

Experiment No. 4 – Examination of Respiratory System

1. Name two conditions in which bronchial breathing is heard over the chest.
Give reasons.

Ans:-

Condition	Reason
Pneumonia(Consolidation)	Lung tissue becomes solid due to exudate
Tuberculosis Cavity	Cavity acts as a resonating chamber, transmitting the brachial breath sounds.

2. Describe the breath sound you hear in the infrascapular region?

Ans:- The breath normally heard in the infrascapular region is **vascular breath sound**.

- Soft pitched, rusting sound
- Long and loud
