With a racing heartbeat through the silent dawn. The glaring city lights fade in the rear-view mirror. In one hand the fleeting glow of tempestuous love stories and smoky nights, in the other the bitter realization of a comparative culture, fear of failure and media monotony. MISS MADISON's music is created here, in the search for love, meaning and that moment when everything fits together.

MISS MADISON - three guys from Mönchengladbach (Germany), all in their 20s. **Founded in 2020**, the trio has been creating their **unique indie rock** sound with a variety of musical influences. Driving, almost punky rhythms and subtle basslines are crossed with shimmering guitar riffs, that combine elements of post-grunge and progressive rock. This results in a sound that oscillates between spherical expanses and precise, rhythmically staggered runs and is both dreamy and captivating and unexpectedly playful.

Their first EP **„Lost Youth“**, released in the summer of 2023, helped the band build a loyal fanbase and present themselves as emerging newcomers, which resulted in over **100,000 streams** on Spotify alone.

2024 was followed by the singles **„Love Again“**, **„Two Loving Hearts“** and **„Honey Hills“** as a preview of their EP releasing in 2025. **„Honey Hills“** in particular continues the critical lyrics of the previous EP and shows once again that MISS MADISON cannot be pigeonholed into one genre. The vibrant folk-rock sound meets current topics such as social tensions in the USA - powerfully and relentlessly presented.

Live, the three friends are an absolute experience. With child-like fun and relentless ambition, they can play playfully and calmly as well as explosive and danceable. As a result, the trio can already look back on **more than 100 concerts** in Germany and the Netherlands and set a highlight this summer with their performance at the UEFA European Championships, where they played in front of thousands of people and shared the stage with acts such as **Welshly Arms, Kamrad, ISAAK** and **Leony**.
