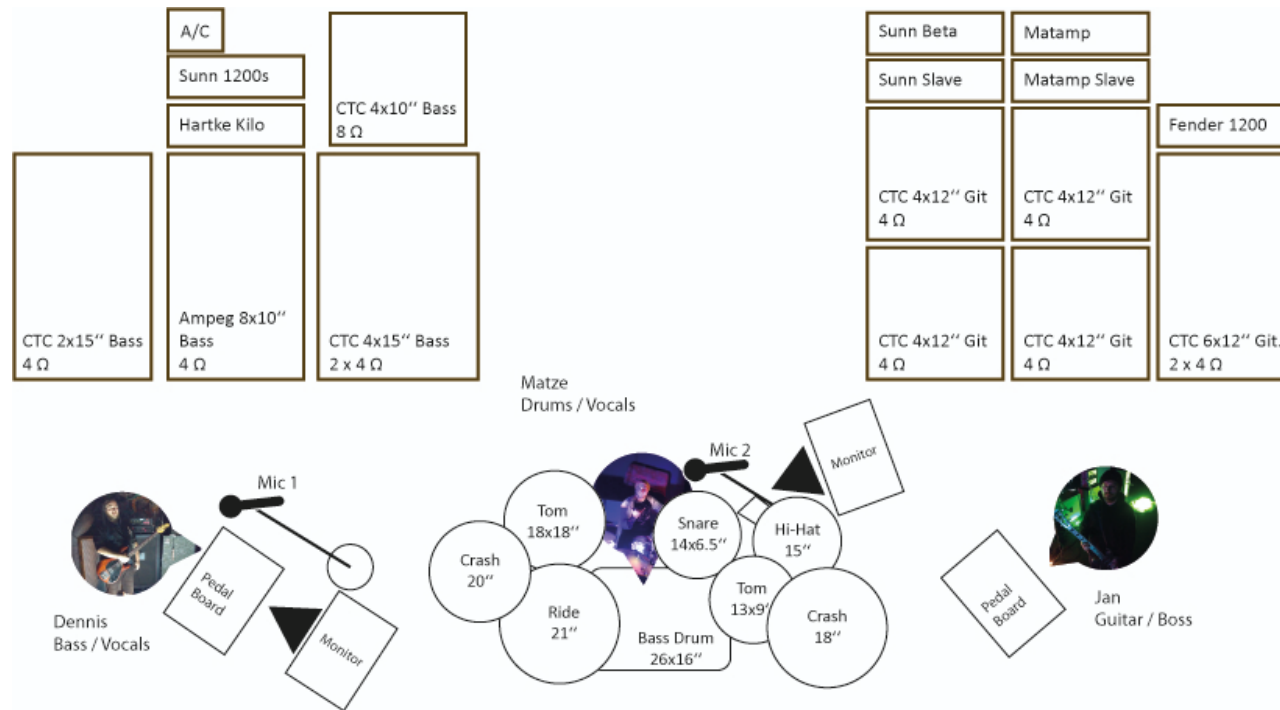

Please be advised that our performance is loud and could easily reach 130dB.

Technical (Front)

Drums need to be fully mic'd up. We need two vocal mics, one for the bassist and one for the drummer.

We happily discuss the mic situation for our cabs with the event's front of house.

As shown below you see the arrangement of our Cabs / Amps / Drums / Mics / Monitors / Pedalboards and Ourselves.

(Bigger version of the image provided in the folder)

🔌 We need 4 power sources: 1 on each pedalboard and one for each backline-side

Mics (Vocal effects)

Please provide mics with a very long decayed reverb (420ms/cathedral) in the mix.

The vocal volume should **not be above the mix of the instruments.**

Preferably mics with large membranes.

Hospitality

We are frugal guys. We take everything we can to sleep. The only thing that would be good is not to sleep on the floor. Mattresses / Couches and everything beyond would be perfect.

Note: We need a safe spot for our equipment, instruments and our van!

Catering

We are two flexitarians and one vegetarian.

The two flexitarians are perfectly fine with eating vegetarian/vegan food.

If possible, provide a case of "Hansa Beer" (Pils or Export) on the Stage.

Thank you very much,

BBBW
