TECK[®]
COMMERCIAL

DELTA[®]

SPECIFICATION: (EXAMPLE)

- Push button electronic shower system
- **Hardwire** – 24 VAC to 6 VDC or **Battery** – 4 “AA” 6 VDC
- Stainless steel cover with S/S vandal resistant mounting screws
- Metal mounting box
- Field adjustable shower time
- Slow-closing solenoid valve
- Integral stop
- Tempered water supplied to solenoid valve (except control box options No. 3 and 6) and... with... (add shower required)
with... (add control/sensor box required)
with... (hardwire with battery backup – specify separately – see next page)
with... (transformer – specify separately – see next page)

APPROVALS:

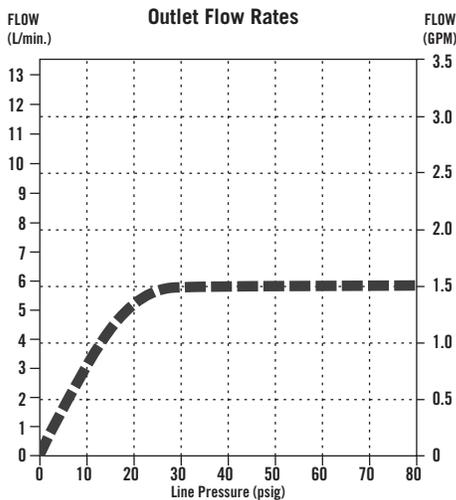

- CSA certified
- Complies to ASME A112.18.1/CSA B125.1
-  Indicates compliance to ICC/ANSI A117.1
- Control/Sensor Box Option 7, Pressure Balancing Valve, complies with ASSE 1016/ASME A112.1016/CSA B125.16
- Control/Sensor Box Option 8, Thermostatic Mixing Valve certified to CSA B.125.3. Complies with ASSE 1069 and ASSE 1070/ASME A112.1070/CSA B125.70.
- Hand shower back flow protection provided by two integral certified check valves in series, which operate independently, ASME A112.18.3

FLOW RATE vs PRESSURE

OPERATION:

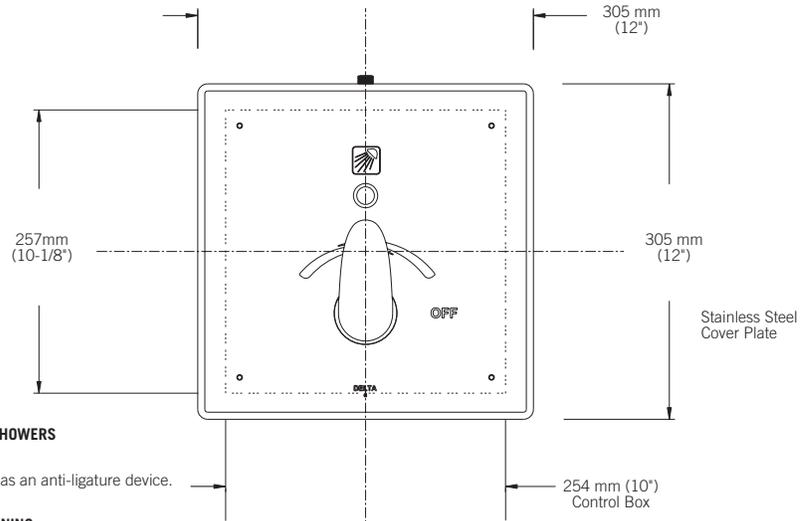

- Shower flows when push button is activated.
- Adjustable maximum continuous run time 10 minutes.
- Factory set to 3 minutes.

NOTE: For optimum performance of this product, we recommend a system pressure between 20 and 80 PSI static. This product will operate up to a maximum of 125 PSI static per ANSI and CSA requirements. However, we do not recommend pressures above 80 PSI. Thermal expansion or leaking pressure reducing valves may require use of expansion tanks or relief valves to ensure your system never exceeds its maximum intended pressure setting.

Note: Measurements may vary ± 6mm (0.25")

Refer to www.specselect.com for individual models.

860T167 TYPICAL INSTALLATION

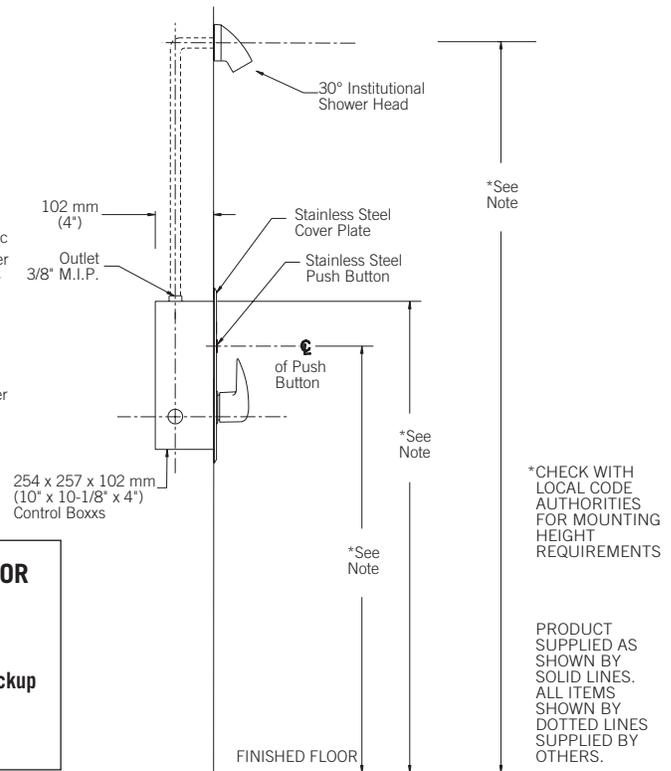

NOTE FOR SHOWERS #6 AND #7:

Not for use as an anti-ligature device.

PAUSE WARNING FOR SHOWER #5

Plumbing Codes require that shower heads and hand showers provide a small but continuous flow of water (trickle) when in "PAUSE" mode. Because of this continuous flow, in certain circumstances pressure variations in the water line and/or changes in the position of the shower temperature control handle while in "PAUSE" mode could result in dramatic changes to the temperature of the water when the shower head or hand shower is returned to the "ON" position.

ALWAYS point the shower head away from yourself when returning to the "ON" position and feel the water with your hand before resuming your shower to ensure the water flow is not too hot or too cold. DO NOT allow children or others who might not understand this warning to use the "PAUSE" function.
