Laboratory testing has shown that when cleaned regularly, CuVerro surfaces kill more than 99.9% of bacteria within 2 hours, and continue to kill 99% of bacteria even after repeated contamination. Testing demonstrates effective antibacterial activity against Methicillin-Resistant Staphylococcus aureus (MRSA), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, Vancomycin-Resistant Enterococcus faecalis (VRE) and Escherichia coli O157:H7.

CuVerro copper alloy surfaces have been shown to reduce microbial contamination, but does not necessarily prevent cross-contamination. The use of a copper alloy surface is a supplement to and not a substitute for standard infection control practices; users must follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces.

Copper alloy surfaces are for use only in non-food zone areas.

CuVerro is a registered trademark of GBC Metals LLC, d/b/a Olin Brass. CuVerro antimicrobial alloys are registered with the U.S. Environmental Protection Agency as antimicrobial under product registration #85353-5.
