1 INSTALL LOWER SUPPORT BRACKET

- The SLIDE BAR works best when secured to the wall studs or cross brace using the WOOD SCREWS. If a mounting into the studs is not possible, use appropriate wall fasteners to provide secure installation.

- Mark a vertical center line in the location you wish to install the SLIDE BAR. **NOTE:** The height from the finished floor is optional. See rough-in drawing for suggested dimensions.

- Determine desired height from the finished floor to the lower support and mark a horizontal center line. Place the MOUNTING BRACKET **(1)** on the center lines, with a pencil mark the location on the mounting holes to be drilled. **Fig. A.**

- Using 15/64" diameter drill. Drill two mounting holes 1" max. deep. **Fig. B.**

- Install the two ANCHORS **(2)** provided into the mounting holes. (Use a hammer to lightly tap ANCHORS (2) into place.) Make sure they are installed flush with the finished wall.

- Place the MOUNTING BRACKET **(1)** over the ANCHORS **(2)** and secure the MOUNTING BRACKET **(1)** with the SCREWS **(3)** provided. **Fig. C.**
