ROUGHING-IN DIMENSIONS:

- For reference

***FROM CENTER TO CENTER OF MOUNTING BRACKETS**
***NOTE: MEASUREMENT IS APPROXIMATE ONLY,**
PLEASE USE BAR AS TEMPLATE FOR ACTUAL
CENTER TO CENTER MEASUREMENTS.

1 INSTALL ADJUSTABLE SLIDE BAR

- The SLIDE BAR (1) works best when secured to the wall studs or cross brace using the WOOD SCREWS. If mounting into the studs is not possible, use appropriate wall fasteners provided to secure the installation.
- Mark a vertical center line in the location you wish to install the SLIDE BAR (1).
NOTE: The height from the finished floor is optional. See rough-in drawing for suggested dimensions.
- Determine desired height from the finished floor to the lower support and mark a horizontal center line. Measure up *600mm (23-5/8") and mark another horizontal center line. This is the location of the two mounting holes.
- Using 15/64" diameter drill. Drill two mounting holes 1-1/4" max. deep. **Fig. A.**
- Install the two ANCHORS (2) provided into the mounting holes. Use a hammer to lightly tap ANCHORS (2) into place. Make sure they are installed flush against the finished wall. **Fig. B.**
- Place the MOUNTING BRACKETS (3) over the ANCHORS (2) and secure the MOUNTING BRACKETS (3) with the SCREWS (4) provided. **Fig. B.**
- Align and install the SLIDE BAR (1) onto the MOUNTING BRACKETS (3). **Fig. B.**
- Hold SLIDE BAR (1) against finished wall. Tighten the two SET SCREWS (6) with the HEX WRENCH (7) supplied. **Fig. B.**
- Check operation of HAND SHOWER HOLDER (9) by rotating KNOB (8) and moving HAND SHOWER HOLDER (9) up and down. Rotate KNOB (8) back to lock HAND SHOWER HOLDER (9). **Fig. B.** Rotate SHOWER HOLDER (5) to desired position. **Fig. B.**
